It is commonly asserted that bills of rights have had a 'righting' effect on the principles of judicial review of administrative action and have been a key driver of the modern expansion in judicial oversight of the executive arm of government. A number of commentators have pointed to Australian administrative law as evidence for this 'righting' hypothesis. They have suggested that

the fact that Australia is an outlier among common law jurisdictions in having neither a statutory nor a constitutional framework to expressly protect human rights explains why Australia alone continues to take an apparently 'formalist', 'legalist' and 'conservative' approach to administrative law. Other commentators and judges, including a number in Canada, have argued the opposite: that bills of rights have the effect of stifling the development of the common law. However, for the most part, all these claims remain just that - there has been limited detailed analysis of the issue, and no detailed comparative analysis of the veracity of the claims. This book analyses in detail the interaction between administrative and human rights law in Australia and Canada, arguing that both jurisdictions have reached remarkably similar positions regarding the balance between judicial and executive power, and between broader fundamental principles including the rule of law, parliamentary sovereignty and the separation of powers. It will provide valuable reading for all those researching judicial review and human rights.

This book will provide emerging construction professionals with insights and information helpful for a successful career in the Australian construction industry. This work fills a critical gap and is written by two authors with decades of experience immersed in current issues. It provides a starting point for the next generation of Australian construction contractors. Beginning with an overview of the industry, the chapters explore winning work, project operations, financial management, people skills and selling a successful business. The authors use case studies to enrich the content and include reviews and commentaries on some of the legendary management books. In addition, readers of the book will find answers to essential industry questions: Why is construction one of the best industries in Australia? What is its most significant conflict? Which are

the three most consistently profitable sectors? What are the essential ten questions to answer for standardising practices? Is work acquisition more art or science? Is it a good idea to fire a client? Why? How to identify and address the office - field conflict? What is the job cost format for unifying project stakeholder information? What are the best key performance indicators for a construction contracting firm? What alignments are needed in general hiring and personnel management processes? What is the process in identifying and implementing a best practice? How do you value the market price for a construction firm? This book should be read by anyone entering the built environment sector in Australia. Universities, Colleges and TAFEs can use this book in various construction business and operations management courses. Supporting materials are available through a website.

This book examines the mechanisms and strategies farmers in North Australia adopt to manage the setbacks and challenges they face. This social research is based on farmers' experiences, but also draws on the author's own experience after his tropical fruit farm was destroyed by two Category 5 cyclones in five years. Through historical analysis, the book compares historic and contemporary aspirations for northern development, and discusses the influence of the built environment on individuals as well as access to health and other social services. Exploring the implications of individual resilience strategies for policy development within the broader context of northern development and evolving environmental governance, the book also highlights the fact that this is occurring in a new geological epoch - the Anthropocene. The book will provide a unique perspective and understanding to government, individuals and industries interested in northern Australia and its relationship to the world

Refugees. Border protection. Ethnic gangs. Terrorism. History wars. Pauline Hanson. Australia's faith in multiculturalism has been shaken by fierce attacks from its enemies and a sense of crisis among its friends. Multiculturalism has become a political tool to win votes and generate community anxiety. What is left of the multicultural ideal? Bob Hodge and John O'Carroll take the pulse of multicultural Australia in the wake of September 11. They investigate the hot spots' of multiculturalism, showing how they cluster around fiercely defended boundaries and borders, both literal and symbolic. They tackle the issues of racism past and present, and show how injustice impacts on many communities in Australia, including Aboriginals as well as more recent migrant groups. The authors argue that despite appearances, multiculturalism is alive and well in Australia, and a commitment to tolerance and diversity characterises daily life. In fact, Australia's multiculturalism is the best kind of borderwork against terrorism, racism and injustice. A timely, original and optimistic discussion of Australia's multicultural past and our possible futures.' Graeme Turner, Director, Centre for Critical and Cultural Studies, University of Queensland This clearly written book shines a welcome light on the fog of critique of Australian multiculturalism from both the Right and the Left.'  Terror in Australia: Workers' Paradise Lost, by veteran journalist John Stapleton, is a beautifully written snapshot of a pivotal turning point in the history of the so-called Lucky Country. This book is a sidwinding missile into the heart of Australian hypocrisy. In 2015 there were well attended Reclaim Australia demonstrations in every major capital city, all protesting what the demonstrators saw as the growing Islamisation of Australia, along with countering anti-racism demonstrations. There were frequent violent clashes, hundreds of police were forced to form lines separating the demonstrators in Sydney and Melbourne, there were a significant number of arrests and injuries, and dozens of people were treated for the effects of capsicum spray. The terror alert was at its highest level ever, the country was engaged in an unpopular and discredited war in Iraq and Syria, and relations between the government and an increasingly radicalised Muslim minority had broken down. Despite the billions being spent on national security, authorities believed another terrorist attack was inevitable. A demoralised population, saddled with a history of grotesque overregulation, turned inwards, increasingly questioning the failed social creeds of the past. On the streets once vibrant entertainment districts were desolate, while closed and shuttered shops became a characteristic of many suburbs. An optimistic, freedom loving country with an irreverent, larrikin culture and a wildly optimistic view of its place in the world lost faith in its own story. Well documented, switching through multiple points of view, Terror in Australia: Workers' Paradise Lost is a sometimes frightening, sometimes intensely lyrical step inside a democracy in serious trouble. **The Biggest Estate on Earth** S. Chand Publishing

