 Bislama is the
 national
 language of
 Vanuatu, the
 world's most

linguistically diverse nation with at least 80 actively spoken Oceanic languages used by about 200,000 people. Bislama began as a plantation pidgin based on English in the nineteenth century, but it has since developed into a unique language with a grammar and vocabulary very different from English. It is one of very few national languages for which there is no readily

available reference grammar. This book aims to fill this gap by providing an extensive account of the grammar of Bislama as it is used by ordinary Ni-Vanuatu. It does not, therefore, aim to describe any kind of artificial written norm but sets out to capture a range of different kinds of ways that Ni-Vanuatu will say things in various contexts, both written and spoken, formal and informal. The

thrust of this volume is to show that Bislama has a grammar—an unfamiliar concept for those educated in Vanuatu. It also shows that Bislama is a language of considerable complexity, which will come as a surprise to many of its users, who have been taught to view their language as somehow "simple" and even "deficient." Koguryo BRILL Eleven great stories in original Italian with vivid,

accurate English translations on facing pages, teaching and practice aids, Italian-English vocabulary, more. Boccaccio, Machiavelli, d'Annunzio, Pirandello and Moravia, plus significant works by lesser-knowns. **The Universal English Dictionary** Franklin Classics Trade Press One of the great seats of learning and repositories of knowledge in the ancient world,

Alexandria, and the great school of thought to which it gave its name, made a vital contribution to the development of intellectual and cultural heritage in the Occidental world. This book brings together twenty papers delivered at a symposium held at the J. Paul Getty Museum on the subject of Alexandria and Alexandrianism. Subjects range from "The Library of Alexandria and Ancient

Egyptian Learning" and "Alexander's Alexandria" to "Alexandria and the Origins of Baroque Architecture." With nearly two hundred illustrations, this handsome volume presents some of the world's leading scholars on the continuing influence and fascination of this great city. The distinguished contributors include Peter Green, R. R. R. Smith, and the late Bernard Bothmer. *English and Chinese*

 Insights from the history of numerical notation suggest that how humans write numbers is an active choice involving cognitive and

social factors. Over the past 5,000 years, more than 100 methods of numerical notation--distinct ways of writing numbers--have been developed and used by specific communities. Most of these are barely known today; where they are known, they are often derided as cognitively cumbersome and outdated. In *Reckonings*, Stephen Chrisomalis considers how humans past and present use numerals,

reinterpreting historical and archaeological representations of numerical notation and exploring the implications of why we write numbers with figures rather than words.

This is the revised, updated and enlarged second edition of the first detailed descriptive grammar in English dedicated to the Western Old Japanese. The grammar is divided into two volumes, with the first volume dealing with sources, script, phonology, lexicon, nominals and adjectives. The second volume focuses on verbs, adverbs,

particles, conjunctions and interjections. *Chemical Thermodynamics of Americium* Courier Corporation The recent translation of a Babylonian tablet launches a groundbreaking investigation into one of the most famous stories in the world, challenging the way we look at ancient history. Since the Victorian period, it has been understood that the story of Noah, iconic in the Book of

Genesis, and a central motif in Judaism, Christianity and Islam, derives from a much older story that existed centuries before in ancient Babylon. But the relationship between the Babylonian and biblical traditions was shrouded in mystery. Then, in 2009, Irving Finkel, a curator at the British Museum and a world authority on ancient Mesopotamia, found himself playing

detective when a member of the public arrived at the museum with an intriguing cuneiform tablet from a family collection. Not only did the tablet reveal a new version of the Babylonian Flood Story; the ancient poet described the size and completely unexpected shape of the ark, and gave detailed boat building specifications. Decoding this ancient message wedge by

cuneiform wedge, Dr. Finkel discovered where the Babylonians believed the ark came to rest and developed a new explanation of how the old story ultimately found its way into the Bible. In *The Ark Before Noah*, Dr. Finkel takes us on an adventurous voyage of discovery, opening the door to an enthralling world of ancient voices and new meanings. Italian Stories

This is the second volume in a series of critical reviews of the chemical thermodynamic data of those elements of particular importance in the safety assessment modeling of high-level radioactive waste storage and disposal facilities. The objective of these reviews is to provide a set of reliable thermodynamic data that can be used to describe the behaviour of these

elements under conditions relevant for radioactive waste disposal systems and the geochemical environments. The present volume is a review of experimental data reported in the literature for americium. On a few occasions, where no data existed, comparisons and estimates were made based on experimental data on analog lanthanide elements. The basic

<p>philosophy was to develop a minimum set of solid phases and solution species of americium that would fit all experimental data being reviewed.</p> <p><i>Language Contact in Siberia</i> MIT Press</p> <p>The Hamito-Semitic Etymological Dictionary, a project in the making since 1986, is the first dictionary to reflect the vocabulary of the extinct Proto-Hamito-Semitic (Proto-Afro-Asiatic)</p>	<p>language.  This monograph discusses phonetic, morphological and semantic features of the 'Altaic' Sprachbund (i.e. Turkic, Mongolic and Tungusic) elements in Yeniseian languages (Kott, Assan, Arin, Pumpokol, Yugh and Ket), a rather heterogeneous language family traditionally classified as one of the

'Paleo-Siberian' language groups, that are not related to each other or to any other languages on the face of the planet. The present work is based on a database of approximately 230 Turkic and 70 Tungusic loanwords. A smaller number of loanwords are of Mongolic origin, which came through either the Siberian Turkic languages or the Tungusic Ewenki languages.

There are clear linguistic criteria, which help to distinguish loanwords borrowed via Turkic or Tungusic and not directly from Mongolic languages. One of the main outcomes of this research is the establishment of the Yeniseian peculiar features in the Altaic loanwords. The phonetic criteria comprise the regular disappearance of vowel harmony, syncope,

<p>amalgamation , aphaeresis and metathesis. Besides, a separate group of lexemes represents hybrid words, i.e. the lexical elements where one element is Altaic and the other one is Yeniseian. This book presents a</p>	<p>historical- etymological survey of a part of the Yeniseian lexicon, which provides an important part of the comparative database of Proto- Yeniseian reconstruction s. <u>International Dictionary and Cyclopædia ...</u> Newnes</p>	<p><u>The Encyclopædic Dictionary</u> The Oxford Introduction to Proto-Indo- European and the Proto- Indo-European World <u>Universal Dictionary of the English Language</u> Hemkunt Press Lloyd's Encyclopædic dictionary</p>
