Moses Seven Books

What is happening in the brain when we drink too much alcohol, get high on ecstasy or experience road rage? Emotion, says internationally acclaimed neuroscientist Susan Greenfield, is the building block of consciousness. As our minds develop we create a personalized inner world based on our experiences. But during periods of intense emotion, such as anger, fear or euphoria, we can literally lose our mind, returning to the mental state we experienced as infants. Challenging many preconceived notions, Susan Greenfield's groundbreaking book seeks to answer one of science's most enduring mysteries: how our unique sense of self is created.

Alice in Wonderland Hachette UK

Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying dynamics that influence market activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by "rationality" when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will improve investors ability to interpret change in markets, enabling better, more confident investment decisions.

The Man Who Tasted Words John Wiley & Sons

Kate, born to abusive, drug addicted parents, identifies an inner God voice when she is very young. This voice, and the support of her grandmother, helps her overcome her circumstances instead of falling victim to them. However, as she grows up she finds that the apple doesn't fall too far from the tree, and she discovers that she is an addict herself. Deciding not to go down the path her parents went, she rises above her circumstances again and chooses the path of recovery. Now 8 years sober she shares how faith helped her continue to take positive action and avoid victimization every step of the way. "Impossible to put down. Both drily funny and yet often terrifying, this is a raw, unflinching account of a chaotic and abusive childhood overcome by inner strength and an enduring sense of humor."

Down the Rabbit Hole Avery

The tenth-anniversary edition of the book that changed lives in profound ways, now with a new foreword and afterword. In 2006, a groundbreaking feature-length film revealed the great mystery of the universe—The Secret—and, later that year, Rhonda Byrne followed with a book that became a worldwide bestseller. Fragments of a Great Secret have been found in the oral traditions, in literature, in religions and philosophies throughout the centuries. For the first time, all the pieces of The Secret come together in an incredible revelation that will be life-transforming for all who experience it. In this book, you'll learn how to use The Secret in every aspect of your life—money, health, relationships, happiness, and in every interaction you have in the world. You'll begin to understand the hidden, untapped power that's within you, and this revelation can bring joy to every aspect of your life. The Secret contains wisdom from modern-day teachers—men and women who have used it to achieve health, wealth, and happiness. By applying the knowledge of The Secret, they bring to light compelling stories of eradicating disease, acquiring massive wealth, overcoming obstacles, and achieving what many would regard as impossible.

Biggest Flirts Macmillan + ORM

"My all-time favorite. Astonishing." (Stephen King) Down the Rabbit Hole is the first book in the Echo Falls mystery series by bestselling crime novelist Peter Abrahams. Perfect for middle school readers looking for a good mystery. Welcome to Echo Falls, home of a thousand secrets. In Down the Rabbit Hole, eighth grader Ingrid Levin-Hill is in the wrong place at the wrong time. Or at least her shoes are. And getting them back will mean getting tangled up in a murder investigation as complicated as the mysteries solved by her idol, Sherlock Holmes. With soccer practice, schoolwork, and the lead role in her town's production of Alice in Wonderland, Ingrid is swamped. But as things in Echo Falls keep getting curiously and curiously, Ingrid realizes she must solve the murder on her own—before it's too late. "Deft use of literary allusions and ironic humor add further touches of class to a topnotch mystery," said School Library Journal. "Intriguing twists." Publishers Weekly agreed: "The fresh dialogue and believable small-town setting will tempt fans to visit Echo Falls again." The next book in this Edgar Award-nominated series is Behind the Curtain, followed by Into the Dark.

Catch the Rabbit Macmillan

Identifying scientism as religion's secular counterpart, this collection studies contemporary contestations of the authority of science. These controversies suggest that what we are witnessing today is not an increase in the authority of science at the cost of religion, but a dual decline in the authorities of religion and science alike. This entails an erosion of the legitimacy of

universally binding truth claims, be they religiously or scientifically informed. Approaching the issue from a cultural-sociological perspective and building on theories from the sociology of religion, the volume unearths the cultural mechanisms that account for the headwind faced by contemporary science. The empirical contributions highlight how the field of academic science has lost much of its former authority vis-à-vis competing social realms; how political and religious worldviews define particular research findings as favorites while dismissing others; and how much of today's distrust of science is directed against scientific institutions and academic scientists rather than against science per se.

Reaching Down the Rabbit Hole Penguin UK

New York, 2061. Darlene Fitzwilliams - a young heiress - kills her brother then jumps from a tall building. All the evidence suggests a tragic but familiar murder/suicide case for Lieutenant Eve Dallas. But when Eve discovers that Darlene has been visiting psychics and spiritual healers, things take a dark and unsettling turn. Someone has been meddling with Darlene Fitzwilliams' subconscious - someone with a gift for hypnosis and a disturbing obsession with Lewis Carroll's Alice in Wonderland. With husband Roarke and partner Peabody at her side, Eve finds herself falling down the rabbit hole into one of the strangest investigations of her career. One that threatens not just her body, but her mind... Set between Devoted in Death and Brotherhood in Death.

