 In recent years we have witnessed a growing interest in multilingualism and its relationship with the learning and teaching of second/foreign languages. However, multilingualism is a highly complex phenomenon, which has a direct influence on how we learn languages. For instance, do we learn a second/foreign language in a similar way in a multilingual context as in a monolingual one? What is the role of the other languages spoken in the community? Do contrasting learning contexts, like CLIL or studying abroad, produce different results? Can positive emotions such as foreign language enjoyment have an active role in the foreign language learning process? These and other topics will be discussed in this book, with the aim of understanding multilingualism, how languages are learned and how to teach them better. This book was originally published as a special issue of the International Journal of Multilingualism.

"A much-needed guidebook . . . a treasure chest of insights." — Caroline Myss, M.D. "[A] brilliant new work . . . profound healing advice." — Brian L. Weiss, M.D. Many of us grapple with how to stay happy, calm, and focused in a world that seems to get more complex by the minute. How do we keep our wits about us, our mood stable, and our memory intact when our brains and bodies are bombarded with information and influences from every side? This one-of-a-kind resource combines cutting-edge science with compassion and wisdom to offer answers we can really use. Heal Your Mind continues the three-pronged healing approach that Dr. Mona Lisa Schulz and Louise Hay pioneered together in All Is Well: Heal Your Body with Medicine, Affirmations, and Intuition. Here, it's applied to aspects of the mind ranging from depression, anxiety, and addiction to memory, learning, and even mystical states. You'll learn what's going on in your brain and body when you feel sad, angry, or panicked; you have trouble focusing, reading, or remembering; a past trauma is clouding your mind in the present; and more. And in each chapter, you'll get a "virtual healing experience" through case studies in the All Is Well Clinic, where Dr. Mona Lisa uses medical intuition to pinpoint issues in a wide range of prototypical client histories and she and Louise offer solutions and affirmations to help restore well-being. Today, we tend to think our minds and bodies need an endless array of expensive, ever-changing pharmaceutical interventions. In truth, medicines are just one approach to healing the mind; nutritional supplements also support mind-body health; and affirmations restore us to balance by changing the way we think. Heal Your Mind puts all these tools at your disposal to help you choose your own path.

Whether you're vacationing in Italy or simply an armchair traveler, this guide to the Mediterranean island of Sicily is a dazzling introduction to the region's rich 3,000-year history and culture. A rich and fascinating cultural history of the Mediterranean's enigmatic heart Sicily is at the crossroads of the Mediterranean, and for over 2000 years has been the gateway between Europe, Africa and the East. It has long been seen as the frontier between Western Civilization and the rest, but never definitively part of either. Despite being conquered by empires—Romans, Byzantines, Arabs, Normans, Hapsburg Spain—it remains uniquely apart. The island's story maps a mosaic that mixes the story of myth and wars, maritime empires and reckless crusades, and a people who refuse to be ruled. In this riveting, rich history Jamie Mackay peels away the layers of this most mysterious of islands. This story finds its origins in ancient myth but has been reinventing itself across centuries: in conquest and resistance. Inseparable from these political and social developments are the artefacts of the nation's cultural patrimony—ancient amphitheatres, Arab gardens, Baroque Cathedrals, as well as great literature such as Giuseppe di Lampedusa's masterpiece The Leopard, and the novels and plays of Luigi Pirandello. In its modern era, Sicily has been the site of revolution, Cosa Nostra and, in the twenty-first century, the epicenter of the refugee crisis.

Catullus is a companion of lovers and of those whom love has disappointed. He is also a satirical and epigrammatic writer who savagely consoles with laughter. Carmina captures in English both the mordant, scathing wit and also the concise tenderness, the famous love for reluctant Lesbia who is made present in these new versions. A range of English metres and rhymes evokes the many modes and moods of this most engaging, erotic and influential of Latin poets. Of Len Krisak's translations of Horace, Frederic Raphael writes, "[He] enables us both to enjoy a fresh voice and to hear (and see), very distinctly, what lies behind and within his unintimidated rescripts'. Again in Carmina Krisak works his precise magic.

This first volume of the collected writings of sociologist Leo Lowenthal contains his classic theoretical and historical writings on the relationship of art to mass culture. This book series presents Lowenthal's contributions to a theory of the role of communication in modern society. This volume lays out the basis for a theory of mass culture. Lowenthal demonstrates that the juxtaposition of a "low" mass culture and a "high" esoteric culture did not originate in contemporary industrial, bourgeois society but can be traced back to the Middle Ages and antiquity.

They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In Experiments in Ethics, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Faust, the First Part Markus Wiener Publishers

Is the fall of ISIS the end of the perpetual war in the Middle East? In this urgent and timely book, Patrick Cockburn writes the first draft of the history of the current crisis in the Middle East. Here he charts the period from the recapture of Mosul in 2017 to Turkey's attack on Kurdish territory in November 2019, and recounts the new phase in the wars of disintegration that have plagued the region. The ground battle with the caliphate is perhaps over, but was this the end of the conflict that has scarred these nations for decades? Cockburn offers panoramic on-the-ground analysis as well as a lifetime's study of the region. And here he shows how

peace appears a distant possibility with the continuation of conflict in Syria, Saudi Arabia's violent intervention in the Yemen, riots in Baghdad and Tehran. At the same time, the rising aggression between Israel and Iran, the raising of stakes between the US, Russia and Turkey, shows that this remains the theatre of the proxy wars of the world's superpowers. Has Trump abandoned the area for good, leaving a vacuum for others—Putin, Erdogan, Mohammed Bin Saud—to fill? He also looks at what might happen to the Islamic State: will it disappear now that it has lost its territory or emerge in a new form and with renewed violence?
