EU Foreign Policy, Transitional Justice and Mediation Cambridge University Press

This book offers a unique insight into the role of human rights lawyers in Chinese law and politics. In her extensive account, Eva Pils shows how these practitioners are important as legal advocates for victims of injustice and how bureaucratic systems of control operate to subdue and marginalise them. The book also discusses how human rights lawyers and the social forces they work for and with challenge the system. In conditions where organised political opposition is prohibited, rights lawyers have

begun to articulate and coordinate demands for legal and political change. Drawing on hundreds of anonymised conversations, the book analyses in detail human rights lawyers' legal advocacy in the face of severe institutional limitations and their experiences of repression at the hands of the police and state security apparatus, along with the intellectual, political and moral resources lawyers draw upon to survive and resist. Key concerns include the interaction between the lawyers and their bureaucratic, professional and social environments and the forms and long term political impact of resistance. In addressing these issues, Pils offers a rare evaluative perspective on China's legal and political system, and proposes new ways to assess domestic advocacy's relationship with international human rights and rule of law promotion. This book will be of great interest and use to

students and scholars of law, Chinese studies, socio-legal studies, political studies, international relations, and sociology. It is also of direct value to people working in the fields of human rights advocacy, law, politics, international relations, and journalism.

Trauma and Literature Cambridge University Press

Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved, complex territorial disputes. This volume offers detailed insights into a range of country-perspectives, addressing the historical, legal, structural, regional and multilateral dimensions of these disputes

Contemporary Issues and Challenges BRILL

As a concept, 'trauma' has attracted a great deal of interest in literary studies. A key term in psychoanalytic approaches to literary study, trauma theory represents a critical approach that enables new modes of reading and of listening. It is a leading concept of our time, applicable to individuals, cultures, and nations. This book traces how trauma theory has come to constitute a discrete but influential approach within literary criticism in recent decades. It offers an overview of the genesis and growth of literary trauma theory, recording the evolution of the concept of trauma in relation to literary studies. In twenty-one essays, covering the origins, development, and applications of trauma in literary studies, *Trauma and Literature* addresses the relevance and impact this concept has in the field.

Playing with Fire Routledge

The perfect gift! A specially priced, beautifully designed hardcover edition of *The Joy of the Gospel* with a foreword by Robert Barron and an afterword by James Martin, SJ. "The joy of

the gospel fills the hearts and lives of all who encounter Jesus...

In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church's journey in years to come." – Pope Francis This special edition of Pope Francis's popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for "the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned," the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, "to recognize the traces of God's Spirit in events great and small." Profound in its insight, yet warm and accessible in its tone, *The Joy of the Gospel* is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. Includes a foreword by Robert Barron, author of *Catholicism: A Journey to the Heart of the Faith* and James Martin, SJ, author of *Jesus: A Pilgrimage*

School Bullying in Different Cultures Routledge

Economic, social, and cultural rights are protected by an international covenant, recently amended by the optional protocol which allows individuals to bring rights violations before a UN committee. This book addresses how successfully these rights are implemented and safeguarded worldwide, assessing the key challenges to their protection.

The British Mandate in Palestine Routledge

In a constantly interconnected world communication takes place beyond territorial boundaries, in networks where English works as a lingua franca. The volume explores how ELF is employed in internationally-oriented personal blogs; findings show how bloggers deploy an array of resources to their expressive and interactional aims, combining global and local communicative practices. Implications of findings in ELF and ELT terms are also discussed.

Economic, Social, and Cultural Rights Anthem Press

This book examines the foreign and security policies adopted by China and Japan since the 1970s in their competition over the Senkaku/Diaoyu Islands in the East China Sea. It charts the development of a dispute that has become a potential flashpoint for conflict between the two countries. The book explains that while increasing nationalism in both China and Japan helps to fuel and sustain the dispute, a key factor is that the leaderships in both countries find competition over the islands to be a convenient vehicle supporting their wider approach to foreign and security policy, which is becoming increasingly assertive and potentially belligerent.

