International Inland Waters Penguin Classics

A mysterious millionaire with a penchant for strange pets takes a flyer on a string of pearls and finds that death is the broker. Charlie Chan embarks on an incognito journey across the desert to find the answer to a question – a question posed by a dead parrot who spoke in Chinese . . . Chan dons a disguise and goes undercover to solve a complex triple intrigue of fake identity, kidnapping and murder.

Informatics for the Clinical Laboratory HarperCollins

This manual focuses on measuring the effects of training and institutional development programs on individuals, the organizations or economic sectors in which they work, and the welfare of the larger community. It presents a conceptual framework as well as real-life examples drawn from evaluations of the Economic Development Institute's learning and capacity-building programs in the developing world. It provides practical advice on developing evaluation plans, designing questionnaires, conducting interviews, analyzing data, reporting findings, and making recommendations. Emphasis is placed on the active participation of stakeholders throughout the process.

The Pelican Guide to English Literature Springer

This series is directed to healthcare professionals who are leading the transformation of health care by using information and knowledge. Launched in 1988 as *Computers in Health Care*, the series offers a broad range of titles: some addressed to specific professions such as nursing, medicine, and health administration; others to special areas of practice such as trauma and radiology. Still other books in the series focus on interdisciplinary issues, such as the computer-based patient record, electronic health records, and networked healthcare systems. Renamed *Health Informatics* in 1998 to reflect the rapid evolution in the discipline now known as health informatics, the series will continue to add titles that contribute to the evolution of the field. In the series, eminent experts, serving as editors or authors, offer their accounts of innovations in health informatics. Increasingly, these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world. The series also increasingly focuses on "peopleware" and the organizational, behavioral, and societal changes that accompany the diffusion of information technology in health services environments.

Among the violent personalities of the High Renaissance, Lucrezia Borgia is chiefly remembered as a raven-haired poisoner.

The Prophetic Writings of William Blake Wipf and Stock Publishers

Alfieri's second treatise, *The Prince and Letters*, is as timely today as when first published in 1788. Vehemently rejecting Voltaire's contention that the greatest periods of literature and art are all associated with the name of some reigning patron, such as Augustus or Louis XIV, he maintains that only in perfect freedom can supreme poetry be born. His fundamental principles still apply, for the relation between the writer and the state has become increasingly complex. This is the first version in English. The translation keeps close to the original text, but renders it in smooth, clear English. The scholarship is of the highest quality, showing an intimate knowledge of Alfieri's life and of the political trends and culture currents of his age.

The solemn beatification of Pope Pius IX in September 2000 celebrated the heroic virtue of one of the most influential figures of the nineteenth century. Born in 1792, Giovanni Maria Mastai Ferretti was elected Pope on June 16th 1846. His pontificate, the subject of this biographical study, lasted thirty-two years, the longest after that of St Peter himself. Elevated to the Papacy amid the historical backdrop of turmoil and revolution in Italy and Europe, he was also to play a central role in the drama of the Risorgimento that led to the creation of a united Italy. Publication of the English translation of Roberto de Mattei's acclaimed study of Pius IX marks the 150th anniversary of the Pope's solemn definition of the Dogma of Our Lady's Immaculate Conception. Roberto de Mattei holds the chair of Modern History at the University of Cassino (Rome), is vice president of the Italian C.N.R. (National Council for Research) and is well-known in Italy as a journalist and writer.

Gandhi's ideas are as meaningful today as they were during his long and inspiring life. His enlightening thoughts and beliefs, especially on violence and the atomic bomb, reveal his eloquent foresight about our contemporary world. The words of one of the greatest men of the twentieth century, chosen by the award-winning director Richard Attenborough from Gandhi's letters, speeches, and published writings, explore the prophet's timeless thoughts on daily life, cooperation, nonviolence, faith, and peace. This bestselling volume includes an introduction by Attenborough and an afterword by Time magazine Senior Foreign Correspondent Johanna McGeary that places Gandhi's life and work in the historical context of the twentieth century. This book and the film *Gandhi* were the result of producer/director Richard Attenborough's long commitment to keeping alive the flame of Gandhi's spiritual achievement and the wisdom of his actions and his words. They are the wisdom and words of peace. Also included are twenty striking historical photographs, specially selected from the archives at the National Gandhi Museum in New Delhi, that capture the important personal, political, and spiritual aspects of Gandhi's career.

Evaluating the Impact of Training and Institutional Development Programs Tiger Books

A new translation of Giorgio Bassani's haunting collection of short stories that evoke 1930s Ferrara, with an introduction by Ali Smith. Isolated lives and a lost world are evoked in these memorable stories set in the Jewish-Italian community of 1930s Ferrara. A young man's unrequited love; a strange disappearance; a faded hotel; a lonely funfair; the smell of mown hay at the gates of the Jewish Cemetery - these vivid, impressionistic snapshots build a picture of life's brevity and intensity. Part of the sequence including *The Gold-Rimmed Spectacles* and *The Garden of the Finzi-Continis*, and featuring people and places from these novels, *The Smell of Hay* is told with a voice that is by turns intimate, ironic, elegiac and rueful. This new translation contains two pieces, added by Bassani to his earlier collection, which have never appeared in English before. 'Powerful new translations . . . Bassani began as a poet, and McKendrick's redelivery of this taut uncompromising fiction reveals resonance and generosity' Ali Smith 'Giorgio Bassani is one of the great witnesses of this century, and one of its great artists' Guardian Giorgio Bassani (1916-2000) was an Italian poet, novelist and editor. *The Smell of Hay* is the last in a series of six works collected together as *Il romanzo di Ferrara*. Other works in the cycle include *The Garden of the Finzi-Continis*, which received the Viareggio Prize and inspired an Academy Award-winning film adaptation by Vittorio de Sica, *The Gold-Rimmed Spectacles*, and *Within the Walls* (originally published as *Five Stories of Ferrara*), which won the Strega Prize. Jamie McKendrick is a poet and translator. His translations of Bassani's *The Garden of the Finzi-Continis* and *The Gold-Rimmed Spectacles* are already available as Penguin Modern Classics, and he is in the process of translating the rest of the *Romanzo di Ferrara* cycle anew.

