## BRAYDON WERNER

*How to Teach Life Skills to Kids with Autism Or Asperger's* Jessica Kingsley Publishers  
 Inspired by the #1 New York Times bestseller *She Persisted* by Chelsea Clinton and Alexandra Boiger, a chapter book series about women who spoke up and rose up against the odds—including Temple Grandin! In this chapter book biography by beloved author Lyn Miller-Lachmann, STEM-inist readers learn about the amazing life of Temple Grandin—and how she persisted. Temple Grandin is a world-renowned scientist, animal-behavior expert, and autism spokesperson who was able to use her way of thinking and looking at the world to invent and achieve great things! Complete with an introduction from Chelsea Clinton, black-and-white illustrations throughout, and a list of ways that readers can follow in Temple Grandin's footsteps and make a difference! A perfect choice for kids who love learning and teachers who want to bring inspiring women into their curriculum. And don't miss out on the rest of the books in the *She Persisted* series, featuring so many more women who persisted, including Sally Ride, Virginia Apgar, Helen Keller, and more! Praise for *She Persisted: Temple Grandin*: "Miller-Lachmann's deft narrative is inspiring, informative, and engaging . . . A solid addition to young nonfiction collections." --School Library Journal  
*Temple Did It, and I Can, Too!* Bloomsbury Publishing  
 From world-renowned autism spokesperson, scientist, and inventor Temple Grandin -- a book of personal stories, inventions, and facts that will blow young inventors' minds and make them soar. Have you ever wondered what makes a kite fly or a boat float? Have you ever thought about why snowflakes are symmetrical, or why golf balls have dimples? Have you ever tried to make a kaleidoscope or build a pair of stilts? In *Calling All Minds*, Temple Grandin explores the ideas behind all of those questions and more. She delves into the science behind inventions, the steps various people took to create and improve upon ideas as they evolved, and the ways in which young inventors can continue to think about and understand what it means to tinker, to fiddle, and to innovate. And laced throughout it all, Temple gives us glimpses into her own childhood tinkering, building, and inventing. More than a blueprint for how to build things, in *Calling All Minds* Temple Grandin creates a blueprint for different ways to look at the world. And more than a call to action, she gives a call to imagination, and shows readers that there is truly no single way to approach any given problem—but that an open and inquisitive mind is always key. Praise for *Calling All Minds*: "An impassioned call to look at the world in unique ways with plenty of practical advice on how to cultivate a curious, inquiring, imaginative mind." —Kirkus Reviews "Both practical and inspirational, this useful book describes an overall approach to viewing the world creatively, as exemplified by the numerous projects and supporting material provided here." —VOYA "Grandin offers a nuanced perspective on the qualities of a successful inventor—notably, a sense of wonder and curiosity, careful observation, and the willingness to learn from mistakes." —Publishers Weekly  
*Animals Make Us Human* Storey Publishing  
 Amy Guglielmo, Jacqueline Tourville, and Giselle Potter come together to tell the inspiring story of autism advocate Dr. Temple Grandin and her brilliant invention: the hug machine. As a young girl, Temple Grandin loved folding paper kites, making obstacle courses, and building lean-tos. But she really didn't like hugs. Temple wanted to be held—but to her, hugs felt like being stuffed inside the scratchiest sock in the world; like a tidal wave of dentist drills, sandpaper, and awful cologne, coming at her all at once. Would she ever get to enjoy the comfort of a hug? Then one day, Temple had an idea. If she couldn't receive a hug, she would make one...she would build a hug machine!  
**Temple Grandin's Guide to Working with Farm Animals** Future Horizons  
 "Here is a children's book that will help guide and inspire all kids to reach their full potential. Temple Did It, and I Can Too! explains the obstacles Dr. Temple Grandin faced while growing up, then gives the rules she followed to overcome them and become a leading animal scientist. This colorful book

was written with the input and guidance of Dr. Grandin, and even includes an introduction by her. Includes worksheets for kids to identify and reach their goals."--Provided by publisher.

