A Contemporary History of Women's Sport, Part One Routledge

The Making of Les Bleus traces the Fifth Republic's quest to create elite athletes in two global team sports, football and basketball, primarily at the youth level. While the objective of this mission was to improve performances at international competitions, such programs were quickly seized upon to help ease domestic issues and tensions. The onset of the Cold War forced countries of all sizes to rethink their relevancy. A country's ability to exert "soft power," or influence others through the cultural sphere, became more important. Sport was but one way through which to do so. The extent to which France harnessed the athletic domain was unprecedented among other West European nations. In France, sport, particularly at the youth level, was used to cultivate soft power internationally, to transmit republican ideals of democracy and fair play to the youth, and to examine and create a modern, post-colonial French identity in a globalizing world. The French sought to find a "third way" in sports, much in the way that it sought to create an alternative between the diplomatic policies of Washington and Moscow. Fifth Republic sports systems placed the training of elite athletes under the state. At the same time, private clubs also played an important role in developing players to serve the republic in elite competition. Examination of the republic's quest to create elite athletes provides perspective on how France coped with and adapted to the post-1945 world. In what ways did the country reconfigure its global role? How did domestic changes impact society? In a globalizing, post-colonial world, how has France

come to terms with the past? In what ways has France sought to create a new "French" identity? This story helps answer such questions. The history of the state's cooption of youth sports forms a compelling tale and serves as a prism through which to investigate the larger history of France, the evolution of society, the impacts of the media revolution, and the government's mission of public health. It underscores just how much things have changed—yet still remained the same. You can find a podcast interview with the author about this book at:

This book is an historical survey of women's sport from 1850-1960. It looks at some of the more recent methodological approaches to writing sports history and raises questions about how the history of women's sport has so far been shaped by academic writers. Questions explored in this text include: What are the fresh perspectives and newly available sources for the historian of women's sport? How do these take forward established debates on women's place in sporting culture and what novel approaches do they suggest? How can our appreciation of fashion, travel, food and medical history be advanced by looking at women's involvement in sport? How can we use some of the current ideas and methodologies in the recent literature on the history and sociology of sport in order to look afresh at women's participation? Jean Williams's original research on these topics and more will be a useful resource for scholars in the fields of sports, women's studies, history and sociology.

This book provides a historical study of the beginnings of the UEFA, demonstrating how the formation of the organisation was linked to the decentralisation experienced by FIFA, the world governing body of football. Vonnard examines why administrators created an association that transcended the barriers of the Cold War, and focused on the development of a network that promoted football outside the constraints of international politics. Finally, he emphasises the role UEFA played in the Europeanisation of the people's game, and in the early years of the European integration process. The research is based on a rich body of new archival material from the UEFA and FIFA Documentation Centres, and various European football federations, as well as reports from a number of leading newspapers of the era, and interviews with football personalities of the 1950s. It will be of interest to students and scholars across the history of sport, international relations, and European studies

'The Europe of football' is one of the aspects of the history of European integration that has generated the smallest amount of academic research. However, the successive invention of sporting traditions with a European calling since the Belle Epoque, followed by the creation of various European cups during the interwar constitute at the same time an original form of 'Europe-building' and a lasting contribution to the creation of a European space and spirit. The target of the authors in this book is to look back on the genesis of European competitions that leads to the creation of the European cups now organised by UEFA. It also seeks to show how football has made possible the setting up of a partially transnational space through sports journalism. Lastly, through the study of the mobility and connections of football's actors, the different chapters will also try to identify the various phases of football's Europeanisation process on the old continent. It will lay strong emphasis on the anthropological, cultural, economic, political and social aspects of this history, notably the production of body techniques, representations, emblematic figures, consumption habits and their role in the larger context of international relations. This book was previously published as a special issue of *Sport in History*.

Orwell was wrong. Sports are not "war without the shooting", nor are they "war by other means." To be sure sports have generated animosity throughout human history, but they also require rules to which the participants agree to abide before the contest. Among other things, those rules are supposed to limit violence, even death. More than anything else, sports have been a significant part of a historical "civilizing process." They are the opposite of war. As the historical profession has taken its cultural turn over the last few decades, scholars have turned their attention to subject once seen as marginal. As researchers have come to understand the centrality of the human body in human history, they have come to study this most corporeal of human activities. Taking early cues from physical educators and kinesiologists, historians have been exploring sports in all their forms in order to help us answer the most fundamental questions to which scholars have devoted their lives. We have now seen a veritable explosion excellent work on this subject, just as sports have assumed an even greater share of a globalizing world's cultural, political and economic space. Practiced by millions and watched by billions, sports provide an enormous share of content on the Internet. This volume combines the efforts of sports historians with essays by historians whose careers have been devoted to more traditional topics. We want to show how sports have evolved from ancient societies to the world we inhabit today. Our goal is to introduce those from outside this sub-field to this burgeoning body of scholarship. At the same time, we hope here to show those who may want to study sport with rigor and nuance how to embark on a rewarding journey and tackle profound matters that have affected and will affect all of humankind.

