[Volcano Geo Facts](#) National Geographic Society
 Take A Peek At A Volcano With The Campers. Leveled Phonics Picture Book Reader.

Volcano! Science to the Rescue
 Find out about the different types of volcanoes and how they form. Learn how scientists monitor volcanic activity, and what makes some eruptions so much more destructive than others. Read about some of the most famous volcanic eruptions in history and their effects on the people and environment surrounding them.

[Let's Make a Volcano](#) Geo Facts
 On June 25, 1997, a volcano on the

Caribbean island of Montserrat erupted, spewing hot lava and ash. Linda Daley was washing clothes outside her home in the nearby city of Plymouth when she saw fiery clouds begin to shoot out of the volcano. With clouds of ash and poisonous gases speeding toward her, how would she survive? Eyewitness accounts and incredible photos bring to life the experiences of ordinary people who faced catastrophic danger—and lived to tell their stories. Kids will discover the causes and characteristics of volcanoes, and learn about the scientific advances that now allow earlier warnings of possible eruptions to be issued. Safety tips show young readers what to do if they are ever near a volcanic eruption.

How Mountains Are Made Franklin Watts
 Packed with facts and tantalising anecdotes from experts and bursting with

colour photographs, learn all about volcanoes and earthquakes in this fresh take on the subject that kids with love. It's time to learn everything about volcanoes and earthquakes! Each book in the National Geographic Kids Everything series has more than 100 pictures, an explorer's corner with from-the-field anecdotes and tips, fun facts throughout, maps and infographics, an illustrated diagram, a photo gallery, cool comparisons, a behind-the-scenes photograph, an interactive glossary, and more.

You Wouldn't Want to Live in Pompeii! Collins
 Authentic, leveled content that helps students practice and develop their nonfiction reading skills.

Veronica and the Volcano Carson-Dellosa Publishing
 While reading the temperature of a lava

flow on an active volcano, Joe and Dr. Bea's science skills come in handy to help them outsmart the fiery flow of molten rock. In this adventurous title, readers will learn about different kinds of volcanoes, how they form, and about some of the most destructive eruptions in history. Time For Kids: Volcanoes! Red Rocket Readers

An exhilarating, time-traveling journey to the solar system's strangest and most awe-inspiring volcanoes. Volcanoes are capable of acts of pyrotechnical prowess verging on magic: they spout black magma more fluid than water, create shimmering cities of glass at the bottom of the ocean and frozen lakes of lava on the moon, and can even tip entire planets over. Between lava that melts and reforms the landscape, and noxious volcanic gases that poison the atmosphere, volcanoes have threatened life on Earth countless times in our planet's history. Yet despite their reputation for destruction, volcanoes are inseparable from the creation of our planet. A lively and utterly fascinating guide to these geologic wonders, *Super Volcanoes* revels in the incomparable power of volcanic eruptions past and present, Earthbound and otherwise—and recounts the daring and sometimes death-defying careers of the scientists who study them. Science journalist and volcanologist Robin George Andrews explores how these eruptions reveal secrets about the worlds to which they belong, describing the stunning ways in which volcanoes can sculpt the sea, land, and sky, and even influence the machinery that makes or breaks the existence of life. Walking us through the mechanics of some of the most infamous eruptions on Earth, Andrews outlines what we know about how volcanoes form, erupt, and evolve, as well as what scientists are still trying to puzzle out. How can we better predict when a deadly eruption will occur—and protect communities in the danger zone? Is Earth's system of plate tectonics, unique in the solar system, the best way to forge a planet that supports life? And if life can survive and even thrive in Earth's extreme volcanic environments—superhot, superacidic, and supersaline surroundings previously thought to be completely inhospitable—where else in the universe might we find it? Traveling from Hawai'i, Yellowstone, Tanzania, and the ocean floor to the moon, Venus, and Mars, Andrews illuminates the cutting-edge discoveries and lingering scientific mysteries surrounding these phenomenal forces of nature. Volcano Adventure Time Inc. Books

