 When the United Nations undertook the publication of the Reports of International Arbitral Awards, the 'Pasicrisie internationale' was identified as one of the rare truly general collections of international case law in existence. In fact, in deciding to publish the arbitration clauses and arbitral awards from 1794 to 1900, Henri La Fontaine was doing pioneering work, foreshadowing the famous Reports by half a century. As we near the end of the century, the 'Pasicrisie internationale' remains just as pertinent as it was when first published in 1902. This collection of arbitral awards, with its modest appearance, has certainly contributed more to the development of international arbitration case law than any number of lyrical speeches advocating peace through law. First edition printed in 1902 by Stämpfli, Bern. Lorsque l'Organisation des Nations Unies entreprit la publication de son Recueil des sentences arbitrales, elle identifia la Pasicrisie internationale comme constituant l'une des rares véritables collections générales de jurisprudence internationale préexistantes. De fait, en décidant de rassembler les clauses compromissoires et les sentences arbitrales de 1794 à 1900, Henri La Fontaine avait fait oeuvre de pionnier et il préfigurait, avec un demi-siècle d'avance, le célèbre Recueil. En cette fin de siècle, la Pasicrisie internationale constitue donc un outil de travail toujours aussi actuel que lors de sa publication en 1902. Cette compilation de sentences arbitrales, d'apparence modeste, a certainement plus contribué au développement de la jurisprudence arbitrale internationale que bien des discours lyriques prônant la paix par

 From Prehistory to the Middle Ages, from the Spanish mainland to the Portuguese Atlantic Coast, the Duero (or Douro as it is known in English because of its Portuguese translation) has served as a river of great historical importance. It is a river flowing from the past into the future with the legacy of the Homo Antecessor and the most ancient remains of European Prehistory, showcasing the first samples of inland farming during the Iberian Neolithic period and many examples of Schematic Rock Art. Before the total obliteration of archaeological sites in the Duero valley due to

active agricultural labours and the course of time itself, the Archaeological and Protohistoric Society of Zamora, Zamoraprotohistórica, leads a programme of researching activities to preserve this heritage and to keep it safe for future generations. In order to accomplish this, the association organises a cycle of conferences, lectures and meetings gathering local, national and international archaeologists and historians in a dynamic and vibrant exchange of knowledge. This volume is a compilation of the most remarkable interventions in those meetings, and each paper gathered here represents a unique reflection on the history of the river.

 Beatriz Caiuby Labate and Clancy Cavnar offer an in-depth exploration of the spread of indigenous shamanic rituals of the Amazon to Western societies, looking at how indigenous, mestizo, and cosmopolitan cultures have engaged with and transformed these forest traditions. The authors focus on the use of ayahuasca, a psychoactive drink essential in many indigenous shamanic rituals.

This book presents practical hydraulic and river engineering research along with fluvial geomorphological concepts, and links the theoretical and practical knowledge of people working every day with rivers, streams, and hydraulic structures to fluvial geomorphology. Besides providing a guide for professionals, this book also provides material for students to acquire the knowledge and skills to rehabilitate rivers, streams, and waterways.