How to Talk to a Science Denier Univ. of Queensland Press
 Discover a world of outrageous experiments with the Sunday Times top ten bestseller, Elephants on Acid. Guided by Alex Boese's engaging storytelling, unearth answers to questions that have tickled your curious mind - from the unusual to the hilariously absurd. 'Excellent accounts of some of the most important and interesting experiments in biology and psychology' - Simon Singh, author of The Code Book A riveting look at historical experiments that challenge conventional thinking: If left to their own devices, would babies instinctively choose a well-balanced diet? - Discover the secret of how to sleep on planes - Which really tastes better in a blind tasting - Coke or Pepsi? - Would your dog run to fetch help if you fell down a disused mineshaft? - What would happen if you gave an elephant the largest ever single dose of LSD? Elephants on Acid humorously delves into these and more, delivering a unique blend of popular psychology and historical science - a fascinating insight into the bizarre world of scientific experiments.

When the Lights Go Out St. Martin's Press

If you want to know your Freud from your Jung and your Milgram from your Maslow, strap in for this whirlwind tour of the highlights of psychology. Including accessible primers on: The early thinkers who contributed to psychological ideas and the birth of modern

psychology Famous (and often controversial) experiments and their repercussions What psychology can teach us about memory, language, conformity, reasoning and emotions The ethics of psychological studies Recent developments in the modern fields of evolutionary and cyber psychology. This illuminating little book will introduce you to the key thinkers, themes and theories you need to know to understand how the study of mind and behavior has sculpted the world we live in and the way we think today.

Making up the Mind Harlequin

An unprecedented portrait of Moses's inner world and perplexing character, by a distinguished biblical scholar No figure looms larger in Jewish culture than Moses, and few have stories more enigmatic. Avivah Gottlieb Zornberg, acclaimed for her many books on Jewish thought, turns her attention to Moses in this remarkably rich, evocative book. Drawing on a broad range of sources—literary as well as psychoanalytic, a wealth of classical Jewish texts alongside George Eliot, W. G. Sebald, and Werner Herzog—Zornberg offers a vivid and original portrait of the biblical Moses. Moses's vexing personality, his uncertain origins, and his turbulent relations with his own people are acutely explored by Zornberg, who sees this story, told and retold, as crucial not only to the biblical past but also to the future of Jewish history.

Down the Rabbit-hole MIT Press

A page-turning novel that is also an exploration of the great philosophical concepts of Western thought, Jostein Gaarder's *Sophie's World* has fired the imagination of readers all over the world, with more than twenty million copies in print. One day fourteen-year-old Sophie Amundsen comes home from school to find in her mailbox two notes, with one question on each: "Who are you?" and "Where does the world come from?" From that irresistible beginning, Sophie becomes obsessed with questions that take her far beyond what she knows of her Norwegian village. Through those letters, she enrolls in a kind of correspondence course, covering Socrates to Sartre, with a mysterious philosopher, while receiving letters addressed to another girl. Who is Hilde? And why does her mail keep turning up? To unravel this riddle, Sophie must use the philosophy she is learning—but the truth turns out to be far more complicated than she could have imagined.

Reaching Down the Rabbit Hole Penguin

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Down the Rabbit Hole Macmillan + ORM

What makes one man a genius and another a criminal? Is there a physical explanation for these differences? For hundreds of years, scientists have been fascinated by this question. In *Postcards from the Brain Museum*, Brian Burrell relates the story of the first scientific attempts to locate the sources of both genius and depravity in the physical anatomy of the human brain. It describes the men who studied and collected special brains, the men who gave them up, and the sometimes cruel fate of the brains themselves. The fascination with elite brains was an aspect of the scientific mania for measurement that gripped the Western world in the mid-nineteenth century, along with a passionate interest in the biological basis of genius or exceptional talent. Many leading intellectuals and artists willed their brains to science, and the brains of notorious criminals were also collected by eager anatomists ghoulishly waiting in the execution chamber with a bag full of sharp metal tools. Focusing on the posthumous sagas of brains belonging to Byron, Whitman, Lenin, Einstein, the mathematician Carl Friedrich Gauss, and many others, Burrell describes how the brains of famous men were first collected—by means both fair and foul—and then weighed, measured, dissected, and compared; exhaustive studies analyzed their fissural complexity and cell or neuron size. In various cities in Europe, Russia, and the United States, brain collections were painstakingly assembled and studied. A veritable who's who of literary, artistic, musical, scientific, and political achievement waited in Formalin-filled jars for their secrets to be unlocked. The men who built the brain collections were colorful and eccentric figures like Rudolph Wagner, whose study of the brain of Carl Friedrich Gauss led to one of the great scientific debates of the nineteenth century. In America, the Fowler brothers brought phrenology to the United States and made a convert of Walt Whitman, whose brain was donated to science and disappeared

