## LIZETH CANTRELL

[A Long Walk to School](#) Springer Science & Business Media  
 Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate - from advantages to complications - in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.  
[Handbook of Research on Environmental Education Strategies for Addressing Climate Change and Sustainability](#) Routledge  
 This book comprises high-quality refereed research papers presented at the 3rd International Conference on Artificial Intelligence and Logistics Engineering (ICAILE2023), held in Wuhan, China, on March 11-12, 2023, organized jointly by Wuhan University of Technology, Nanning University, the National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute", Huazhong University of Science and Technology, the Polish Operational and Systems Society, Wuhan Technology and Business University, and the International Research Association of Modern Education and Computer Science. The topics discussed in the book include state-of-the-art papers in artificial intelligence and logistics engineering. It is an excellent source of references for researchers, graduate students, engineers, management practitioners, and undergraduate students interested in artificial intelligence and its applications in logistics engineering.  
*Twenty First Century Needs in the Secondary School Curriculum: Bangladesh Perspective* Springer Nature

This must-have handbook offers a comprehensive survey of the field. It reviews the language education policies of Asia, encompassing 30 countries sub-divided by regions, namely East, Southeast, South and Central Asia, and considers the extent to which these are being implemented and with what effect. The most recent iteration of language education policies of each of the countries is described and the impact and potential consequence of any change is critically considered. Each country chapter provides a historical overview of the languages in use and language education policies, examines the ideologies underpinning the language choices, and includes an account of the debates and controversies surrounding language and language education policies, before concluding with some predictions for the future.

### Engaging in Educational Research BRILL

This book, written by authors representing 12 countries and five continents, is a collection of international perspectives on distance learning and distance learning implementations in higher education. The perspectives are presented in the form of practical case studies of distance learning implementations, research studies on teaching and learning in distance learning environments, and conceptual and theoretical frameworks for designing and developing distance learning tools, courses and programs. The book will appeal to distance learning practitioners, researchers, and higher education administrators. To address the different needs and interests of audience members, the book is organized into five sections: Distance Education Management, Distance Education and Teacher Development, Distance Learning Pedagogy, Distance Learning Students, and Distance Learning Educational Tools.

### Secondary School English Education in Asia IGI Global

Due to the increasing trend of international interest in education for climate change and the environment, there has been an increase of research in the area. There is a current question on what the best methods and tools are for integrating climate change education and sustainability into school programs. These educational methods can create the development of effective responses, attitudes, and behaviors to adapt to climate change. Empirical and conceptual models must be explored to help those interested in learning and teaching environmental education and climate change and adding it to modern school curriculum. The Handbook of Research on Environmental Education Strategies for Addressing Climate Change and Sustainability produces innovative approaches, methods, and ideas in education for climate change, environment strategies, and sustainability along with the development of curriculum and strategies for sustainable development goals. The chapters encompass multiple disciplines such as geology, geography, remote sensing, geographic information systems, environmental science, and environmental

engineering. This book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in educational strategies and curriculum for climate change and sustainability.

### Advances in Artificial Systems for Logistics Engineering III Multilingual Matters

The position of technology education in the school curriculum is a topic of continuous discussions. This book offers a number of research-based contributions to that discussion. A number of aspects have been identified that are related to the way technology education can be embedded in the curriculum: The historical development of the subject, its disciplinary character, its relation to other parts of the curriculum, and in particular with science and language education, the relation between the formal school curriculum and informal learning, forms of progression over the grades, and its contribution to citizenship, forms of literacy and ethics. The final chapter deals with specific issues for developing countries. The book can support decision making on the curriculum and the development of technology education as a part of that by providing theoretical and empirical insights on this topic.

### Teacher Education in the Global Era Routledge

Businesses, philanthropies and non-profit entities are increasingly successful in capturing public funds to support private provision of schooling in developed and developing countries. Coupled with market-based reforms that include weak regulation, control over workforces, standardization of processes and economies of scale, private provision of schooling is often seen to be convenient for both public authorities and businesses. This book examines how the public subsidization of these forms of private education affects quality, equality and the realization of human rights. With original research from leading experts, The State, Business and Education sheds light on the privatization of education in fragile circumstances. It illustrates the ways in which private actors have expanded their involvement in education as a business, and shows the influence of policy borrowing on the spread of for-profit education. Case studies from Argentina, Bangladesh, Brazil, China, India and Syrian refugee camps illustrate the ways in which private actors have expanded their involvement in education as a business. This book will be of interest not only to academics and students of international and comparative education, but also to education development professionals in both the private and public sectors, with its empirical assessment of case studies, and careful consideration of the lessons to be learned from each.

### UNESCO Publishing

This book offers a thorough and comprehensive review of the lessons learnt from the award-winning 'English in Action' English

language teacher development programme, which ran in government primary and secondary schools across Bangladesh from 2008 to 2017. Over the course of nine years the programme involved 51,000 teachers and 20 million school students, demonstrably raising standards of teachers' classroom practice and students' English language attainment, and won the British Council ELTON Award for Local innovation (2013) and Times Higher Education Award for International Impact (2107). The sixteen chapters explore the programme in detail, looking at both the successes and the challenges encountered throughout its course, including the strategies used to address the challenges. The key innovative factors of the programme include: · a positive choice to build on the existing context, such as the lives and experiences of local teachers and the demands of a nationally determined curriculum; · teacher learning taking place in the teachers' own classrooms; · a focus on learning the 'how' of communicative language teaching through reflective practice and peer support; · the use - within a carefully constructed pedagogy - of affordable, readily-available mobile phone technology; · the use of mediated authentic video · a model of teacher development at very large scale that provided a successful alternative to the 'cascade' model; · a partnership with government institutions to ensure that improved practices are maintained beyond the life of the Programme.