'Excellent' Simon Kuper, author of the bestselling FOOTBALL AGAINST THE ENEMY 'The definitive story of how French football came of age' Christian Karembeu 'Erudite and engrossing' Vincent Duluc, lead football writer, L'ÉQUIPE THE PLAYERS, THE TEAMS, THE GOALS, THE GAMES, THE SCANDALS, THE GLOOM AND THE GLORY: THE STORY OF FRENCH FOOTBALL'S CHEQUERED COMING OF AGE OVER THE LAST 40 YEARS. French football is an

enigma: a puzzling jumble of brilliance and farce, flair and frailty, stunning success and abject failure. Its domestic league is mocked on social media as an uncompetitive 'Farmers League' and its clubs derided for underachieving in European competition. But France have reached four of the past seven men's World Cup finals, French players star week in, week out for the world's grandest clubs and the very best of French football - the roar of the Vélodrome, the glamour of the Parc des Princes, the shimmering brilliance of Zinédine Zidane, Éric Cantona and Kylian Mbappé - stands comparison with anything the sport has to offer. When it comes to scandal, meanwhile, the French are the best in the business, be it sensational match-fixing affairs, squabbles over sex tapes or meltdowns within the national squad. In this fascinating and exhaustively researched book, the first of its kind in the English language, Tom Williams brings to life French football's chequered coming of age over the last 40 years. He details how the starry-eyed romanticism that characterised the national team in the early 1980s gave way to an Italian-style pragmatism that would lead Les Bleus to the summit of the international game in the late 1990s, and examines how a succession of star-studded club sides grappled with the thorny (and distinctly un-French) notion of how to win. By delving into French football's rich history, he also explains the myriad ways - tactical, technical and cultural - in which France has shaped the game's evolution around the world. Featuring exclusive interviews with great figures of the French game such as Alain Giresse, Jean-Pierre Papin, Emmanuel Petit and Blaise Matuidi, and with a cast of characters that also includes Michel Platini, Thierry Henry, Karim Benzema, Chris Waddle and Lionel Messi, it's a book no football fan will want to miss. ---- 'A comprehensive account of the highs, lows and scandals of French football' Jonathan Wilson, author of the bestselling INVERTING THE PYRAMID

Beyond Boycotts Magic Speak

This book analyses the careers, governance and management practices of some of the institutional sports leaders who have had the greatest impact on global sport in the 120 years since Baron Pierre de Coubertin revived the Olympic Games. Through their positions in major sports organisations, their influence, the examples they set, their successes and failures, and their ability to bring about change, these notable individuals controlled and continue to control the development of Olympic and international sport. The portraits included within this collection provide a critical analysis of these leaders' careers by examining sports management from a biographical perspective, and allowing readers to understand the challenges and obstacles faced by international sport's top administrators. The contributors explore the interactions between these leaders' career paths and their strategies, both within their organisations and in the overall sporting context. Global Sport Leaders will be of interest to students and scholars across a range of disciplines including sports management, sociology, politics, history and international relations.

How did Mussolini manage to use the 1934 World Cup to benefit his fascist regime? How did North Korea, with its surprising team, reveal itself to the world in 1966? Why did the match between Kuwait and France in 1982 lead to the first diplomatic arbitration? What was behind the scenes of the 1998 'peace match' between the US and Iran? How and why did Qatar win the 2022 World Cup? In this second volume, Kévin Veyssière tells 22 new stories in which football, in the particular context of World Cups, has found itself at the heart of international political issues, from the beginnings in 1900 to the Qatari edition of 2022. The author explains how, for one hundred and twenty years, the greatest sporting competition has always been a tool for influence and power games. Kévin Veyssière, 30 years old, expert and professor in sports geopolitics, created Football Club Geopolitics, a Twitter account followed by more than 55,000 people. He is the author of Football Club Geopolitics: 22 unusual stories to understand the world (Max Milo, 2021).

Shifting European identities, cultural loyalties and divisions are often expressed more directly through attitudes to 'the people's game' game than in any other arena. This book examines European football journalism from throughout the last century to present a unique cross-cultural analysis of changing European national and regional identities. Building on detailed research into original language sources from across Western Europe, from the early 20th century to the present day, Football and European Identity traces this fascinating evolution. The resulting cross-cultural analysis of national identity in Europe provides the basis for a unique study of the interplay between football, society, politics and the print media, in three parts: Part 1: Old Europe national identity in the football writing of England, France, Germany, Italy and Spain Part 2: Nations within a State examines the status of Corsican, Catalanian and Basque identities Part 3: New (Football) Worlds explores the response of Europe's presses to the emergence of Africa, South East Asia and the USA as major forces in world football

Sport during Cold War has recently begun to be studied in more depth. Some scholars have edited a book about the US and Soviet sport diplomacy and show how the government of these two countries have used sport during this period, notably as a tool of "soft power" during the Olympic games. Our goal is to continue in this direction and to focus more on the sport field as a place of exchanges during the Cold War. Regarding this point, our aim is to show that there were events "beyond boycotts" many and that unknown connections existed inside sport. Moreover, many actors were involved in these exchanges. Thus, it is important not only to focus on the action of States, but also on private actors (international sporting bodies and journalists), considering that they acted around sport (an "apolitic" field) as it was a tool to maintain links between the two blocs. Our project offers a good opportunity for young scholars to present original research based on new materials (notably the use of institutional or personal archives). Moreover, it is also a step forward with a view to conduct research within a global history paradigm, one that is still underused in sport academic

fields.

Global Sport Leaders Routledge

It is undeniable that Association football is a global game with huge popularity. Yet what is known as 'women's football' receives far less support, financial assistance, media coverage and academic attention than the men's game. Consequently the story of women's football remains largely untold and its potential as a sports-related discussion is yet to be fulfilled. *Women, Football and Europe* is a collection of essays that contributes new knowledge on women's football. Volume 1 deals with historical aspects of the game, equality issues, and the experiences of those involved, while volume 2 looks at individual topics such as the 2005 UEFA Women's Championships, the pressures and constraints on female coaches, and the key issues affecting the development of the women's game in England and Europe.
