Quantum Isometry Groups Deep and Deep Publications

The second edition of Historical Dictionary of the Tamils contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 600 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture.

The Catholic Church in India Springer Nature

The so-called 'Nestorian' Church (officially known as the Apostolic Assyrian Church of the East, with its See in Baghdad) was one of the most significant Christian communities to develop east of the Roman Empire. In its heyday the Church had 8 million adherents and stretched from the Mediterranean to China. Christoph Baumer is one of the very few Westerners to have visited many of the most important Assyrian sites and has written the only comprehensive history of the Church, which now fights for survival in its country of origin, Iraq, and is almost forgotten in the West. He narrates its rich and colorful trajectory, from its apostolic beginnings to the present day, and discusses the Church's theology, christology, and uniquely vigorous spirituality. He analyzes the Church's turbulent relationship with other Christian churches and its dialogue with neighboring world religions such as Zoroastrianism, Manichaeism, Islam, Buddhism, and Taoism. Richly illustrated with maps and over 150 full-color photographs, the book will be essential reading for those interested in a fascinating, but neglected Christian community which has profoundly shaped the history of civilization in both East and West.

Number Theory and Discrete Mathematics Advances in Civil Engineering

This book comprises the proceedings of the International Conference on Green Buildings and Sustainable Engineering (GBSE 2018), which focused on the theme "Transforming our Built Environment through Innovation and Integration towards a Smart and Sustainable Future". The papers included address all aspects of green buildings and sustainability practices in civil engineering, and offer a valuable reference resource for researchers, practitioners, and policy makers.

Thermal Management of Electronics, Volume I Elsevier Health Sciences

This book provides a sustained engagement with contemporary Indian feature films from outside the mainstream, including Aaranaya Kaandam, I.D., Kaul, Chauthi Koot, Cosmic Sex, and Gaali Beeja, to undercut the dominance of Bollywood focused film studies. Gopalan assembles films from Bangalore, Chennai, Delhi, Kolkata, and Trivandrum, in addition to independent productions in Bombay cinema, as a way of privileging understudied works that deserve critical attention. The book uses close readings of films and a deep investigation of film style to draw attention to the advent of digital technologies while remaining fully cognizant of 'the digital' as a cryptic formulation for considering the sea change in the global circulation of film and finance. This dual focus on both the techno-material conditions of Indian cinema and the film narrative offers a fulsome picture of changing narratives and shifting genres and styles.

Report of the Education Department Cambridge University Press

Reprint of the original, first published in 1872. The publishing house Anatiposi publishes historical

books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.

The Eve of the Crucifixion Excel Books India

Targeted mainly at UG students of Dentistry, this book is a comprehensive text on oral medicine, diagnosis and radiological aspects of various orofacial diseases and oral manifestations of systemic disorders. It would also cater to the needs of PG students and dental practitioners as a useful reference book. Only book available in market providing oral medicine, oral diagnosis and oral radiology in one volume along with updated references. A multi-authored book with more than 60 authors from various dental colleges all over India and from countries like USA, England, Canada, Mexico, Brazil and Nigeria Includes chapters on specialized imaging techniques, Implant imaging and CBCT Includes companion website containing 5 additional chs and updated references for additional study Basics of Radiation Physics Radiation Biology Radiographic Films and Accessories Radiographic Techniques Latent Image Formation Processing of Radiographic Films Radiographic Faults Intraoral Radiographic Anatomical Landmarks Extraoral Radiographic Landmarks Site Selection, Evaluation and Imaging for Dental Implants

Geopolitical Exotica Springer

This book constitutes the refereed proceedings of the International Conference Eco-friendly Computing and Communication Systems, ICECCS 2012, held in Kochi, Kerala, India, in August 2012. The 50 revised full papers presented were carefully reviewed and selected from 133 submissions. The papers are organized in topical sections on energy efficient software system and applications; wireless communication systems; green energy technologies; image and signal processing; bioinformatics and emerging technologies; secure and reliable systems; mathematical modeling and scientific computing; pervasive computing and applications.

Advances in Civil Engineering Rowman & Littlefield

This volume comprises select peer reviewed papers presented at the international conference - Advanced Research and Innovations in Civil Engineering (ARICE 2019). It brings together a wide variety of innovative topics and current developments in various branches of civil engineering. Some of the major topics covered include structural engineering, water resources engineering, transportation engineering, geotechnical engineering, environmental engineering, and remote sensing. The book also looks at emerging topics such as green building technologies, zero-energy buildings, smart materials, and intelligent transportation systems. Given its contents, the book will prove useful to students, researchers, and professionals working in the field of civil engineering.

Superpave Mix Design Academic Foundation

The Junior Librarian Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: library terminology and practices; verbal and clerical abilities; preparation of written material; understanding and interpreting written material; understanding and interpreting tabular material; and more.

