HARVEY TRISTEN

OECD Skills Outlook 2015 Youth, Skills and Employability OECD Publishing

This book examines recent changes in media education and in young people's lives, and provides an accessible set of principles on which the media curriculum should be based, with a clear rationale for pedagogic practice. David Buckingham is one of the leading international experts in the field - he has more than twenty years' experience in media education as a teacher and researcher. This book takes account of recent changes both in the media and in young people's lives, and provides an accessible and cogent set of principles on which the media curriculum should be based. Introduces the aims and methods of media education or 'media literacy'. Includes descriptions of teaching strategies and summaries of relevant research on classroom practice. Covers issues relating to contemporary social, political and technological developments.

Essay on National Education BRILL

In this book the authors have conducted extensive research and describe what makes a successful school and how this varies in different countries. The book follows the progress of a cohort of 7-year-old children through their schools over a two-year period. It covers schools in the US, Canada, Hong Kong, Taiwan, Australia, the UK, Norway, the Netherlands, and Ireland and: *draw together what it is that the most and least effective schools do in each country *pinpoints what makes 'effective teaching' across the globe *analyses which effectiveness-producing school and teaching factors appear to be the same and which are context specific *discusses how educational policies can be used to generate World Class Schools and which new blends of practice can, or should be used The existing literature based upon the comparison of the educational achievements of different countries is inadequate. This unique study provides a rich picture of the processes of the education systems of different countries which will appeal to practitioners and policy makers.

Bulletin administratif du Ministère de l'instruction publique Springer Science & Business Media

This work examines aspects of a religious education program published by Paulist Press in the 1960s and 1970s, the Come to the Father series. This is the only study of this major catechetical series. The author examines the interpretation of the Bible in a confessional setting, and explores the history of the modern catechetical renewal in Canada and beyond. The author also critiques the way in which the Come to the Father series exploits the reader's experience in its interpretation of the Bible.

Mathematisation and Demathematisation OUP Oxford

On the basis of direct personal observation in the classroom, systematically gathered data, and extensive reading in primary sources, the author provides a rich description of how a society can be gradually transformed by the educational process in its schools. He then relates this process to the problems of the advanced industrial world. Originally published in 1980. The Princeton Legacy

Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Les Livres de l'année-Biblio OECD Publishing

"C'est une belle histoire que nous avons vécue, de 1961 à 1975, dans ce petit village où nous avons choisi de passer notre retraite et où nous vivions comme au XIXe (voire XVIIIe) siècle, à l'heure du château... épisode curieux qu'aucun de nos collègues des alentours n'a connu. Ce sont donc des "petites histoires d'ici" que nous avons choisi de vous raconter. Bien sûr, nous avons des tas d'autres souvenirs ailleurs... pas très loin... qui nous sont particulièrement chers! En ville, de la Risle à la Charentonne, à nouveau à la campagne, dans le Lieuvin où nous avons gardé des liens si solides que nous nous retrouvons encore régulièrement aujourd'hui autour d'une table bien garnie où nous glorifions les vertus du trou normand. Nous avons connu des bons moments partout, et nous nous sommes efforcés d'oublier les mauvais." Un recueil de petites histoires, d'anecdotes souvent piquantes qui firent le quotidien d'un couple d'instituteurs dans un village typique de la campagne française des années soixante. Ici Bébert côtoie allégrement Louissette, dans une atmosphère qui sent bon l'herbe séchée et la confiture maison. Une bonne tranche de vie rurale qui rappellera à certains le bon temps et donnera à d'autres une idée de ce qu'était le bonheur à l'époque: un mélange de simplicité, de camaraderie et de naturel.

Words and Worlds Guilford Press

This book, based on original research, explores the challenges and opportunities in multigrade teaching in Colombia, England, Ghana, Malawi, Nepal, Sri Lanka, Sudan, Peru, Turks and Caicos Islands, and Vietnam. It raises awareness among policymakers and practitioners in education of the realities of multigrade classes. Moreover, the book explores the implications for teachers, teacher educators, curriculum developers, and educational planners.

