The slowdown in market demand for oil is putting increasing pressure on Kuwait's current economic and social model. This model is based on the distribution of petroleum export proceeds to Kuwaiti citizens, with relatively limited long-term investment in knowledge production and the upgrading of the national innovation capacity.

Die Erdöl-Moderne ist ein lokales Phänomen der Geschichte Kuwaits, aber auch ein globales Ereignis und massgebliche Ursache des Klimawandels. Die Studie untersucht die Rolle von Erdöl in der visuellen Kultur Kuwaits im Kontext von Ideologien wie Modernisierung und politischer Repräsentation. Der Begriff des Irisierenden, eines in Regenbogenfarben schillernden Farbenspiels, dient als analytisch-ästhetisches Konzept, um den umstrittenen Beitrag von Erdöl in der Moderne zu diskutieren: sowohl Wohlstandsversprechen wie auch destruktive Kraft in soziokultureller und ökologischer Hinsicht. Das Buch versammelt eine Fülle historischen Bildmaterials, darunter Luft- und Farbfotografien, Briefmarken, Stadtpläne und Architekturdarstellungen, um unter Berücksichtigung von zeitgenössischer Kunst aus der Golfregion das visuelle Erbe der Erdöl- Moderne kritisch zu hinterfragen.

Current Antitrust Problems Elsevier

Economic and strategic power is not the exclusive province of powerful, developed countries. Kuwait

has used its main resource, oil, to integrate itself into the world economy as an autonomous actor rather than as a dependent commodity exporter. This daring economic strategy enabled Kuwait to claim military support from governments hosting its direct investments overseas in 1990-91 following its invasion by Iraq. Based on five years of research, including interviews with more than 200 people, Dr. Tetreault's book analyzes the development of the Kuwait Petroleum Corporation in the context of domestic, regional, and world politics. Contrary to current thinking, she argues that multinational vertical integration under state ownership can be an optimal strategy for oil-exporting, developing countries, particularly those whose resource endowments are otherwise highly limited. This book is directed toward executives in natural resource industries, economic and strategic planners in public and private institutions, and those charged with the formulation and implementation of national, international, and transnational economic policy; in addition, it is of interest to academics specializing in political economy, development, industrial organization, regional and domestic politics, and international relations.