Rape Victims in Kerala Academic Foundation

This book constitutes the thoroughly refereed proceedings of the Third International Conference on Advances in Communication, Network, and Computing, CNC 2012, held in Chennai, India, February

24-25, 2012. The 41 revised full papers presented together with 29 short papers and 14 poster papers were carefully selected and reviewed from 425 submissions. The papers cover a wide spectrum of issues in the field of Information Technology, Networks, Computational Engineering, Computer and Telecommunication Technology, ranging from theoretical and methodological issues to advanced applications.

Telegraph Pa Momentum Press

Phase change material (PCM)-based composite heat sinks have attracted great interest in recent decades, especially in the context of thermal management of portable electronic devices such as mobile phones, digital cameras, personal digital assistants, and notebooks. In this monograph, a detailed analysis of plate fin heat sinks and plate fin heat sink matrix is presented, based on in-house experiments. Performance benchmarks are articulated and presented for these heat sinks. The state of the art in the development of PCM-based heat sinks and the challenges are outlined, and directions on future development are provided. It is our sincere hope and trust that this book will not only be informative but also awaken curiosity and inspire thermal management solution seekers to delve deep into the ocean of research in PCM-based heat sinks and discover their own pearls and diamonds.

Advanced Calculus Springer Science & Business Media

This book gathers peer-reviewed contributions presented at the 1st International Conference on Structural Engineering and Construction Management (SECON'20), held in Angamaly, Kerala, India, on 14-15 May 2020. The meeting served as a fertile platform for discussion, sharing sound knowledge and introducing novel ideas on issues related to sustainable construction and design for the future. The respective contributions address various aspects of numerical modeling and simulation in structural engineering, structural dynamics and earthquake engineering, advanced analysis and design of foundations, BIM, building energy management, and technical project management. Accordingly, the book offers a valuable, up-to-date tool and essential overview of the subject for scientists and practitioners alike, and will inspire further investigations and research.

Sakoontala Springer

For more than 70 years, "MS-4" has served the asphalt industry as its primary reference manual. This new, expanded edition showcases the advances in asphalt technology, covering such topics as superpave courses, asphalt binder, quality control, and rehabilitation of concrete pavements with HMA.

Advances in Civil Engineering Springer Nature

Proceedings of SECON'19 Springer Nature

Addressing the need for tools to train college mathematics instructors in both basic teaching skills and innovative methods, this work describes training and mentoring activities that have been used in a variety of settings with new instructors, including graduate student teaching assistants, undergraduate tutors, graders, and lab assistants, as well as faculty. The book offers ideas for the structure of an integrated program of professional development, support material for a brief pre-semester orientation session, material for a semester-long program of weekly training meetings, and procedures and forms for conducting a system of class visits and feedback. This work lacks a subject

Learning to Teach and Teaching to Learn Mathematics Springer

Making a Difference: A Story of Adventure, Disaster, and Redemption Inspired by the Plight of At-Risk Girls demonstrates to students across various disciplines that they can assume leadership positions that positively impact communities, organizations, and the world, regardless of their interests, abilities, and career goals. Through personal accounts, Jeffrey A. Kottler and Sara Safari share how they conquered a mountain for a cause, found strength in the service of others in the aftermath of a catastrophic earthquake, and overcame personal and professional obstacles to begin a movement that protects children against abuse and victimization. The text focuses on the plight of children, especially girls, who have been systematically oppressed, but the lessons highlighted throughout are applicable to a variety of other situations and contexts. Readers learn the gifts and privileges of serving others, as well as the difficult realities of this type of work. Kottler and Safari's story guides students through the mistakes, breakthroughs, successes, and failures inherent in ventures of transformative community service. *Making a Difference* is an ideal supplementary text for courses in social justice, advocacy, leadership, women's studies, gender studies, sociology, social work, and counseling. Jeffrey A. Kottler is one of the most prominent authors in the fields of counseling, psychotherapy, health, and education, having written over 100 books across a broad range of topics. He is a clinical professor in the Menninger Department of Psychiatry and Behavioral Science at the Baylor College of Medicine in Houston and professor emeritus of counseling at California State University, Fullerton. He has served as a counselor, therapist, supervisor, educator, and social justice advocate in a variety of professional settings throughout his career. Sara Safari is an author, speaker, mountain climber, advocate for women's empowerment, and board member of Empower Nepali Girls. In 2015, she received the prestigious Global Citizen Award from the United Nations in recognition of her humanitarian work with Nepali girls and her continued efforts to end human trafficking. She's also received an award for Outstanding Practice with Broad Impact in the area of women and leadership from International Leadership Association. Sara will be the first Iranian in history to climb the Seven Summits, the seven highest peaks in each continent by July 2020. She is climbing on behalf of women worldwide who don't have the opportunity to live their lives fully expressed and on their own terms.