Hay House, Inc

Temple Grandin's Guide to Working with Farm Animals Storey Publishing

[An Anthropologist on Mars](#) Houghton Mifflin Harcourt

From the bestselling author of *The Man Who Mistook His Wife for a Hat* • Fascinating portraits of neurological disorder in which men, women, and one extraordinary child emerge as brilliantly adaptive personalities, whose conditions have not so much debilitated them as ushered them into another reality. Here are seven detailed narratives of neurological patients, including a surgeon consumed by the compulsive tics of Tourette's syndrome unless he is operating; an artist who loses all sense of color in a car accident, but finds a new sensibility and creative power in black and white; and an autistic professor who cannot decipher the simplest social exchange between humans, but has built a career out of her intuitive understanding of animal behavior. Sacks combines the well honed mind of an academician with the verve of a true storyteller.

[Who Is Temple Grandin?](#) Penguin

The idea that some people think differently, though no less humanly, is explored in this inspiring book. Temple Grandin is a gifted and successful animal scientist, and she is autistic. Here she tells us what it was like to grow up perceiving the world in an entirely concrete and visual way - somewhat akin to how animals think, she believes - and how it feels now. Through her finely observed understanding of the workings of her mind she gives us an invaluable insight into autism and its challenges.

**Different Kinds of Minds** Future Horizons

Dr. Grandin sits down with author Lesko to talk about her life. This book is full of wisdom and humor, and is sure to be an inspiration for anyone with high-functioning autism or Asperger Syndrome, their family, and friends.

*She Persisted: Temple Grandin* Remarkable Lives Revealed

Fourteen individuals with autism, Asperger's syndrome, or attention-deficit hyperactivity disorder share the challenges they experienced growing up, their lives, relationships, and eventual careers.

*Emergence* Future Horizons

Albert Einstein. Steve Jobs. Elon Musk. Katharine Johnson. These geniuses are all visual thinkers. Are you? Do you like puzzles, coding, and taking things apart? Do you write stories, act in plays, slay at Wordle? The things you are good at are clues to how your brain works. Are you good at math? Working with your hands? Are you a neat freak or a big mess? With her knack for making science easy to understand, Temple Grandin explains different types of thinkers: verbal thinkers who are good with language, and visual thinkers who think in pictures and patterns. You will discover all kinds of minds and how we need to work together to create solutions to help solve real-world problems.

*Temple Grandin* Sensory Focus LLC

In DSM-5, published in 2013, the classification of autism spectrum disorder (ASD) was created, subsuming several diagnoses and representing a significant evolution from its first appearance in the DSM-III three decades earlier. Autism Spectrum Disorders reflects this evolution, offering clinicians and families a succinct, definitive, and up-to-date guide to current research in the field and its impact on assessment and treatment. The book begins with the epidemiology of ASDs, which have increased in prevalence, and explores genetic heritability and environmental risk factors. It then explains the roles of the psychiatrist, neurologist and pediatrician in assessing the patient, examines assessment tools and processes, and describes the latest advances in a variety of treatments and interventions. The text's focus is on educating and empowering families and health care providers to determine whether appropriate genetic testing and counseling have been undertaken, whether the individual has had the relevant assessment, and whether skilled behavioral

treatment and additional medical assessment or treatment are required. Specifically, the text: Reviews existing prevalence estimates for ASDs since 2000 and discusses methodological factors impacting the estimation of prevalence and the interpretation of changes in prevalence estimates over time. Evaluates genomic and epigenomic research over the last decade in the context of translating findings to practice, in terms of testing (e.g., copy number variants and whole-exome sequencing) and counseling. Examines the role of environmental toxicity in immune dysregulation, which has now been noted among individuals with ASD and their family members by numerous studies. Reviews medical and cognitive assessments that may be needed. Reviews targeted treatments that have the potential to reverse neurobiological abnormalities in ASD Reviews behavioral treatments that are effective in promoting development and improving behavior. Describes the Developmental, Individual Difference, Relationship-based (DIR) model, a comprehensive developmental theory with relevance across the lifespan, which targets the core deficits of ASD identified in DSM-5. Provides an overview of school-based interventions for students with autism, exploring the rationale for conducting school-based research and examining existing teacher-, paraprofessional-, and peer-mediated interventions school-based interventions. Explores other approaches to ASDs, such as complementary and integrative approaches and non-invasive brain stimulation technologies, including transcranial magnetic stimulation. The push for early screening is resulting in earlier diagnosis of ASDs and the provision of evidence-based interventions that have a positive impact on outcomes. Autism Spectrum Disorders provides a bench-to-bedside guide that is essential reading for health care providers and families facing the challenges inherent in these complex disorders.

