OCONNOR MATHIAS

Digital Finance in Europe: Law, Regulation, and Governance OECD Publishing
 International trade is highly affected by mycotoxin contaminations, which result in an annual 5% to 10% loss of global crop production. In the last decade, the mycotoxin scenario has been complicated by the progressive understanding—alongside emerging mycotoxins—of the parallel presence of modified (masked and conjugated) forms, in addition to the previously free known ones. The present Toxins Special Issue presents original research papers and reviews that deal with the fates of all these forms of mycotoxins with respect to aspects that cover traditional and industrial food processing, yearly grain campaign peculiar conditions and management, novel analytical solutions, consumer exposure, and biomarker-assessment directions. It gives a taste of an exciting scientific field that has several implications for our daily life because (i) it covers our diet practically and from every point of view, (ii) it intersects with our culinary uses and customs, but also industrial production processes, and (iii) it involves a careful evaluation of costs and benefits and a constant and continuous improvement of mycotoxin mitigation strategies.

This book is designed to help decision makers iden

Postharvest Handling Verso Books

For courses in Introductory Public Relations. Cutlip & Center offers students the gold standard in public relations, providing the most up-to-date reference in the market. In the new edition, Glen Broom continues the work of Cutlip and Center by providing the most up-to-date reference for students.

Government Guarantees IWA Publishing

This book presents the latest research perspectives on how the Industry 4.0 paradigm is challenging the process of technological and structural change and how the diversification of the economy affects structural transformation. It also explores the impact of fast-growing technologies on the transformation of socioeconomic and environmental systems, and asks whether structural and technological change can generate sustainable economic growth and employment. Further, the book presents the basic innovations (new technologies, materials, energy, etc) and industrial policies that can lead to such a structural change.

Trends and Applications in Information Systems and Technologies Charles C Thomas Publisher

A discipline is a fusion of financial theory (with its origins in economics) and financial analysis (which is linked to accounting). Explores the underlying theories of corporate finance and examines the application of these theories in the Southern African context.

Lessons from NAFTA for Latin America and the Caribbean Springer

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 194 countries and 14 territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide.

Water Utility Benchmarking Academic Press

Financial ManagementFinancial ManagementJuta Academic

Artificial Hells UNESCO Publishing

A comprehensive report on OECD activities in 2004-2005.

Legacies of slavery MDPI

Presents an introduction to the processes of portfolio management, discussing how to identify

business goals, develop strategy, evaluate environmental and risk factors and successfully complete project objectives. Original.

COVID-19 and Social Sciences OUP Southern Africa

This special volume collects contributions from leading scholars who scrutinize the challenges digital finance presents for the EU internal market and financial market regulation from multiple public policy perspectives. Author contributions aim to

Sustainable Business Models Springer Nature

The purpose of this book is to provide a framework for understanding the complex and multifaceted nature of the factors that affect destination competitiveness. It provides guidance on how to create successful destinations by developing and presenting a conceptual model of destination competitiveness that recognizes the importance of sustainability for long-term success. The book is both theoretically sound and managerially useful. It is intended to appeal to both academic researchers and industry professionals and practitioners. Anyone with an interest in the enhancement of a destination's competitiveness from nations to small towns or regions will find this book invaluable.

Entrepreneurship and Structural Change in the New Digital Landscape Financial

ManagementFinancial Management

The sixth edition of Guide to Business Law offers a clear and practical introduction to the basic principles of commercial law. It covers a broad spectrum of subject areas within commercial law, in a concise, simple and straightforward manner. The text provides numerous examples and case illustrations, and a rich and diverse collection of teaching and learning resources, in order to support readers to understand and apply legal principles, to assess their progress, and to successfully master their learning.

Advances in Production Management Systems. The Path to Digital Transformation and Innovation of Production Management Systems Springer Nature

This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. Augmented Reality in Tourism, Museums and Heritage: A New Technology to Inform and Entertain is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

Industry 4.0 Cambridge University Press

"The new book Mapping Ecosystem Services provides a comprehensive collection of theories, methods and practical applications of ecosystem services (ES) mapping, for the first time bringing together valuable knowledge and techniques from leading international experts in the field." (www.eurekalert.org).

Discovering the Path to Unlimited Growth CRC Press

This book is a printed edition of the Special Issue "Sustainable Business Models" that was published in Sustainability

Mineral Law Review and Herald Pub Assoc

This book is composed of a selection of articles from The 2021 World Conference on Information Systems and Technologies (WorldCIST'21), held online between 30 and 31 of March and 1 and 2 of April 2021 at Hangra de Heroismo, Terceira Island, Azores, Portugal. WorldCIST is a global forum for

researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern information systems and technologies research, together with their technological development and applications. The main topics covered are: A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; N) Technologies for Biomedical Applications.

The Curve Ahead Pearson/Education

By examining the stories of companies like LoJack, MySpace and Groupon, an expert in Strategic Management describes how organizations can sustain high-growth through a repeatable process for innovation without succumbing to the growth hump. 30,000 first printing.

Information Technology and Mobile Communication Stanford University Press

Explores the underlying theories of finance, and examines the practical application of these theories in a southern African environment. The third edition has been restructured and includes additional chapters. Emphasis is placed on the use of computer spreadsheets for solving financial problems.

Environmental Accounting Infinite Study

Postharvest Handling: A Systems Approach introduces a new concept in the handling of fresh fruits and vegetable. Traditional treatments have been either physiologically based with an emphasis on

biological tissue or technologically based with an emphasis on storage and handling. This book integrates all processes from production practices through consumer consumption with an emphasis on understanding market forces and providing fresh product that meets consumer expectations. Postharvest physiologists and technologists across the disciplines of agricultural economics, agricultural engineering, food science and horticulture along with handlers of minimally-processed products within the fresh produce fruit and vegetable processing industries will find this to be an invaluable source of information. Uses a systems approach that provides a unique perspective on the handling of fresh fruits and vegetables Designed with the applied perspective to complement the more basic perspectives provided in other treatments Provides the integrated, interdisciplinary perspective needed in research to improve the quality of fresh and minimally processed products Emphasizes that the design of handling systems should be market-driven rather than concentrating on narrow specifics

A Handbook for Correctional Psychologists Springer

Digitization promises to reshape fiscal policy by transforming how governments collect, process, share, and act on information. More and higher-quality information can improve not only policy design for tax and spending, but also systems for their management, including tax administration and compliance, delivery of public services, administration of social programs, public financial management, and more. Countries must chart their own paths to effectively balance the potential benefits against the risks and challenges, including institutional and capacity constraints, privacy concerns, and new avenues for fraud and evasion. Support for this book and the conference on which it is based was provided by the Bill and Melinda Gates Foundation "Click Download on the top right corner for your free copy..."
