Perhaps no psalm is more widely known than Psalm 23. Spoken by David during a time of great stress and difficulty, it summons us to lie down in green pastures and walk thru the valley of the shadow of death. Yet so often it seems we do just the reverse, lying down in the valley and fixating on the danger, fear, and uncertainty. We wonder where God has gone and why he doesn't make things right, never considering that perhaps what we perceive as a spiritual trial is actually an invitation from God. In this inspirational examination of Psalm 23, Heath Adamson asks the provocative question: What if the green pasture and valley of the shadow of

death is the same place? Uncovering the rich historical and spiritual context of the shepherd's psalm, he explores how God has provided a place of rest for each of us, even in the times of unrest, uncertainty, moral ambiguity, and fear.

Valley of Shadows HarperCollins
A finalist for the 2017 Bram Stoker Award for Superior Achievement in a First Novel. Deftly written and utterly addictive, this Western literary horror debut will find a

home with fans of authors like Joe Hill, Cormac McCarthy, and Anne Rice. One night in 1980, a man becomes a monster. Haunted by his past, Travis Stillwell spends his nights searching out women in West Texas honky-tonks. What he does with them doesn't make him proud, just quiets the demons for a little while. But after Travis crosses paths one night with a mysterious pale-skinned girl, he wakes weak and bloodied in his cabover camper the next morning—with no sign of a girl, no memory of the night before. Annabelle Gaskin spies the camper parked behind her motel and offers the cowboy a few odd jobs to pay his board. Travis takes her up on the offer, if only to buy time, to lay low and heal. By day, he mends the old motel, insinuating himself into the lives of Annabelle and her ten-year-old son. By night, in the cave of his camper, he fights an unspeakable hunger. Before long, Annabelle and her boy come to realize that this strange cowboy is not what he seems. Half a state away, a grizzled Texas Ranger is hunting Travis for his past misdeeds, but what he finds will lead him to a revelation far more monstrous. A man of the law, he'll have to decide how far into the darkness he'll go for the sake of justice. When these lives converge on a dusty autumn night, an old evil will find new life—and new blood.

Grace in the Valley Oxford University Press
The royal necropolis of New Kingdom Egypt, known as the Valley of the Kings (KV), is one of the most important--and celebrated--archaeological sites in the world. Located on the west bank of the Nile river, about three miles west of modern Luxor, the valley is home to more than sixty tombs, all dating to the second millennium BCE. The most famous of these is the tomb of Tutankhamun, first discovered by Howard Carter in 1922. Other famous pharaoh's interred here include Hatshepsut, the only queen found in the valley, and Ramesses II, ancient Egypt's greatest ruler. Much has transpired in the study and exploration of the Valley of the Kings over the last few years. Several major discoveries have been made, notably the many-chambered KV5 (tomb of the sons of Ramesses II) and KV 63, a previously unknown tomb found in the heart of the valley. Many areas of the royal valley have been explored for the first time using new technologies, revealing ancient huts, shrines, and stelae. New studies of the DNA, filiation, cranio-facial reconstructions, and other aspects of the royal mummies have produced important and sometimes controversial results. The Oxford Handbook of the Valley of the Kings provides an up-to-date and

thorough reference designed to fill a very real gap in the literature of Egyptology. It will be an invaluable resource for scholars, teachers, and researchers with an interest in this key area of Egyptian archaeology. First, introductory chapters locate the Valley of the Kings in space and time. Subsequent chapters offer focused examinations of individual tombs: their construction, content, development, and significance. Finally, the book discusses the current status of ongoing issues of preservation and archaeology, such as conservation, tourism, and site management. In addition to recent work mentioned above, aerial imaging, remote sensing, studies of the tombs' architectural and decorative symbolism, problems of conservation management, and studies of KV-related temples are just some of the aspects not covered in any other work on the Valley of the Kings. This volume promises to become the primary scholarly reference work on this important World Heritage Site.