The Church of the East BoD - Books on Demand

This volume celebrating the 60th birthday of Béla Bollobás presents the state of the art in combinatorics.

Governance of Rural Electricity Systems in India Cambridge University Press

From the reviews: "...A class in nanoscale science and technology is daunting for the educator, who must organize a large collection of materials to cover the field, and for the student, who must absorb all the new concepts. This textbook is an excellent resource that allows students from any engineering background to quickly understand the foundations and exciting advances of the field. The example problems with answers and the long list of references in each chapter are a big plus for course tutors. The book is organized into seven sections. The first, nanoscale fabrication and characterization, covers nanolithography, self-assembly, and scanning probe microscopy. Of these,

we enjoyed the section on nanolithography most, as it includes many interesting details from industrial manufacturing processes. The chapter on self-assembly also provides an excellent overview by introducing six types of intermolecular interactions and the ways these can be employed to fabricate nanostructures. The second section covers nanomaterials and nanostructures. Out of its 110 pages, 45 are devoted to carbon nanotubes. Fullerenes and quantum dots each have their own chapter that focuses on the properties and applications of these nanostructures. Nanolayer, nanowire, and nanoparticle composites of metals and semiconductors are briefly covered (just 12 pages), with slightly more discussion of specific applications. The section on nanoscale electronics begins with a history of microelectronics before discussing the difficulties in shrinking transistor size further. The discussion of problems (leakage current, hot electrons, doping fluctuations, etc.) and possible solutions (high- k dielectrics, double-gate devices) could easily motivate deeper discussions of nanoscale electrical transport. A chapter on molecular electronics considers transport through alkanes, molecular transistors, and DNA in a simple, qualitative manner we found highly instructive. Nanoscale magnetic systems are examined in the fourth section. The concept of quantum computation is nicely presented, although the discussion of how this can be achieved with controlled spin states is (perhaps necessarily) not clear. We found the chapter on magnetic storage to be one of the most lucid in the book. The giant magnetoresistive effect, operation of spin valves, and issues in magnetic scaling are easier to understand when placed in the context of the modern magnetic hard disk drive. Micro- and nanoelectromechanical systems are covered with an emphasis on the integration of sensing, computation, and communication. Here, the student can see advanced applications of lithography. The sixth section, nanoscale optoelectronics, describes quantum dots, organic optoelectronics, and photonic crystals. The chapter on organic optoelectronics is especially clear in its discussion of the fundamentals of this complicated field. The book concludes with an overview of nanobiotechnology that covers biomimetics, biomolecular motors, and nanofluidics. Because so many authors have contributed to this textbook, it suffers a bit from repetition. However, this also allows sections to be omitted without any adverse effect on student comprehension. We would have liked to see more technology to balance the science; apart

from the chapters on lithography and magnetic storage, little more than an acknowledgment is given to commercial applications. Overall, this book serves as an excellent starting point for the study of nanoscale science and technology, and we recommend it to anyone with a modest scientific background. It is also a great vehicle to motivate the study of science at a time when interest is waning. Nanotechnology educators should look no further." (MATERIALS TODAY, June 2005)

Combinatorics and Probability U of Minnesota Press

To mark the World Mathematical Year 2000 an International Conference on Number Theory and Discrete Mathematics in honour of the legendary Indian Mathematician Srinivasa Ramanuj~ was held at the centre for Advanced study in Mathematics, Panjab University, Chandigarh, India during October 2-6, 2000. This volume contains the proceedings of that conference. In all there were 82 participants including 14 overseas participants from Austria, France, Hungary, Italy, Japan, Korea, Singapore and the USA. The conference was inaugurated by Prof. K. N. Pathak, Hon. Vice-Chancellor, Panjab University, Chandigarh on October 2, 2000. Prof. Bruce C. Berndt of the University of Illinois, Urbana Champaign, USA delivered the key note address entitled "The Life, Notebooks and Mathematical Contributions of Srinivasa Ramanujan". He described Ramanujan--as one of this century's most influential Mathematicians. Quoting Mark K. ac, Prof. George E. Andrews of the Pennsylvania State University, USA, in his message for the conference, described Ramanujan as a "magical genius". During the 5-day deliberations invited speakers gave talks on various topics in number theory and discrete mathematics. We mention here a few of them just as a sampling: • M. Waldschmidt, in his article, provides a very nice introduction to the topic of multiple poly logarithms and their special values. • C.

Kerala Development Report Springer Nature

Full of data on various sectors and issues--among them finance, tourism, foreign trade, agriculture, and governance--this report on the state of Kerala is designed to benefit businesses, NGOs, and policy makers. While Kerala has a strong economy and is India's most literate state, areas such as human rights and the treatment of women and minorities leave room for improvement. This extensive reference discusses the constraints and challenges faced by Kerala and provides a blueprint for its socioeconomic progress.