What do you know about a volcano? When a mountain erupts, it explodes! Hot melted rock, called lava, comes out of its top and flows down the side of the mountain! People need to keep away from real volcanoes, but you can have fun making your own volcano! Reading Level 12/F&P Level J Eruption! The Story of Volcanoes Hachette Children's

In *Volcanoes*, early fluent readers learn about the geologic processes that create volcanoes around the world. Vibrant, full-color photos and carefully leveled text will engage young readers as they learn about these amazing landforms. An infographic illustrates Earth's layers, and an activity offers kids an opportunity to extend discovery. Children can learn more about volcanoes using our safe search engine that provides relevant, age-appropriate websites. *Volcanoes* also features reading tips for teachers and parents, a table of contents, a glossary, and an index. *Volcanoes* is part of Jump!'s *Legendary Landforms* series. National Geographic Kids Everything Volcanoes and Earthquakes Teacher Created Materials

Children experience and explore their favorite parts of nature. The Best Book of Volcanoes Teacher Created Materials

Combines facts with photographs of volcanoes and earthquake-affected regions to introduce readers to such topics as underwater volcanoes and plate tectonics while offering insight into the world-changing power of natural disasters. I Love the Mountains National Academies Press

Get the inside scoop on the world's most explosive mountains! Meet a volcanologist Discover why volcanoes erupt Visit the world's hot spots Learn more than forty fun facts about volcanoes Volcanoes Cherry Lake

The cool story of volcanoes will intrigue kids and adults alike. Hot melted rock from the middle of our planet forces its way up through cracks in the Earth's crusts, exploding violently and sometimes unexpectedly in volcanic fury that can terrorize populations for months, even years. Anne Schreiber's narrative gives readers a little of the science, a little of the history, and a lot of the action. National Geographic photography fires the imagination on dramatic spreads alive with vivid images of lava, ash, molten rock, weird rocks, and steaming seawater. Volcanoes! Random House

Can we have pizza now? Join Mouse and a young explorer as they prepare to climb Mount Etna. Help them list what they'll

need: "walking sticks," "mountain boots," "sunglasses . . ." "Can I have pepperoni?" asks Mouse. From sea to snow, young readers will giggle with delight as they experience the magical world drawn by Frank Viva. Over and over again, the bestselling author of *Young Frank, Architect* will make them experience an unforgettable journey to the top of one of the world's most active volcanoes. Going to the Volcano Topeka Bindery

This book discusses the science behind volcanic eruptions. The chapters examine notable volcanic eruptions in history, explain why volcanoes erupt, and show how scientists are working to understand and predict eruptions. Diagrams, charts, and photos provide opportunities to evaluate and understand the scientific concepts involved. My Mouth is a Volcano Teacher Created Materials

"Readers will learn what it takes to succeed as a volcanologist. The book also explains the necessary educational steps, useful character traits, potential hazards, and daily job tasks related to this career. Sidebars include thought-provoking trivia. Questions in the backmatter ask for text-dependent analysis. Photos, a glossary, and additional resources are included."--*Volcanologist* Astra Publishing House

A volcano could be called a sleeping mountain--that is, until it wakes up! What is it like to witness the eruption of one of nature's majestic time bombs? Young readers can learn what makes volcanoes "tick," and read about some of the most famous eruptions in history. Volcanoes - Why Do They Happen? Speedy Publishing LLC

Teaching children how to manage their thoughts and words without interrupting. Louis always interrupts! All of his thoughts are very important to him, and when he has something to say, his words rumble and grumble in his tummy, they wiggle and jiggle on his tongue and then they push on his teeth, right before he ERUPTS (or interrupts). His mouth is a volcano! But when others begin to interrupt Louis, he learns how to respectfully wait for his turn to talk. *My Mouth Is A Volcano* takes an empathetic approach to the habit of interrupting and teaches children a witty technique to help them manage their rambunctious thoughts and words. Told from Louis' perspective, this story provides parents, teachers, and counselors with an entertaining way to teach children the value of respecting others by listening and waiting for their turn to speak. TIME For Kids Big Book of Where BRYSON'S BOOKS
