Summary and Practice Book. Science
Nelson Thornes

It is increasingly being acknowledged that subject leaders hold the key to school improvement and professional development. However, there is little information available for subject leaders to help them with the day-to-day practicalities of running a department on top of existing teaching commitments. This uniquely practical book deals specifically with current issues faced by subject heads of department (HoDs). Engagingly and entertainingly written, this book covers the major areas of concern to subject leaders, including leadership

styles, managing staff, managing pupil performance, strategic planning, curriculum development and coping with problems.

This book considers why summative assessment in English is difficult and explores viewing it as an arts subject rather than one which is quantifiable and assessable objectively.