Media Education Springer

In this volume scholars from diverse strands of research have contributed their perspectives on a process of mathematisation, which renders social, economical or political relationships increasingly formal. At the same time, mathematical skills lose their importance as they become replaced by diverse technological tools; a process of demathematisation takes place. The computerization of financial transactions, calculation of taxes and fees, comparison of prices as well as orientation by means of GPS, visualisation of complex data and electronic voting systems—all these mathematical technologies increasingly penetrate the lifestyle of consumers. What are the perils and promises of this development? Who is in charge, who is affected, who is excluded? A common concern of all the authors of this volume is an attempt to draw attention to issues related to the formatting power of mathematics and to its role as implicit knowledge, which results in a process of demathematisation.

This process, having once received considerable attention, is now threatened to be eclipsed by the proliferation of a discussion of school mathematics, which shows a tendency of cutting off its own philosophical and political roots. Taken together, the contributions reveal a rather complex picture: They draw attention to the importance of clarifying epistemological, societal and ideological issues as a prerequisite for a discussion of curriculum.

Farmer Education and Farm Efficiency University Press of America

"This volume brings together a number of papers presented at the international conference on "Specific Methodologies in Educational Alternatives" held in June 2016, at the Bistrița University Extension of the Educational Sciences Department of Babeș-Bolyai University, Cluj-Napoca, Romania. The event served to promote the most recent theoretical and practical findings related to educational alternatives, and attracted the attendance of over 250 theorists and experts in the field. The conference represented a significant opportunity to know and develop this field of study, based on research and examples of good practice. The contributions here specifically explore the six educational alternatives that exist in Romania, namely Step by Step, Waldorf, Freinet, Curative Pedagogy, Montessori and the Jenaplan."

Competency-based Teacher Education: Progress, Problems, and Prospects Springer

Looks at a variety of education reforms and innovations over the past one hundred years to find the best approach to teaching.

Principles of Social Science John Wiley & Sons

General report -- Vol. 1 -- Recent trends in teacher recruitment -- Vol. 2.

Alternative Educational Methodologies Société des Ecrivains

This book provides a unique overview of the development of justice-related beliefs in different socialization contexts, and also of the role this plays in protecting mental health and promoting career development for adolescents and young adults. A range of European contributors bridge the conceptual gap between social and developmental psychological perspectives and use a number of original case-studies. This book provides new insights for justice psychology and adds new and important perspectives to studies on youth development.

Current Research in Bilingualism and Bilingual Education UNESCO

In this volume cultural, social and cognitive influences on the research and teaching of mathematical modelling are explored from a variety of theoretical and practical perspectives. The authors of the current volume are all members of the International Community of Teachers of Mathematical Modelling and Applications, the peak research body in this field. A distinctive feature of this volume is the high number of authors from South American countries. These authors bring quite a different perspective to modelling than has been showcased in previous books in this series, in particular from a cultural point of view. As well as recent international research, there is a strong emphasis on pedagogical issues including those associated with technology and assessment, in the teaching and learning of modelling. Applications at various levels of education are exemplified. The contributions reflect common issues shared globally and represent emergent or on-going challenges.

La Nouvelle critique Routledge

There has been no attempt in this book to develop a complete theory of education nor yet review any "systems" or discuss the views of prominent educators. This is not a text book of education, nor

yet an exposition of a new method of school teaching, aimed to show the weary teacher or the discontented parent how education should be carried on. We have tried to show what actually happens when schools start out to put into practice, each in its own way, some of the theories that have been pointed to as the soundest and best ever since Plato, to be then laid politely away as precious portions of our "intellectual heritage." - Preface.

Political Participation in Iran from Khatami to the Green Movement Routledge

This book explores the relationship between the education farmers have received and their subsequent efficiency as farm operators. The concern is with the self-employed in agriculture, the small farmer. The study is concerned solely with ascertaining empirically the effect of schooling on agricultural efficiency and, when possible, the effect of access to information as measured by exposure to extension services. The study uses data from Korea, Malaysia, and Thailand; related findings from several other countries of Africa, Asia, and Latin America are reviewed. Surveys of individual farms provide the data used in the empirical analyses. Analyses from Thailand indicate that farmers of all educational levels are maximizing profits. However, more educated farmers do have higher levels of profits, which reflect the higher levels of productivity found in the production function analyses. Education has little effect on market efficiency. Higher levels of education and exposure to extension services increase the probabilities of using chemical fertilizers. The effects of education were much more likely to be positive in modernizing agricultural environments rather than in traditional ones.