under mysterious circumstances. Eventually, this project was abandoned, and with the discovery of new technologies the study of the brain has moved on to a higher plane. But the collections themselves still exist, and today, in Paris, London, Stockholm, Philadelphia, Moscow, and even Tokyo, the brains of nineteenth century geniuses sit idle, gathering dust in their jars. Brian Burrell has visited these collections and looked into the original intentions and purposes of their creators. In the process, he unearths a forgotten byway in the history of science—a tale of colorful eccentrics bent on laying bare the secrets of the human mind.

Smarter HarperCollins

'The best Australian novel I have read in more than a decade' Sydney Morning Herald 'Astonishing, captivating ... a wild, beautiful, heart-exploding ride' Elizabeth Gilbert The bestselling novel that has taken Australia, and the world, by storm. Winner of Book of the Year at the 2019 Indie Book Awards, winner of a record four Australian Book Industry Awards in 2019, including the prestigious Book of the Year Award, and winner of the 2019 UTS Glenda Adams Award for New Writing, NSW Premier's Literary Awards Brisbane, 1985: A lost father, a mute brother, a junkie mum, a heroin dealer for a stepfather and a notorious crim for a babysitter. It's not as if Eli Bell's life isn't complicated enough already. He's just trying to follow his heart and understand what it means to be a good man, but fate keeps throwing obstacles in his way - not the least of which is Tytus Broz, legendary Brisbane drug dealer. But now Eli's life is going to get a whole lot more serious: he's about to meet the father he doesn't remember, break into Boggo Road Gaol on Christmas Day to rescue his mum, come face to face with the criminals who tore his world apart, and fall in love with the girl of his dreams. A story of brotherhood, true love and the most unlikely of friendships, *Boy Swallows Universe* will be the most heartbreaking, joyous and exhilarating novel you will read all year. Awards: 2019 ABIA Book of the Year Award, Winner 2019 Indie Book Award, Winner 2019 UTS Glenda Adams Award for New Writing, NSW Premier's Literary Awards, Winner 2019 People's Choice Award, NSW Premier's Literary Awards, Winner MUD Literary Prize 2019, Winner 2019 ABIA Matt Richell Award for New Writer of the Year, Winner 2019 ABIA Literary Fiction Book of the Year, Winner 2019 ABIA Audiobook of the Year, Winner 2019 Miles Franklin Literary Award, Longlisted 2019 Colin Roderick Award, shortlist Reviews: 'Boy Swallows Universe is a wonderful surprise: sharp as a drawer full of knives in terms of subject matter; unrepentantly joyous in its child's-eye view of the world; the best literary debut in a month of Sundays.' The Australian 'Boy Swallows Universe hypnotizes you with wonder, and then hammers you with heartbreak.' Washington Post 'This thrilling novel' New York Times Book Review 'Marvelously plot-rich ... filled with beautifully lyric prose ... At one point Eli wonders if he is good. The answer is "yes," every bit as good as this exceptional novel.' Booklist 'Dalton's splashy, stellar debut makes the typical coming-of-age novel look bland by comparison ... This is an outstanding debut.' Publisher's Weekly (starred review) 'Extraordinary and beautiful storytelling' Guardian

How the Brain Lost Its Mind Simon and Schuster

Tia and Will's lives get flipped upside down when they're voted Yearbook's Biggest Flirts in this sassy novel from the author of *Endless Summer* and *The One That I Want*. Tia just wants to have fun. She's worked hard to earn her reputation as the life of the party, and she's ready for a carefree senior year of hanging out with friends and hooking up with cute boys. And her first order of business? New guy Will. She can't get enough of his Midwestern accent and laidback swagger. As the sparks start to fly, Will wants to get serious. Tia's seen how caring too much has left her sisters heartbroken, and she isn't interested in commitment. But pushing Will away drives him into the arms of another girl. Tia tells herself it's no big deal...until the yearbook elections are announced. Getting voted Biggest Flirts with Will is, well, awkward. They may just be friends, but their chemistry is beginning to jeopardize Will's new relationship—and causing Tia to reconsider her true feelings. What started as a lighthearted fling is about to get very complicated...