#### **The Spectrum Girl's Survival Guide** W. W. Norton & Company

The mother of the most famous person with autism today, Temple Grandin, Ph.D., tells the story of her death-lock struggle with medical authorities and her husband to keep her daughter from being warehoused in an institution, delving into myth and reality, angst and guilt, family and society ultimately defining the travails of all of humanity.

#### **Temple Grandin** Amazing Scientists

Autism did not stop her--in fact, it helped Temple Grandin become a brilliant scientist and inventor. Temple Grandin wasn't officially diagnosed with autism until she was in her 40s, but she knew at an early age that she was different from her family and classmates. She couldn't show affection, she acted out when noises or other stimuli overwhelmed her, and she only felt comfortable when spending time with the animals on her aunt's ranch. But instead of seeing her differences as limitations, Temple used them to guide her education and career in animal science. She has become a leading advocate for the autistic as well as for the humane treatment of animals at meat packing companies. This inspiring biography by Patricia Brennan Demuth shines a light on Temple Grandin's intellect, creativity, and unique spirit.

How parents and professionals can help spectrum kids become successful adults

#### *Different ... Not Less* Vintage

The co-author of "Asperger's and Girls" presents a no-nonsense guide to teaching children with Asperger's or autism the life skills they will need to function as an adult.

#### **Animals in Translation** Simon and Schuster

Themes: Biography, Animals, Autism Awareness, Inspiration. At age two, Temple Grandin was diagnosed with autism spectrum disorder (ASD). Though this led to many challenges throughout her life, Grandin views her disability as a gift. ASD allowed her to see the world in a different way and make a connection between two seemingly unrelated areas: animal welfare and autism. Today, Grandin works to educate people on animal behavior and humane treatment. She is also a renowned advocate for people with ASD. Blue Delta Books™, a Hi-Lo Books™ biography series, tell the stories of people who have changed our world in profound ways. This series features a diverse group of people. Some are more well-known than others, but all deserve to be highlighted for the positive impact they have had. Each Blue Delta Book features full-color images on every page and tells the person's story from childhood throughout their life. These books are sure to inspire young teen readers. Each book is 48 pages long.

#### **The Girl who Thought in Pictures** American Psychiatric Pub

Empowering strategies for anyone who works with children and teens on the spectrum. International best-selling writer and artist Temple Grandin joins psychologist Debra Moore in presenting nine strengths-based mindsets necessary to successfully work with young people on the autism spectrum. Examples and stories bring the approaches to life, and detailed suggestions and checklists help readers put them to practical use. Temple Grandin shares her own personal experiences and anecdotes from parents and professionals who have sought her advice, while Debra Moore draws on more than three decades of work as a psychologist with kids on the spectrum and those who love and care for them. So many people support the lives of these kids, and this book is for all of them: teachers; special education staff; mental health clinicians; physical, occupational, and speech therapists; parents; and anyone interacting with autistic children or teens. Readers will

come away with new, empowering mindsets they can apply to develop the full potential of every child.