*Creativity and Innovations in ELT Materials Development* Anchor Academic Publishing

This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-elitisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

*Hope Not Complacency* Edward Elgar Publishing

Handbook of Research on Environmental Education Strategies for Addressing Climate Change and Sustainability | GI Global Bangladesh Gender Equality Diagnostic of Selected Sectors Routledge

This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

*Ninth National Geographical Conference, University of Rajshahi, 24-26 November 2000* Handbook of Research on Environmental Education Strategies for Addressing Climate Change and Sustainability

The literacy is the most potent factor so far as the social characteristic having deep bearing on the development of overall personalities of an individual is concerned. The competence with knowledge not only makes us feel as responsible citizens, it also *Decentralization of Educational Management* Springer Nature Review of the progress made on the Education for All program undertaken by the Bangladesh government.

**International Perspectives of Distance Learning in Higher Education** BRILL

This book discusses the perspectives and practices of teacher education programs in order to shed new light on the national priorities, policies, curriculum inputs, delivery mechanisms, challenges and future trends in 20 selected countries. It examines and compares the complexity of teacher education in international contexts, providing insights into educational change and reform in emerging democracies. Further, it includes cases from various countries that reflect how the profession is moving forward. In order to deepen readers' understanding of teacher training and the challenges posed by globalization, the book concludes with a discussion of theoretical perspectives applied to teacher education, and with recommendations for new directions. Given its scope, the book is an essential read for teacher educators, students, and researchers working in the field of education.

*Encyclopaedia of Education in South Asia* Symposium Books Ltd Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries--- Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

**Mapping of Multilingual Education Programs in Bangladesh** University Press Limited

Over the last two decades, Bangladesh has made progress in women's participation in the labor force, gender parity in primary education, and women's political representation. Areas of concern include the high prevalence of violence against women, obstacles to women's access to resources and assets, unequal terms of their labor engagement, and impact of their overwhelming responsibility for care work. The Government of Bangladesh has made policy commitments toward gender equality and established an institutional framework to fulfill these. This publication intends to support the government in its attempt to address persisting gender inequalities and gaps through a multisector approach across policies, programs, and projects. It provides insights into gender issues in urban; transport; energy; and skills, vocational, and tertiary education, and gives suggestions for strengthening gender mainstreaming in projects.

**Challenges in Language Testing Around the World** Springer The involvement of private actors in education is not new yet in the last decade critical issues have arisen that demand close scrutiny. This volume explores emerging forms of the private through case studies from Africa, South Asia and South East Asia and makes three related observations. First, what is new about these manifestations is their scale, scope and penetration into almost all aspects of the education endeavour - from the administrative apparatus to policymaking, and from formal provision in education settings to out-of-school activities, such as private tutoring. Second, what is particularly controversial about

these developments is how education itself is being recast; as a sector it is increasingly being opened up to profit-making and trade, and to agenda-setting by private, commercial interests. Third, the learner is increasingly conceptualised as a consumer, and education a consumer good. The case studies therefore enable us to see more clearly how different forms of the private in education alter what is at stake, for whom, and with what outcomes, and the consequences for individuals and societies. In turn, these raise the very important question about what they mean for our conceptualisations of education, learning and teaching, on the one hand, and for education as a site and means for emancipation, on the other. These are profound social justice concerns, and ones that make this volume distinctive. This book sets out to address these hard, but urgent, questions and will be of interest to academics and students of education, education researchers, government personnel and policymakers.

*Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the People's Republic of Bangladesh for the Second Primary Education Sector Project* Asian Development Bank

Twenty-five years ago there was increasing optimism in policy, curriculum and research about the contribution that technology education might make to increased technological literacy in schools and the wider population. That optimism continues, although the status of technology as a learning area remains fragile in many places. This edited book is offered as a platform from which to continue discussions about how technology education might progress into the future, and how the potential of technology education to be truly relevant and valued in school learning can be achieved. The book results from a collaboration between leading academics in the field, the wider group of authors having had input into each of the chapters. Through the development of a deep understanding of technology, based on a thoughtful philosophy, pathways are discussed to facilitate student learning opportunities in technology education.

Consideration is given to the purpose(s) of technology education and how this plays out in curriculum, pedagogies, and assessment. Key dimensions, including design, critique, students' cultural capital are also explored, as are the role and place of political persuasion, professional organisations, and research that connects with practice. The discussion in the book leads to a conclusion that technology education has both an ethical and moral responsibility to support imaginings that sustain people and communities in harmony and for the well being of the broader ecological and social environment.

*Positioning Technology Education in the Curriculum* Bloomsbury Publishing

Each volume in the 7-volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, Arab States, and Sub-Saharan Africa. The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program.

*Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the People's Republic of Bangladesh for the Secondary Education Sector Improvement Project* Springer Nature

This book reflects the paradigm shift now manifesting in Bangladesh's education system by highlighting recent empirical research. It shares essential insights by presenting research conducted on diverse aspects of current day education in Bangladesh, including policy and governance, equity, access and participation, curriculum and pedagogy, assessment, and education programs and projects run by NGOs. Further, it offers a platform for these unique studies to be showcased and disseminated to scholars and researchers from developing and developed countries alike, and represents a unique reference resource for the education research community in Bangladesh, Asia and all over the world. With Foreword from Professor Serajul Islam Choudhury.