The Story of Australia provides a fresh, engaging and comprehensive introduction to Australia's history and geography. An island continent with distinct physical features, Australia is home to the most enduring Indigenous cultures on the planet. In the late eighteenth century newcomers from distant worlds brought great change. Since that time, Australia has been shaped by many peoples with competing visions of what the future might hold. This new history of Australia integrates a rich body of scholarship from many disciplines, drawing upon maps, novels, poetry, art, music, diaries and letters, government and scientific reports, newspapers, architecture and the land itself, engaging with Australia in its historical, geographical, national and global contexts. It pays particular attention to women and Indigenous Australians, as well as exploring key themes including invasion/colonisation, land use, urbanisation, war, migration, suburbia and social movements for change. Elegantly written, readers will enjoy Australia's story from its origins to the present as the nation seeks to resolve tensions between Indigenous dispossession, British tradition and multicultural diversity while finding its place in an Asian region and dealing with global challenges like climate change. It is an ideal text for students, academics and general readers with an interest in Australian history, geography, politics and culture.

Australia's coral reefs stretch far and wide, covering 50 000 square kilometres from the Indian Ocean in the West to the Pacific Ocean in the East. They have been viewed as a bedrock of coastal livelihoods, as uncharted and perilous nautical hazards, as valuable natural resources, and as unique, natural wonders with secrets waiting to be unlocked. Australia's coral reefs have sustained a global interest as places to visit, and as objects of study, science, protection and conservation."Coral Reefs of Australia" examines our evolving relationship with coral reefs, and explores their mystery and the fast pace at which they are now changing. Corals are feeling the dramatic impacts of global climate change, having undergone several devastating mass coral bleaching events, dramatic species range shifts and gradual ocean acidification. This comprehensive and engaging book brings together the diverse views of Indigenous Australians, coral reef scientists, managers and politicians to reveal how we interact with coral reefs, focussing on Indigenous culture, coastal livelihoods, exploration, discovery, scientific research and climate change. It will inform and inspire readers to learn more about these intriguing natural phenomena and how we can protect coral reefs for the future.

Australia is one of the most ethnically diverse societies in the world today. From its ancient indigenous origins to British colonisation followed by waves of European then international

migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian society and culture. The Australian People documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation.

A landmark history of Australia's first successful settler farming area, which was on the Hawkesbury-Nepean River. Award-winning historian Grace Karskens uncovers the everyday lives of ordinary people in the early colony, both Aboriginal and British. Winner of the Prime Minister's Award for Australian History 2021 Winner of the NSW Premier's Australian History Prize 2021 Co-winner of the Ernest Scott Prize for History 2021 'A masterpiece of historical writing that takes your breath away' - Tom Griffiths 'A majestic book' - John Maynard 'Shimmering prose' - Tiffany Shellam Dyarubbin, the Hawkesbury-Nepean River, is where the two early Australias - ancient and modern - first collided. People of the River journeys into the lost worlds of the Aboriginal people and the settlers of Dyarubbin, both complex worlds with ancient roots. The settlers who took land on the river from the mid-1790s were there because of an extraordinary experiment devised half a world away. Modern Australia was not founded as a gaol, as we usually suppose, but as a colony. Britain's felons, transported to the other side of the world, were meant to become settlers in the new colony. They made history on the river: it was the first successful white farming frontier, a community that nurtured the earliest expressions of patriotism, and it became the last bastion of eighteenth-century ways of life. The Aboriginal people had occupied Dyarubbin for at least 50,000 years. Their history, culture and spirituality were inseparable from this river Country. Colonisation kicked off a slow and cumulative process of violence, theft of Aboriginal children and ongoing annexation of the river lands. Yet despite that sorry history, Dyarubbin's Aboriginal people managed to remain on their Country, and they still live on the river today. The Hawkesbury-Nepean was the seedbed for settler expansion and invasion of Aboriginal lands to the north, south and west. It was the crucible of the colony, and the nation that followed.

