When did celebrity culture begin? In the Regency period, when people hungered for news of the illegitimate actress who became a duchess and the richest woman in England; and the hard-drinking Regency buck who horse-whipped anyone who criticised his terrible novels.

This edition has been extensively rewritten by subject experts from nursing, social work, physiotherapy, gerontology and sociology.

Disabling Barriers, Enabling Environments SAGE

How has Irish nature been studied? How has it been expressed in literature and popular culture? How has it influenced, and been influenced by, political, economic, and social change? These long-neglected questions are pursued in *Nature in Ireland*, a pioneering collection of original essays by leading naturalists, science writers, and cultural historians who bring us from the geological prehistory of Ireland to the environmental threats of the late twentieth century.

"Davis's accounts of small fights won by hot blood and cold steel are thrilling."—*The Wall Street Journal*
 From master historian William C. Davis, the definitive story of the Battle of New Orleans, the fight that decided the ultimate fate not only of the War of 1812 but the future course of the fledgling American republic. It was a battle that could not be won. Outnumbered farmers, merchants, backwoodsmen, smugglers, slaves, and Choctaw Indians, many of them unarmed, were up against the cream of the British army, professional soldiers who had defeated the great Napoleon and set Washington, D.C., ablaze. At stake was nothing less than the future of the vast American heartland, from the Gulf Coast to the Great Lakes, as the ragtag American forces fought to hold New Orleans, the gateway of the Mississippi River and an inland empire. Tipping the balance of power in the New World, this single battle irrevocably shifted the young republic's political and cultural center of gravity and kept the British from ever regaining dominance in North America. In this gripping, comprehensive study of the Battle of New Orleans, William C. Davis examines the key players and strategy of King George's Red Coats and Andrew Jackson's makeshift "army." A master historian, he expertly weaves together narratives of personal motivation and geopolitical implications that make this battle one of the most impactful ever fought on American soil.

Churchill Livingstone
 Choice Outstanding Academic Title 2014 While few detailed surveys of fauna or flora exist in England from the period before the nineteenth century, it is possible to combine the evidence of historical sources (ranging from game books, diaries, churchwardens' accounts and even folk songs) and our wider knowledge of past land use and landscape, with contemporary analyses made by modern natural scientists, in order to model

the situation at various times and places in the more remote past. This timely volume encompasses both rural and urban environments from 1650 to the mid-twentieth century, drawing on a wide variety of social, historical and ecological sources. It examines the impact of social and economic organisation on the English landscape, biodiversity, the agricultural revolution, landed estates, the coming of large-scale industry and the growth of towns and suburbs. It also develops an original perspective on the complexity and ambiguity of man/animal relationships in this post-medieval period.

Hybrid Identities and Adolescent Girls McGill-Queen's Press - MQUP

This groundbreaking book is based on the findings of the first major study on spiritual reminiscence work with people with dementia. Carried out over a decade, the study confirmed spiritual reminiscence to be an effective means of helping people with dementia to find meaning in their own experience, and interact in meaningful ways with others. The authors present the evidence for the efficacy of spiritual reminiscence with this group, and drawing on examples demonstrate its many benefits, as revealed by the study, including the affirmation of identity and worth whilst promoting resilience and transcendence; reducing levels of depression; and giving people with dementia a voice with which to express grief, despair, joy, wisdom, insight and humour. Specific practice issues are addressed, including how to maximise communication and nurture connections during sessions; the role of symbol, ritual and liturgy and how to design an effective spiritual reminiscence program. Transcripts of sessions are included throughout the book as examples, providing unprecedented insight into how people with dementia experience spiritual reminiscence, and encouraging reflective practice. The book closes with a set of suggested questions and discussion topics which can be used as the basis of a six week program. Providing theory and the latest research as well as a wealth of practical information and examples to guide practice, this book will be of interest to dementia care practitioners and activity coordinators, pastoral carers, aged care chaplains, practical theologians, students, academics and researchers.

This book examines the ethnic, gendered, and embodied 'hybrid' identities of 'half-Japanese' girls in Japan, colourfully narrated through their own voices. The girls struggle to positively construct their identities into positions of control over disempowering discourses of 'otherness', while also celebrating cultural capital as they negotiate their constructed identities of 'Japaneseness', 'whiteness' and 'halfness/doubleness'.
