The Vegan Athlete's Nutrition Handbook Fair Winds Press
 Exercise, train, and compete at your best on a vegetarian diet. Few segments of the population are more mindful of their food intake than athletes and vegetarians. This book combines the unique demands of sports with a healthy vegetarian diet that can help you build energy and endurance and reduce body fat. Whether you are carbo-loading before a marathon or fine-tuning nutrition to get the most out of your workout, registered dietitian and elite vegetarian athlete Lisa Dorfman provides step-by-step information on how to customize your own sport-specific nutrition program and calculate a personal dietary plan for training
The Vegetarian Sports Nutrition Guide includes personal stories of athletes who have made the switch to vegetarian diets from football players and wrestlers to ice skaters and marathoners, some of whom have beaten life-threatening illnesses with the help of this lifestyle. Lisa Dorfman provides a rich array of tasty and diverse vegetarian recipes, menus, easy-to-use charts, and food guides for vegetarians of all types, from the semi-vegetarian to the fruitarian. She also shares the training secrets of seventeen Olympic and world-class athletes who have used their vegetarian diets to achieve peak performance in their careers and optimum health in their lives.

With *The Planted Runner*, runners learn to optimize their training with plantbased nutrition, harness the power of their minds, and perform at their best while discovering the joy of running at any age. Plant-based nutrition is no longer a fad, but rather has been shown to improve athletic performance and reduce recovery time. Fueling with the power of plants is not only a suitable eating plan for training, but it is also delicious and satisfying. Certified running coach and sports nutrition specialist Claire Bartholic breaks down the information to provide complete understanding of how to eat not only to fuel running, but also to thrive. She also includes information on the basic ingredients and building blocks of a plant-based diet, rounded out with runner-specific fueling recipes that are good before, during, and after a run. Successful training requires more than just good plans and nutrition, however. Without addressing the mental side of training, results

will be limited. The proven mindset training techniques provided in this book quiet that negative self-talk which can sabotage the best efforts. With those doubts silenced, every runner can find his or her potential. Through her coaching, Claire Bartholic has found the best way to successfully integrate those three critical elements—physical training, plant-based fueling, and mindset techniques—to help hundreds of runners reach their personal bests, and she provides her wealth of knowledge in this book.

Buddha's Diet Weldon Owen International

The revised and expanded edition of the bestseller that changed millions of lives The science is clear. The results are unmistakable. You can dramatically reduce your risk of cancer, heart disease, and diabetes just by changing your diet. More than 30 years ago, nutrition researcher T. Colin Campbell and his team at Cornell, in partnership with teams in China and England, embarked upon the China Study, the most comprehensive study ever undertaken of the relationship between diet and the risk of developing disease. What they found when combined with findings in Colin's laboratory, opened their eyes to the dangers of a diet high in animal protein and the unparalleled health benefits of a whole foods, plant-based diet. In 2005, Colin and his son Tom, now a physician, shared those findings with the world in *The China Study*, hailed as one of the most important books about diet and health ever written. Featuring brand new content, this heavily expanded edition of Colin and Tom's groundbreaking book includes the latest undeniable evidence of the power of a plant-based diet, plus updated information about the changing medical system and how patients stand to benefit from a surging interest in plant-based nutrition. *The China Study—Revised and Expanded Edition* presents a clear and concise message of hope as it dispels a multitude of health myths and misinformation. The basic message is clear. The key to a long, healthy life lies in three things: breakfast, lunch, and dinner.

The Vegetarian Sports Nutrition Guide Human Kinetics Plant-Based Sports Nutrition offers guidance to athletes who choose vegan, vegetarian, and plant-based diets about how to effectively fuel their training and competition while adhering to their eating preferences.

The Complete Idiot's Guide to Plant-Based Nutrition Ballantine Books

It's an undisputed fact that the body's physiological needs change as you age. But that doesn't mean you can't continue to compete and perform at your best. In *High-Performance Nutrition for Masters Athletes*, you'll find practical advice for fueling your active lifestyle—now and for decades to come. The key to effectively adapting your nutrition plans is first understanding how needs change over time and how expected results shift through the decades. Explore the science behind proper fueling for training and competition with the current guidelines for carbohydrate, protein, and fat intake plus advice on proper hydration, avoiding the dangers of underfueling, and nutrition for optimal recovery. *High-Performance Nutrition for Masters Athletes* will then take you inside the fueling strategies for precompetition, competition, and recovery: Gain an understanding of the need for different types or amounts of nutrients at different times and get easy-to-follow guidance on how to meet those needs. Learn how to energize with carbohydrate, build muscle with protein, and meet your hydration needs for optimal athletic performance. Know the role vitamins, minerals, and supplements can play in a nutrition plan and how devastating underfueling can be to athletic performance. Understand how chronic conditions such as high blood pressure, diabetes, and cardiovascular disease affect nutritional needs. Use the sample meal plans to help customize meals and snacks and reset eating habits to meet the needs of training and competition. Plus, throughout the book you will find accounts of amazing individuals—both well-known elite athletes and Olympians and everyday athletes—who have adapted their nutrition and training regimes to stay at the top of their game year in and year out. *High-Performance Nutrition for Masters Athletes* provides the latest research, guidance, and strategies that you need to train harder, perform stronger, and recover faster. Eating Plant-based Chronimed Publishing

The pampered prince Siddhartha tried dieting and didn't like it anymore than you do. When he became the Buddha, he found the "middle way" between overindulgence and abstinence. Modern science confirms what Buddha knew all along: it's not what you eat that's important, but when you eat. Sure, he lived before the age of doughnuts and French fried, but his teachings provide a sane, mindful approach to achieving optimum health.
