"In a study that combines archival research, a firm grounding in the historical context, biographical analysis, and sustained attention to specific works of art, Amy Lyford provides an account of Isamu Noguchi's work between 1930 and 1950 and situates him among other artists who found it necessary to negotiate the issues of race and national identity. In particular, Lyford explores Noguchi's sense of his art as a form of social activism and a means of struggling against stereotypes of race, ethnicity, and national identity. Ultimately, the aesthetics and rhetoric of American modernism in this period both energized Noguchi's artistic production and constrained his public reputation"--

A luminous, bittersweet novel of India and the American midwest, immigrants and their first-generation children, and the power of cooking to bridge the gulfs between them When Mala and Ronak learn that their mother has only a few months to live, they are reluctantly pulled back into the midwestern world of their Indian immigrant parents--a diaspora of prosperous doctors and engineers who have successfully managed to keep faith with the old world while claiming the prizes of the new. More successfully than their children--equally ill at ease with Holi and Christmas, bhaji and barbecue, they are mysteries to their parents and themselves. In the short time between diagnosis and deterioration, Mala sets about learning everything she can about her mother's art of Indian cooking. Perfecting the naan and the raita, the two confront their deepest divisions and failures and learn to speak as well as cook. But when Ronak hits upon the idea of selling their experience as a book and a TV documentary, India and America, immigrant and native-born are torn as never before. With grace, acuity, and wry compassion, Amit Majmudar has written anew the immigrant experience, the clash of cultures, the conflicts of assimilation, and, most poignantly, the tangled ties between generations in The Abundance.