Bulletin signalétique Springer Science & Business Media

Young people around the world are struggling to enter the labour market. In some OECD countries, one in four 16-29 year-olds is neither employed nor in education or training. The OECD Skills Outlook 2015 shows how improving the employability of youth requires a comprehensive approach. While ... [SIGIR '94](#) Organisation for Economic Co-operation and Development ; [Washington, D. C. : sold by OECD Publications Center]

This fifth volume of PISA 2012 results presents an assessment of student performance in problem solving, which measures students' capacity to respond to non-routine situations in order to achieve their potential as constructive and reflective citizens.

La Quinzaine littéraire Springer Science & Business Media

In het omvangrijke oeuvre van Herman Hertzberger is de bouw van scholen een van de belangrijkste opgaven. Hij bouwde tot op heden ruim dertig scholen. Volgens Hertzberger is scholenbouw vandaag de dag een van de weinige deelgebieden binnen de architectuur waarbij de ontwerper nog de menselijke condities kan bepalen en beïnvloeden. Hij stelt dat er evenwicht moet zijn tussen gebruik, functionaliteit en de architectuur van schoolgebouwen, waarbij de architectuur geïnspireerd wordt door het onderwijs. Juist met de huidige ontwikkelingen in het onderwijs, van klassikaal naar meer individueel gericht onderwijs, dienen de gebouwen steeds opnieuw bedacht te worden. De wisselwerking tussen onderwijs, onderwijssystemen en architectuur is evident. In Ruimte en Leren legt Hertzberger zijn ruime ervaring, kennis en opvattingen vast in een theoretische beschouwing over de ruimtelijke condities van leren.

Schools of To-morrow 010 Publishers

This book covers research topics in bilingual education, language policies, language contact, identity

of bilingual speakers, early bilingualism, heritage languages, and more, and provides an overview of current theory, research and practice in the field of bilingualism. Each chapter is written by a specialist in the field. Part I focuses on the numerous and heterogeneous relations between languages as well as the implications arising from bilingual speech processing. In Part II, a series of contextualized studies on bilingual classrooms are presented, with diverse research designs applied in different educational settings being a key feature of these studies. Part III bridges theory and practice by offering an insight into mono- and multilingual school settings showcasing examples of educational institutions where bilingualism successfully soared and depicts the needs related to language education.

The Teacher and Educational Change, a New Role: General report Springer Nature

This book examines the unintended consequences of top-down reforms in Iran, analysing how the Iranian reformist governments (1997–2005) sought to utilise gradual reforms to control independent activism, and how citizens responded to such a disciplinary action. While the governments successfully 'set the field' of permitted political participation, part of the civil society that took shape was unexpectedly independent. Despite being a minority, independent activists were not marginal: without them, in fact, the Green Movement of 2009 would not have taken shape. Building on in-

depth empirical analysis, the author explains how autonomous activism forms and survives in a semi-authoritarian country. The book contributes to the debate about the implications of elite-led reforms for social reproduction, offering an innovative interpretation and an original analysis of social movements from a political science perspective.

World Class Schools Princeton University Press

In this book, the reader is invited to enter a strange world in which you can tell the age of the captain by counting the animals on his ship, where runners do not get tired, and where water gets hotter when you add it to other water. It is the world of a curious genre, known as "word problems" or "story problems". It originated in the ancient civilizations of Egypt, China, and India, and is the subject of daily rituals among students and teachers in mathematics classrooms all around the world. An international group of scholars with a shared interest in this phenomenon explore multiple aspects of this world from multiple perspectives. These discussions take us deep into philosophical issues of the relationships between words, mathematical systems, and the physical and social worlds we all inhabit. Empirical investigations are reported that throw light on how students and their teachers experience and interpret this activity, raising profound questions about the nature and purposes of mathematics teaching/learning in general and how it could be improved.
