*Social Work Research and Evaluation* McGraw Hill Professional

In My Life Hacks Leandie du Randt shares her journey into adulthood through her personal 'life hacks' for body, mind, soul and business. Following the death of her mother and her divorce, Leandie adopted these hacks, or rituals, which helped her to become the best version of herself. By sharing them, she wants to help people become the best version of themselves. She believes that by applying these hacks to your life, in your unique way, you will experience the same joy she feels by being herself, because when you change your mindset, you can change your life.

Simple and playful solutions to developing complex skills preparing children for school and life (ages 3 to 7). A child is a work in progress who thrives when everyday living becomes an interactive game. Play. Learn. Know. is a guide to help Mum and Dad (and, in an ideal world, all caregivers) to shape their child's body, heart and mind with care and thoughtfulness. It gives simple and playful solutions to developing complex skills preparing children for school and life (ages 3 to 7). A child needs to experience life to become part of life. You can help your child to belong by exposing her to everyday life: name the things you touch; explain what happens around her; show her how things work; and allow her the opportunity to discover-learn, to move and ask questions freely. You don't need to know all the answers - teach her from an early age to find answers on her own. This book is not a checklist or a time sheet to tick off or

fill in arbitrarily; it is a road map to guide you along the journey of development. It has no age indicators, because every child unfolds developmentally in her own time. Child development is not a race to 'get there first'. It is a journey during which there are skills to be developed, knowledge to be discovered and thousands of experiences to be enjoyed along the way to school readiness. Transform Your Organization by Scaling Leadership How do senior leaders, in their own words, describe the most effective leaders—the ones that get results, grow the business, enhance the culture and leave in their wake a trail of other really effective leaders? Conversely, how do senior leaders describe the kind of leader that undercuts the organization's capacity and capability to create

its future? This book, based on groundbreaking research, shows how senior leaders describe and develop leadership that works, that does not, that scales, and that limits scale. Is your leadership built for scale as you advance in today's volatile, uncertain, dynamic, and disruptive business environment? This context puts a premium on a very particular kind of leadership—High-Creative leadership capable of rapidly growing the organization while simultaneously transforming it into more agile, innovative, adaptive and engaging workplace. The research presented in this book suggests that senior leaders can describe the High-Creative leadership with surprising clarity. They also describe with equal precision the High-Reactive leadership that cancels itself out and seriously limits scale. Which type of leader are you? You scale your leadership by increasing the multiple on your leadership in three ways. First, by developing the strengths that differentiate the most effective leaders from the strengths deployed by the most Reactive and

ineffective leaders. And second, by increasing your leadership ratio—the ratio of most the effective strengths to the most damaging liabilities. Third, by developing High-Creative leaders all around you. Scaling Leadership provides a proven framework for magnifying agile and scalable leadership in your organization. Scalable leadership drives forward-momentum by multiplying high-achieving leaders at scale so that growth, productivity and innovation increase exponentially. Creative leaders multiply their strengths beyond technical competence by leading in deep relationship, with radical humanity, passion and integrity. Drawing upon decades of solid research and experience enhancing individual capability and collective leadership effectiveness with Fortune 500 companies and government agencies, the authors provide an innovative and efficient framework to help you: Take stock of your own personal balance of leadership strengths and weaknesses Scale your leadership in deep relationship and high integrity Proliferate high-achievers throughout your

organization's leadership system Identify ineffective leadership and course-correct quickly Transform your organization by transforming leadership Scaling Leadership is an invaluable tool for executives, managers, and leaders in business, academia, nonprofit organizations, and more. This innovative resource provides effective techniques, real-world examples, and expert guidance for organizations seeking to improve performance, align and execute strategies, and transform their business with scalable leadership capability.

Famous theologian Jürgen Moltmann returns here to the theme that he so powerfully addressed in his groundbreaking work, *Theology of Hope*. In the twenty-first century, he tells us, hope is challenged by ideologies and global trends that would deny hope and even life itself. Terrorist violence, social and economic inequality, and most especially the looming crisis of climate change all contribute to a cultural moment of profound despair. Moltmann reminds us that Christian faith has much to say in response to a despairing world. In the eternal yes of the living God, we affirm the goodness and ongoing purpose of our fragile humanity. Likewise, God's love empowers us to love life and resist a culture of death. The book's two sections equally promote these affirmations, yet in different ways. The first section looks at the challenges to hope in our current world, most especially the environmental crisis. It argues that Christian faith indeed all the world's religions must orient themselves toward the wholeness of the human family and the

physical environment necessary to that wholeness. The second section draws on resources from the early church, the Reformation, and the contemporary theological conversation to undergird efforts to address the deficit of hope he describes in the first section.

Presence-Based Coaching offers coaches a hands-on resource for developing the capacities and skills needed to be reliably present in all situations, and shows how to let go of habitual—and often

ineffective—ways of responding. As author and leadership expert Doug Silsbee explains, once a coach has mastered the inner moves of directing their own attention, they can work to develop the same capability in their clients. The ability of a coach to facilitate lasting, sustainable development in leaders rests on the presence a coach offers to the coach-client relationship.

ways of working as much as new products or services; ¶ Three: innovation is a journey; drawing on insights from around the globe is essential to accelerate our progress. Bettina von Stamm and Anna Trifilova have gathered together the thoughts and ideas of over 200 of the most creative innovators from business, professional practice and academia from nearly 60 countries. The contributors look at innovation from almost every angle. Their statements offer an unparalleled view of innovation and provide a depth of insight that is extraordinary. The editors' reflection on each statement and on the sections within the book, provide useful links between themes and reinforce the relationships between many of the ideas.