The only forensic psychiatrist writing suspense, Keith Ablow is being hailed as the heir to Thomas Harris. Keith Ablow's novels delve deep into that dark and deadly place that Ablow, one of the nation's leading forensic psychiatrists, knows best: the psyche of a killer. Ablow has explored the catacombs of the criminal mind to find out what makes them tick, and he brings that expertise to his new novel, a chilling and emotionally compelling story of the lengths to which one man will go to leave his own life behind. In *Murder Suicide*, Ablow and his alter-ego, Dr. Frank Clevenger, return to take on a murder case like no other. John Snow is a brilliant inventor who has made millions from his genius in aeronautics. He has everything a man could desire: wealth, family, even a beautiful mistress. But he also has a brain disease, a rare form of epilepsy, that threatens his most valuable possession -- his mind. Only one doctor may be able to cure it surgically, but at a terrible cost, one that Snow reveals to no one: Snow will have no memory whatsoever of his past - of its emotional entanglements or its secrets. He will be abandoning everyone he has ever known. But the night before he is scheduled to undergo the operation, he is found near the Massachusetts General Hospital, dead of a gunshot wound. Did he commit suicide, as the police suspect - or was he murdered? Forensic psychiatrist Dr. Frank Clevenger delves into Snow's complex past and tortured relationships to unlock the identity of Snow's killer: Was it the wife who can never forgive what he's done to their child and their marriage, the son who loathes him, the beautiful mistress who loves him so deeply but can never have him, or the business partner intent on taking control of his inventions? Only Frank Clevenger can unlock the door to Snow's startling past. And only Keith Ablow can take readers even further into the mind of a killer.

A Woman of Cairo A&C Black

The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which one can move about and light choreographies that move barely noticeably, creating still lifes in motion. The discourse in this book starts with essays introducing aspects of light spaces and concludes with documents on light spaces by Wolfgang Ranz collected over a period of 30 years showing how these light spaces were regarded in the writings of contemporaries.

Son and daughter of diplomats in Cairo, the gentle Serena Pasha and Mark Holt are good-looking and privileged, growing up in a magical world of champagne breakfasts and midnight picnics at the pyramids. Their lives entwined since childhood, they grow ever closer as adults. Yet Serena's hand has been promised not to Mark, but to his brother, Greg. However, as the Second World War speeds closer to Cairo, a terrible accident gives these young lovers a second chance - and with this chance comes terrible dangers. Egypt is threatened not only by the German army but by nationalist forces within Cairo determined to end the British occupation at any cost. The country torn apart, and with enemies on all sides, Mark and Serena's love is tested to the limit.

Report on Procurement Praeger

Production engineering and management involve a series of planning and control activities in a production system. A production system can be as small as a shop with only one machine or as big as a global operation including many manufacturing plants, distribution centers, and retail locations in multiple continents. The product of a production system can also vary in complexity based on the material used, technology employed, etc. Every product, whether a pencil or an airplane, is produced in a system which depends on good management to be successful. Production management has been at the center of industrial engineering and management science disciplines since the industrial revolution. The tools and techniques of production management have been so successful that they have been adopted to various service industries, as well. The book is intended to be a valuable resource to undergraduate and graduate students interested in the applications of production management under fuzziness. The chapters represent all areas of production management and are organized to reflect the natural order of production management tasks. In all chapters, special attention is given to applicability and wherever possible, numerical examples are presented. While the reader is expected to have a fairly good understanding of the fuzzy logic, the book provides the necessary notation and preliminary knowledge needed in each chapter.

World Bank Technical Paper No. 239. Efficient use and effective conservation of available water resources are priorities for policymakers. This paper reviews World Bank strategies for assisting developing countries in the comprehensive management of their water resources. It focuses mainly on the Bank's role in international water affairs and recommends a more proactive approach to promote dialogue, improve databases and analysis, and assist governments to manage their water resources more effectively. The study suggests that the Bank should strengthen its capacity to respond to requests for assistance in an objective, competent, and effective manner. Sustainable development should be the primary objective for its interventions.

The Peace Treaties Gracewing Publishing

The pages of history are filled with stories of men and women burned at the stake, exiled, and ostracized in the name of religion. Thus Roland Bainton explains the struggle within the Christian Church to achieve religious liberty by telling, in popular biographical style, nine stories of sincere people--both persecutors and persecuted--who took part in the struggle. Bainton's biographies begin with Thomas of Torquemada, instrument of the Roman Catholic Inquisition, and with John Calvin who active in the burning of Michael Servetus. He then covers how such persecution brought about the toleration controversy of the sixteenth century, when SŽbastian Castellio struck his blow for religious liberty, when Hollander David Joris made a mystical approach to tolerance, and when Franciscan Bernardino Ochino believed in the cultivation of the inner life. Finally he concentrates on the champions of religious liberty in the 17th Century: John Milton, Roger Williams and John Locke.
