Gearing up for your ABAP C_TAW12_750 certification? Make the grade with this guide to the SAP Certified Development Associate exam for ABAP 7.5. Refresh your knowledge with coverage of key concepts and important

terminology, and then test yourself with practice questions, answers, and explanations. Study up on the latest in ABAP, like SQL statements, CDS views, ABAP classes, ABAP data types, and more. a. Questions and Answers Practice with questions and in-depth answers for each section of the exam and improve your test-taking skills. Solidify your knowledge with explanations and key concept refreshers. b. Core Content Focus only on what's important. Review exam subject

areas like ABAP Workbench, Unicode, ABAP Dictionary, object-oriented programming, Web Dynpro for ABAP, and more. c. New Topics for ABAP 7.5 Get the latest on new topics to ABAP 7.5 with expanded coverage of SQL expressions, SQL functions, and ON conditions. Explore new built-in data types like INT8, temporary global tables, and replacement objects.
MDX Reporting and Analytics with SAP NetWeaver BW SAP PRESS

If you're developing ABAP applications, you need CDS expertise. This book is your all-in-one guide, updated for SAP S/4HANA 2023! Start by learning to create and edit CDS views. Walk through CDS syntax and see how to define associations and annotations. Further refine your model by implementing access controls, service bindings, and table functions. Understand the CDS-based virtual data model, and then follow step-by-step instructions to model analytical and

transactional applications. From modeling to testing to troubleshooting, this is the only book you need! In this book, you'll learn about: a. Creating Data Models Create data models using CDS! Learn the ins and outs of CDS view syntax, from key fields to joins to data types and beyond. Define associations to establish relationships, use annotations to enrich your logic, implement conditional logic to control access, and more. b. Modeling Applications See how CDS views support a

new application architecture. Model analytical applications by defining analytical views and queries; then use CDS for transactional applications based on the ABAP RESTful application programming model. c. Extending, Testing, and Troubleshooting Put the finishing touches on your CDS data models. Extend and enhance CDS views and transactional models, develop automated tests using the test double framework, and troubleshoot common problems. Highlights

include: 1) Data modeling 2) Application modeling 3) Associations 4) Annotations 5) Access controls 6) Business services 7) SAP HANA functions 8) Virtual data model 9) Analytical and transactional applications 10) Hierarchies 11) Extensibility 12) Testing and troubleshooting

Microsoft .NET and SAP SAP PRESS

This book contains multiple choice questions similar to what you will get in the actual exam. How should we know? Because although we got

our BW Certification five years back, we have re-certified with the latest version of the Associate Certification test. Before you start here are some Key features of the BI (BW) Associate Certification Exam - The exam is Computer based and you have three Hours to answer 80 Questions. - The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. - Some of the Questions have more than one correct answers. You must get ALL the options

correct for you to be awarded points. This book contains over 175 questions covering each & every topic in the Certification.

SAP Bw/4hana 2.0 SAP PRESS

In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task We explain SAP basic concepts and the issues

with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP

backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2 and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as

split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family.