Valley of Terror Simon and Schuster

"By patient accumulation of anecdote and detail, Rustad evolves Shetler's story into something much more human, and humanly tragic, into a layered inquisition and a reportorial force....suffice it to say Rustad has done what the best storytellers do: tried to track the story to its last twig and then stepped aside." —New York Times Book Review In the vein of Jon Krakauer's *Into the Wild*, a riveting work of narrative nonfiction centering on the unsolved disappearance of an American backpacker in India—one of at least two dozen tourists who have met a similar fate in the remote and storied Parvati Valley. For centuries, India has enthralled westerners looking for an exotic getaway, a brief immersion in yoga and meditation, or in rare cases, a true pilgrimage to find spiritual revelation. Justin Alexander Shetler, an inveterate traveler trained in wilderness survival, was one such seeker. In his early thirties Justin Alexander Shetler, quit his job at a tech startup and set out on a global journey: across the United States by motorcycle, then down to South America, and on to the Philippines, Thailand, and Nepal, in search of authentic experiences and meaningful encounters, while also documenting his travels on Instagram. His enigmatic character and magnetic personality gained him a devoted following who lived vicariously through his adventures. But the ever restless explorer was driven to pursue ever greater challenges, and greater risks, in what had become a personal quest—his own hero's journey. In 2016, he made his way to the Parvati Valley, a remote and rugged corner of the Indian Himalayas steeped in mystical tradition yet shrouded in darkness and danger. There, he spent weeks studying under the guidance of a sadhu, an Indian holy man, living and meditating in a cave. At the end of August, accompanied by the sadhu, he set off on a "spiritual journey" to a holy lake—a journey from which he would never return. *Lost in the Valley of Death* is about one man's search to find himself, in a country where for many westerners the path to spiritual enlightenment can prove fraught, even treacherous. But it is also a story about all of us and the ways, sometimes extreme, we seek fulfillment in life. *Lost in the Valley of Death* includes 16 pages of color photographs.

From the New York Times bestselling, award-winning writer of *Serena* "One of the great American authors at work today" (The New York Times) gives us a short story collection of haunting allegories about the times we live in—from the perils of capitalism to the extraordinary acts of decency and heroism that exist within them—and the return of the villainess who propelled Rash's famed *Serena* to national

acclaim. Ron Rash has long been a revered presence in the landscape of American letters. A virtuosic novelist, poet, and story writer, he evokes the beauty and brutality of the land, the relentless tension between past and present, and the unquenchable human desire to be a little bit better than circumstances would seem to allow. In these ten stories, Rash, "a gorgeous, brutal writer" (Richard Price) working at the height of his powers, has created a mesmerizing look at the imperfect world around us, from the severing of ties to the natural world in the relentless hunt for profit to the destruction of body and soul with pills meant to mute our pain. Rash's stories are unforgettable—"Baptism" was chosen by Roxane Gay for inclusion in *The Best American Short Stories 2018*, and "Neighbors" was selected by Jonathan Lethem for *The Best American Mystery Stories 2019*. And in revisiting *Serena Pemberton*, Rash updates his bestselling parable of greed run amok as his deliciously vindictive heroine returns to the North Carolina wilderness she left scarred and desecrated to make one final effort to kill the child that threatens all she has accomplished.

Dubbed the Indiana Jones of wildlife science by The New York Times, Alan Rabinowitz has devoted—and risked—his life to protect nature's great endangered mammals. He has journeyed to the remote corners of the earth in search of wild things, weathering treacherous terrain, plane crashes, and hostile governments. *Life in the Valley of Death* recounts his most ambitious and dangerous adventure yet: the creation of the world's largest tiger preserve. The tale is set in the lush Hukaung Valley of Myanmar, formerly known as Burma. An escape route for refugees fleeing the Japanese army during World War II, this rugged stretch of land claimed the lives of thousands of children, women, and soldiers. Today it is home to one of the largest tiger populations outside of India—a population threatened by rampant poaching and the recent encroachment of gold prospectors. To save the remaining tigers, Rabinowitz must navigate not only an unforgiving landscape, but the tangled web of politics in Myanmar. Faced with a military dictatorship, an insurgent army, tribes once infamous for taking the heads of their enemies, and villagers living on less than one U.S. dollar per day, the scientist and adventurer most comfortable with animals is thrust into a diplomatic minefield. As he works to balance the

interests of disparate factions and endangered wildlife, his own life is threatened by an incurable disease. The resulting story is one of destruction and loss, but also renewal. In forests reviled as the valley of death, Rabinowitz finds new life for himself, for communities haunted by poverty and violence, and for the tigers he vowed to protect.