Habits of the Creative Mind Simon and Schuster

Moon People 2 This story is about the space Adventures of 1st Science Officer Captain David Braymer and his transition from the Lunar Base 1 base station to his new home the Powleens traded them called the Aurora, a spaceship that looks like a Moon also known as "Goddess of The Dawn" it is 10 kilometers in diameter and with light speed capability. It's the size of a small city. It has everything a small city would have like two hospitals and restaurants and shopping malls all over the ship. Captain Braymer also has a romantic attachment to a young lady by the name of Lieutenant Heather Courtney who is an Officers Aid. They have a few out of the ordinary experiences that they do not forget any time soon. And our new friends the Powleens have advanced us centuries ahead of our time. They also traded us for five of their newest ships in their space fleet all with light speed capability with all of their weapons in tacked. They traded us for all kinds of

their gadgetry and even some of their food. That's what they do go all over the Galaxy looking for friends and ultimate knowledge and trade with everyone they can find. Commander Braymer also has a mission to do a genesis on Mars that turns out surprisingly good with a few added benefits. One of the benefits was discovering a lot of Martian people and animals in a Noah ark kind of setup that has been frozen for over 100,000 years in life support chambers. They were all brought back to life again. There were many discoveries' not to mention all of the futuristic weapons they find with aircraft all superior to anything at present by anyone. And nobody expected the Martians to have special mental powers like telekinetic and telekinesis and all sorts of mental telepathy powers like mind transference and the power to levitate in the air. Well everything was going pretty smooth until Galactic war breaks out all over the universe and the final Battle happens in our solar system. It was Earth with the Powleen people and also the Martians against the snake looking people called the Arcons and their friends the Thracians who resemble dog like people with sharp claws. There were crashed ships all over our planets and their moons in our solar system. It was the Battle of all Battles. It decided the control of our Galaxy. If you think all of this sounds good wait till you read the book, its action packed from start to finish. I know you will enjoy Moon People Trilogy. It's some of my best work. And don't worry some day you just might see something that resembles "Moon People 3" coming to your local Book store near you. Thank you and God Bless. Dale M. Courtney Author

Rabbit Hole Yale University Press

A necessary communication guide for the "fake news" era—with practical advice, strategies, and scripts for engaging in productive political discourse with the misinformed. Flat earthers, anti-vaxxers, climate change disbelievers . . . Can we change the minds of science deniers? "Climate change is a hoax—and so is coronavirus." "Vaccines are bad for you." These days, many of our fellow citizens reject scientific expertise and prefer ideology to facts. They are not merely uninformed—they are misinformed. They cite cherry-picked evidence, rely on fake experts, and believe conspiracy theories. How can we convince such people otherwise? How can we get them to change their minds and accept the facts when they don't believe in facts? In this book, Lee McIntyre shows that anyone can fight back against science deniers, and argues that it's important to do so. Science denial can kill. Drawing on his own experience—including a visit to a Flat Earth convention—as well as academic research, McIntyre outlines the common themes of science denialism, present in misinformation campaigns ranging from tobacco companies' denial in the 1950s that smoking causes lung cancer to today's anti-vaxxers. He describes attempts to use his persuasive powers as a philosopher to convert Flat Earthers; surprising discussions with coal miners; and conversations with a scientist friend about genetically modified organisms in food. McIntyre offers tools and techniques for communicating the truth and values of science, emphasizing that the most important way to reach science deniers is to talk to them calmly and respectfully—to put ourselves out there, and meet them face to face.

The Private Life of the Brain MIT Press

Moving to America turns H&A's life inside out. For all the 10 years of her life, H&A has only known Saigon: the thrills of its markets, the joy of its traditions, the warmth of her friends close by, and the beauty of her very own papaya tree. But now the Vietnam War has reached her home. H&A and her family are forced to flee as Saigon falls, and they board a ship headed toward hope. In America, H&A discovers the foreign world of Alabama: the coldness of its strangers, the dullness of its food, the strange shape of its landscape, and the strength of her very own family. This is the moving story of one girl's year of change, dreams, grief, and healing as she journeys from one country to another, one life to the next.

The Secret HarperCollins Australia

In this book, Dr. Allan Ropper and Brian Burrell take the reader behind the scenes at Harvard Medical School's neurology unit to show how a seasoned diagnostician faces down bizarre, life-altering afflictions.

Wonderment In Death Simon and Schuster

"Spurious Correlations ... is the most fun you'll ever have with graphs." -- Bustle Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. Is there a correlation between Nic Cage films and swimming pool accidents? What about beef consumption and people getting struck by lightning? Absolutely not. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations. He began pulling the funniest ones for his website and has since gained millions of views, hundreds of thousands of likes, and tons of media coverage. Subversive and clever, *Spurious Correlations* is geek humor at its finest, nailing our obsession with data and conspiracy theory.