Economic and Political Implications Prabhat Prakashan

This landmark volume offers a collection of conceptual papers and data-based research studies that investigate the dynamics of language learning motivation from a complex dynamic systems perspective. The chapters seek to answer the question of how we can understand motivation if we perceive it as a continuously changing and evolving entity rather than a fixed learner trait.

The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans-Pacific Partnership (TPP). The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the entire Asia-Pacific. As of now, it does not include China and India, the two largest emerging markets and regional economies. The TPP has generated controversy for its excessive emphasis on trade issues, which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India might walk divergent paths and trade and regional integration in Asia-Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade.

Female Religiosities in a Transnational Order Routledge

The onset of the 2004 EU enlargement witnessed a number of predictions being made about the approaches, capacity and ability of Central European judges who were soon to join the Union. Optimistic voices, foreshadowing the deep transformative power that Europe was bound to exercise with respect to the judicial mentality and practice in the new Member States, were intertwined with gloomy pictures of post-Communist limited formalism and mechanical jurisprudence that could not be reformed, which were likely to undermine the very foundations of mutual trust and recognition the judicial system of the Union is built upon. Ten years later, this volume revisits these predictions and critically assesses the evolution of Central European judicial mentality, institutions and constitutionality under the influence of the EU membership. Comparatively evaluating the situation in a number of Central European Member States in their socio-legal contexts, notably Poland, the Czech Republic, Slovakia, Hungary, Slovenia, Bulgaria and Romania, the volume offers unique insights into the process of (non) Europeanisation of national legal systems and cultures.

Broader Perspectives on Motion Event Descriptions

Routledge

This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism, defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this book takes

disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on "disinformation." Disorder and the Disinformation Society offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on of information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend, but also distort, the development of social movements.

This book features 15 country reports on the patent enforcement practice of the world's most litigated countries in Europe, Asia and the Americas. Litigation strategies for both right owners and alleged infringers are explained against the background of case law on: types of action, standing to sue, jurisdiction, obtaining evidence, provisional and final measures, trial practice, types of infringement, remedies and counterclaims, costs and issues of retrial, threats and wrongful enforcement. Special chapters cover the Trade-Related Aspects of Intellectual Property Agreement provisions on enforcement, enforcement issues in the European Community, international cross-border litigation and border measures. The reports are written by patent practitioners or academic experts in the field, and the homogenous structure of the country reports allows for an easy identification of best

practices and strategic considerations on the choice of jurisdiction.

Supplier Relationship Management enables organizations to secure vast value from their supply base by determining the suppliers that are important or hold potential and, based upon what makes them important or even strategic, putting in place interventions unique to each supplier to unlock real tangible benefits. This second edition delivers a framework of resources for anyone who manages or interfaces with important suppliers, for contract management, to understand and manage the supply chain or to establish joint, collaborative relationships with the critical few strategic suppliers who can help bring new competitive advantage. A proven approach for supply base segmentation is included, together with tools and approaches for supplier performance measurement and driving improvements. Written by an award-winning author and leading practitioner in the field, the fully revised second edition of Supplier Relationship Management clarifies links between procurement and supply chain management, and explains how 'The Orchestra of SRM®' approach helps design a highly effective SRM program that will give the greatest return for our efforts. "This book is an ideal companion to Category Management in Purchasing and Negotiation for Procurement Professionals, also published by Kogan Page. Used together, these books provide a complete and powerful strategic purchasing toolkit."

State Formation After Civil War Routledge

This book documents and highlights the Deobandi dimension of extremism and its implications for faith-based violence and terrorism. This dimension of radical Islam remains largely ignored or misunderstood in mainstream media and academic scholarship. The book addresses this gap. It also covers the Deobandi diaspora in the West and other countries and the role of its radical elements in transnational incidents of violence and terrorism. The specific identification of the radical Deobandi and Salafi identity of militants is useful to isolate them from the majority of peaceful Sunni and Shia Muslims. Such identification provides direction to governmental resources so they focus on those outfits, mosques, madrassas, charities, media and social medial channels that are associated with these ideologies. This book comes along at a time when there is a dire need for alternative and contextual discourses on terrorism.

