Hi, my name is Delilah Sampson, and I am a self proclaimed "frump girl." My world came crashing down the day I walked in on my boyfriend having sex with my boss, rendering me single and jobless. A new job fell into my lap as the secretary of the gorgeous, rich, powerful, and mighty cocky controlling partner at the Santino Law Firm. I spend my days trying to please a demanding boss, keeping my lustful thoughts to myself. Until one night, when my best friend drags me to a club, and I fall for a man whose true identity I will never know. See, at Club Masquerade, everyone wears a mask and a nametag with a fake name. Also, on your nametag is a number that you are assigned when you come into the club, which is linked to an in-house messaging system; no one is permitted to speak, which ensures that

identities are kept secret. I meet my lover every Saturday at 9:00 pm sharp. We text and email constantly when we are not together, and I have somehow fallen in love with him. But, then there is Nick Santino. He is the partner that I can't keep my eyes off. Unfortunately, the only reason he hired me is because he is not attracted to me and all of my frump glory. Fortunately, for me, I am a kick ass secretary, so he keeps me around. Like many men in his position, Nick is used to getting what he wants, when he wants it; all without commitment, of course. So when he finds a woman that he is both physically and emotionally attracted to, he finds himself in uncharted territory - love. And I can do nothing but be jealous from the sidelines - lusting for a man I can't have, and loving a man I can't know. Hey there, Delilah is book 1 of a Taboo Love series, in which we tackle the boss/secretary relationship. Each book will be a stand alone with a HEA, but will have a few reoccurring characters.

Utilizing the more advanced features of the Data Web Controls has many developers stumped. These controls are fairly simple to use when it comes to simple data display. However, they can do much more than merely present data. For example, the DataGrid Web Control allows for sorting, paging, and editing of data. In addition, these controls allow for templating of data, which can be used to provide more complex views. The DataGrid, DataList, and Repeater forum on the Microsoft ASP.NET Forums received more than 2,100 posts in the first month and a half of use, or over 35 posts per day on average. As the Web master of an ASP.NET Web site, Scott has also received numerous emails from readers and visitors asking questions about these Web Controls. "ASP.NET Data Web Controls" is likely to be an indispensable item in every ASP.NET developer's toolbox.