* "We see through this book the immense power of language...to change the minds of lawmakers and tourists alike." —The New York Times Book Review * "A poignant portrait of an era when mere words could change the world." —San Francisco Chronicle * The dramatic and uplifting story of legendary outdoorsman and conservationist John Muir's journey to save Yosemite is "a rich, enjoyable excursion into a seminal period in environmental history" (The Wall Street Journal). In June of 1889 in San Francisco, John Muir—iconic environmentalist, writer, and philosopher—meets face-to-face for the first time with his longtime editor Robert Underwood Johnson, an elegant and influential figure at *The Century* magazine. Before long, the pair, opposites in many ways, decide to venture to Yosemite Valley, the magnificent site where twenty years earlier, Muir experienced a personal and spiritual awakening that would set the course of the rest of his life. Upon their arrival the men are confronted with a shocking vision, as predatory mining, tourism, and logging industries have plundered and defaced "the grandest of all the special temples of Nature." While Muir is devastated, Johnson, an arbiter of the era's pressing issues in the pages of the nation's most prestigious magazine, decides that he and Muir must fight back. The pact they form marks a watershed moment, leading to the creation of Yosemite National Park, and launching an environmental battle that captivates the nation and ushers in the beginning of the American environmental movement. "Comprehensively researched and compellingly readable" (Booklist, starred review), *Guardians of the Valley* is a moving story of friendship, the written word, and the transformative power of nature. It is also a timely and powerful "origin story" as the towering environmental challenges we face today become increasingly urgent.

A personal, moving, and vibrant picture of one of the most beautiful and troubled places in the world, described through the experiences of one family, whose fortunes have changed dramatically with those of

the region. If there is a paradise on earth, it is definitely here, here and only here," said the early seventeenth-century Mughal Emperor Jehangir when describing the Kashmir Valley. But for nearly twenty years this delicate mountain region has been torn by a brutal conflict that has pitched idealism against Islamist militancy and military crackdown. In the tradition of Ryszard Kapuscinski, this is an intimate story told by the author, journalist, and aid worker Justine Hardy. Having lived and worked in Kashmir for many years, she draws the reader beyond the headlines into the world of *In the Valley of Mist*. A family portrait, the book describes a unique and gentle culture that has been shattered by the impact of insurgency, repression, and Islamic extremism in a place once famous for the warmth between its Hindu and Muslim residents. "If you want people to know do not tell stories that will make them hold their breath like in a made-up film. Tell them the truth. It is strong enough," she was told when she asked permission of her Kashmiri friends to tell this story. Revealing and disturbing, *In the Valley of Mist* paints Kashmir as the template for the changing face of Islam.

In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they launched from their garages a hobbyist movement that grew into an industry, and ultimately a social and technological revolution. What they did was invent the personal computer: not just a new device, but a watershed in the relationship between man and machine. This is their story. *Fire in the Valley* is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early 1980s, Swaine and Freiburger daily rubbed elbows with people like Steve Jobs and Bill Gates when they were creating the personal computer revolution. A rich story of colorful individuals, *Fire in the Valley* profiles these unlikely revolutionaries and entrepreneurs, such as Ed Roberts of MITS, Lee Felsenstein at Processor Technology, and Jack Tramiel of Commodore, as well as Jobs and Gates in all the innocence of their formative years. This completely revised and expanded third edition brings the story to its

completion, chronicling the end of the personal computer revolution and the beginning of the post-PC era. It covers the departure from the stage of major players with the deaths of Steve Jobs and Douglas Engelbart and the retirements of Bill Gates and Steve Ballmer; the shift away from the PC to the cloud and portable devices; and what the end of the PC era means for issues such as personal freedom and power, and open source vs. proprietary software.

How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the "design labs" of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.