Democratic Sustainability in a New Era of Localism Springer

The British Mandate over Palestine began just 100 years ago, in July 1920, when Sir Herbert Samuel, the first British High Commissioner to Palestine, took his seat at Government House, Jerusalem. The chapters here analyse a wide cross-section of the conflicting issues --social, political and strategical--that attended British colonial rule over the country, from 1920 to 1948. This anthology contains contributions by several of the most respected Israeli scholars in the field - Arab, Druze and Jewish. It is divided into three sections, covering the differing perspectives of the main 'actors' in the 'Palestine Triangle': the British, the Arabs and the Zionists. The concluding chapter identifies a pattern of seven counterproductive negotiating behaviours that

explain the repeated failure of the parties to agree upon any of the proposals for an Arab-Zionist peace in Mandated Palestine. The volume is a modern review of the British Mandate in Palestine from different perspectives, which makes it a valuable addition to the field. It is a key resource for students and scholars interested in international relations, history of the Middle East, Palestine and Israel.

Fostering freedom online: the role of Internet intermediaries

Cambridge University Press

Internet intermediaries play a unique role in linking authors of content and audiences. They may either protect or jeopardize end user rights to free expression, given their role in capturing, storing, searching, sharing, transferring and processing large amounts of information, data and user-generated content. This research aims to identify principles for good practices and processes that are consistent with international standards for free expression that Internet intermediaries may follow in order to protect the human rights of end users online.

Useful Rivalry Bloomsbury Publishing

This volume offers a unique combination of interdisciplinary research and a comprehensive overview of motion and space studies from a semantic typological perspective. The chapters present cutting-edge research covering central topics such as the status of semantic components in motion event descriptions and their role in typological variation, the function of linguistic multimodal structures for the codification of motion, the diachronic evolution of motion expressions and its effects on motion typologies, the correspondences between physical and non-physical (fictive, metaphorical) motion, and the impact of

contexts and genres on the characterization and interpretation of motion events. These issues are examined from a theoretical and applied linguistic perspective (L1-L2 acquisition, translation/interpreting). The analyses make use of diachronic and synchronic data collected by a range of methods (elicitation, experimentation, and corpus research) in more than fifteen languages. All in all, this book will be of great value to scholars and students interested in the expression of motion and space across languages.

Central European Judges Under the European Influence

Bloomsbury Publishing

School bullying is widely recognized as an international problem, but publications have focussed on the Western tradition of research. A long tradition of research in Japan and South Korea, and more recently in mainland China and Hong Kong, has had much less exposure. There are important and interesting differences in the nature of school bullying in Eastern and Western countries, as the first two parts of this book demonstrate. The third part examines possible reasons for these differences - methodological issues, school systems, societal values and linguistic issues. The final part looks at the implications for interventions to reduce school bullying and what we can learn from experiences in other countries. This is the first volume to bring together these perspectives on school bullying from a range of Eastern as well as Western countries.

Thomas Keneally's Career and the Literary Machine Rowman & Littlefield

Human languages exhibit fascinating commonalities and variations in the ways they describe motion events. In this

volume, the contributors present their research results concerning motion event descriptions in the languages that they investigate. The volume features new proposals based on a broad range of data involving different kinds of motion events previously understudied, such as caused motion (e.g., kick a ball across) and even visual motion (e.g., look into a hole). Special attention is also paid to deixis, a hitherto neglected aspect of motion event descriptions. A wide range of languages is examined, including those spoken in Europe, Africa, and Asia. The results provide new insights into the patterns languages deploy

to represent motion events. This volume will appeal to anyone interested in language universals and typology, as well as the relationship between language and thought.