#### *How to Build a Hug* Penguin

"One of the most remarkable books I've ever read. It's truly moving, eye-opening, incredibly vivid."—Jon Stewart, The Daily Show NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • The Wall Street Journal • Bloomberg Business • Bookish FINALIST FOR THE BOOKS FOR A BETTER LIFE FIRST BOOK AWARD • NEW YORK TIMES BESTSELLER You've never read a book like The Reason I Jump. Written by Naoki Higashida, a very smart, very self-aware, and very charming thirteen-year-old boy with autism, it is a one-of-a-kind memoir that demonstrates how an autistic mind thinks, feels, perceives, and responds in ways few of us can imagine. Parents and family members who never thought they could get inside the head of their autistic loved one at last have a way to break through to the curious, subtle, and complex life within. Using an alphabet grid to painstakingly construct words, sentences, and thoughts that he is unable to speak out loud, Naoki answers even the most delicate questions that people want to know. Questions such as: "Why do people with autism talk so loudly and weirdly?" "Why do you line up your toy cars and blocks?" "Why don't you make eye contact when you're talking?" and "What's the reason you jump?" (Naoki's answer: "When I'm jumping, it's as if my feelings are going upward to the sky.") With disarming honesty and a generous heart, Naoki shares his unique point of view on not only autism but life itself. His insights—into the mystery of words, the wonders of laughter, and the elusiveness of memory—are so startling, so strange, and so powerful that you will never look at the world the same way again. In his introduction, bestselling novelist David Mitchell writes that Naoki's words allowed him to feel, for the first time, as if his own autistic child was explaining what was happening in his mind. "It is no exaggeration to say that The Reason I Jump allowed me to round a corner in our relationship." This translation was a labor of love by David and his wife, KA Yoshida, so they'd be able to share that feeling with friends, the wider autism community, and beyond. Naoki's book, in its beauty, truthfulness, and simplicity, is a gift to be shared. Praise for The Reason I Jump "This is an intimate book, one that brings readers right into an autistic mind."—Chicago Tribune (Editor's Choice) "Amazing times a million."—Whoopi Goldberg, People "The Reason I Jump is a Rosetta stone. . . . This book takes about ninety minutes to read, and it will stretch your vision of what it is to be human."—Andrew Solomon, The Times (U.K.) "Extraordinary, moving, and jeweled with epiphanies."—The Boston Globe "Small but profound . . . [Higashida's] startling, moving insights offer a rare look inside the autistic mind."—Parade

#### *Calling All Minds* Future Horizons

Winner of a 2015 Academic's Choice Award, this is your pocket guide to Temple Grandin; a great introduction to her thoughts and advice on both autism and sensory issues! Dr. Temple Grandin is a doctor of animal science, a professor at Colorado State University, a best-selling author, an autism activist, and a consultant on animal behavior. She also invented the "squeeze machine," a device to calm the sensory systems of those on the autism spectrum. The subject of the award-winning 2010 biographical film Temple Grandin, she was listed in Time magazine among the world's one hundred most influential people. Have you even wanted to talk to Temple about the sensory issues people with autism, Asperger's, PDD, and Sensory Processing Disorder deal with? Here, in this handy reference book, Temple gives an overview of what it is like to have autism and sensory difficulties, tells how she overcame her sensory issues, gives useful tips, then answers your questions in an easy-to-reference Q&A.

#### *The Loving Push* Simon and Schuster

INSTANT NEW YORK TIMES BESTSELLER WINNER OF THE NAUTILUS GOLD AWARD "A powerful and provocative testament to the diverse coalition of minds we'll need to face the mounting challenges of the twenty-first century." —Steve Silberman "An absolute eye-opener." —Frans de Waal A landmark book that reveals, celebrates, and advocates for the special minds and contributions of visual thinkers A quarter of a century after her memoir, Thinking in Pictures, forever changed how the world understood autism, Temple Grandin— "an anthropologist on Mars," as Oliver Sacks dubbed her—transforms our awareness of the different ways our brains are wired. Do you have a keen sense of direction, a love of puzzles, the ability to assemble furniture without crying? You are likely a visual thinker. With her genius for demystifying science, Grandin draws on cutting-edge research to take us inside visual thinking. Visual thinkers constitute a far greater proportion of the population than previously believed, she reveals, and a more varied one, from the photo-realistic "object visualizers" like Grandin herself, with their intuitive knack for design and problem solving, to the abstract, mathematically inclined "visual spatial" thinkers who excel in pattern recognition and systemic thinking. She also makes us understand how a world increasingly geared to the verbal tends to sideline visual thinkers, screening them out at school and passing over them in the workplace. Rather than continuing to waste their singular gifts, driving a collective loss in productivity and innovation, Grandin proposes new approaches to educating, parenting, employing, and collaborating with visual thinkers. In a highly competitive world, this important book helps us see, we need every mind on board.
