<p>bilingual and ESL education. The text covers the foundations of bilingual and ESL education (who the students are, what the policies are and have been, the role and development of language and culture) and provides a strong focus on what the teacher needs to know in a bilingual classroom (such as instruction strategies, teaching in content areas, assessment, and working with students</p>	<p>with special needs). Woven throughout the text are quotes from bilingual and ESL students and teachers that illuminate the bilingual/ESL learning and teaching experience. <i>Data Communicatio ns & Network World Health Organization With exceptionally clear writing, Lathi takes students step by step through a history of communicatio ns systems from elementary</i></p>	<p>signal analysis to advanced concepts in communicatio ns theory. This book presents the advancements made in applied metrology in the field of Urban

Drainage and Storm water Management over the past two decades in scientific research as well as in practical applications. Given the broadness of this subject (measuring principles, uncertainty in data, data validation, data storage and communication, design, maintenance and management of monitoring networks, technical details of sensor technology), the focus is on

<p>water quantity and a sound metrological basis. The book offers common ground for academics and practitioners when setting up monitoring projects in urban drainage and storm water management. This will enable an easier exchange of results so as to allow for a faster scientific progress in the field. A second, but equally important goal, is to allow</p>	<p>practitioners access to scientific developments and gained experience when it comes to monitoring urban drainage and storm water systems. In-depth descriptions of international case studies covering all aspects discussed in the book are presented, along with self-training exercises and codes available for readers on a companion website. <i>Fundamentals of Nursing (Book Only)</i></p>	<p>Springer Covers the most frequently asked and tested points on the pediatric board exam. Each chapter offers a quick review of specific diseases and conditions clinicians need to know during the patient encounter. Easy-to-use and comprehensive, clinicians will find this guide to be the ideal final resource needed before taking the pediatric board exam.</p>

The Idea of Europe CLE International
 La communication publique reste largement méconnue des médias et du grand public. Pourtant, elle a une influence directe et indirecte sur la vie de chacun. La communication publique, émise par l'État et les collectivités territoriales, constitue la plus grande part de la communication non

marchande.
 Outre le fait d'assurer l'information nécessaire au fonctionnement des services publics, elle vise à rendre compte des politiques publiques. Les actions de communication publique indiquent les comportements à suivre, éclairent les habitants d'un territoire sur les projets et les chantiers, informent sur les services rendus...
 Illustrée de nombreux exemples, cette 2e édition est

entièrement
revue,
notamment
suite aux
réformes des
régions et
collectivités
territoriales.

 Over the last decade, Africa has taken a central position in the search for the timing and mechanisms leading to modern human origins, and the rich archaeological and human paleontological record of North Africa is critical to this search. In this volume, we bring together new research into the archaeology, human paleontology, chronology, and environmental context of modern human origins in North Africa. The result is a volume that better integrates the North African record into the modern human origins debate and at the same time highlights the research questions that are currently the focus of continued work in the area.

International Sales and the Middleman
 Springer
 This book is about managing dealers, distributors and agents in international markets - an essential guide to anyone doing business globally. If you want or need to expand business through an international network of resellers, then this book is well worth an hour or two of your time.

International Sales and the Middleman
 provides a down-to-earth, practical, and insightful guide that will enable export sales managers to build - or

rebuild - a distribution network from scratch. It provides detailed advice on selection, negotiation, initiation, training (where appropriate), motivating, development, and managing overseas agents to ensure the maximum sales result. It also includes advice on local customs. It is well known that almost all international sales have to pass through middlemen at some stage or

other. But how do you go about finding the right agents, what sort of arrangements should you negotiate, and on what terms - and most important of all, how do you manage and motivate the agents once you have them...? Whether you are a new manager or one who already has the right team in place, this book will show you how to improve performance and motivate both agents and customers

worldwide - with spectacular results.

"Yellow Peril" Focus The Idea of Europe finds George Steiner reckoning with Europe from a number of different

angles. "Europe,†? he writes, "is the place where Goethe's garden almost borders on Buchenwald, where the house of Corneille abuts on the market-place in which Joan of Arc was hideously done to death.†? It is, in other words, a continent rich with contradiction, whose many tensions—cultural, social, political, economic, and religious—have for centuries conspired to pull it apart,

even as it has become more and more unified. But what lies ahead for a continent whose borders are growing and economic might is strengthening, even as its cultural identity recedes? A continent where, in Steiner's words, "young Englishmen choose to rank David Beckham high above Shakespeare and Darwin in their list of national treasures†? This is the trajectory that

Steiner explores so brilliantly in *The Idea of Europe*.

This book

brings

together the

theory and

practice of

anti-

approaches to

social science

research. It is

a work that will have a place in the classroom, as well as on the desks of researchers in agencies, governments, and private consulting practice. The first section of the book is devoted to the ontological and epistemological considerations involved in such research, including theorizing the self of the researcher. The second section of the book offers exemplars across a range of methodologies, including institutional ethnography, narrative autobiography, storytelling and Indigenous research, and participatory action research. This is a unique text in that it describes both theoretical foundations and practical applications, and because all of the featured researchers occupy marginalized locations. It is also firmly anchored in the Canadian context.