Disasters have always occurred in Australia, even before European settlement began in 1788. Such is the geography and climate of the 'Great South Land' that disasters such as bushfires, cyclones, storms, floods, drought and heatwaves are natural phenomena. They also tend to be seasonal and can be successive: bushfires follow periods of drought or heatwave, and floods follow cyclones or storms. The original inhabitants as well as those who came after the First Fleet have had to learn to live with these and to find ways to overcome the impacts. Australia has also occasionally been affected by natural disasters not commonly associated with this part of the world, including earthquakes, tornadoes and landslides. While most do not result in loss of human life or major damage, they are significant owing to their rarity. People tend to equate disasters with loss of human life and this book includes most of the disasters in Australia that have resulted in loss of life. There have been a number with significant loss of life, including Cyclone Mahina in 1899, the Ash Wednesday bushfires of 1983, the Gundagai floods of 1852, Cyclone Tracy in 1974 and the Granville bridge collapse in 1977. There have been also been many where although fewer lives were lost there was a great damage toll on buildings and property, such as the Newcastle earthquake in 1989, the Sydney hail storm of 1999 and the northern Tasmanian floods of 1929. Structural fires are also commonly placed in the disaster category because they are so costly in terms of fatalities, injuries and damage. Many people, however, don't include economic or agricultural impact among the criteria for disasters, which means drought and heatwaves are often disregarded. However, these are synonymous with Australia and many have taken a great toll. This book is part of Exisle Publishing's Little Red Books series. Every title in the Little Red Books series provides an overview of key events, people or places in Australian history. They cover the essentials, bringing the reader up to speed on the most important, fascinating or intriguing facts. Appealing to everyone from students to pensioners who've always wanted to "know a bit about that", they're an essential part of every Australian bookshelf.

'People in Australia's Past - Stories & Activities' has twenty stories of people who shaped Australia's history. Some, like Mary Reibey and James Ruse arrived as convicts with immense

difficulties to overcome. On the other hand, women like Elizabeth Macarthur, Elizabeth Macquarie and Caroline Chisholm came as free settlers, and seeing problems in society, set out to bring change and progress. Other history-makers were native born Australians like David Unaipon, Edith Cowan, John Flynn, Eddie Mabo and Charles Perkins who saw injustice and devoted their time and energy to bring progress in the fields of health, education and law reform. Edmund Barton, Australia's first Prime Minister, was a tireless advocate for the development of Australia's Constitution. 'People in Australia's Past' 2nd edition, has the addition of the important stories of Oodgeroo Noonuccal and Vincent Lingiari who advanced the rights of Aboriginal Australians. Some Australians gained fame through their discoveries or abilities. Douglas Mawson was an explorer who collected valuable scientific information in Antarctica. Charles Kingsford Smith set world records in flying across Australia and around the globe. Banjo Paterson is remembered for his unique stories of life in the Australian bush and for his celebrated song: 'Waltzing Matilda'. Dame Nellie Melba was Australia's first superstar, world famous for her beautiful voice. The stories in this book relate to history topics of the Australian Curriculum, mid to upper primary school levels and are accompanied by language and research activities including crosswords, map activities,

discussion topics, models for writing information texts. Language activity answers are also included. The often harsh and unforgiving Australian landscape was a far cry from what the early colonisers were used to, and it proved a daunting obstacle to settlement. However, a few brave and at times foolhardy men were determined to prove themselves equal to the challenge. Australia's Great Explorers looks at the tragedies and triumphs of men such as...

Dark Emu puts forward an argument for a reconsideration of the hunter-gatherer tag for pre-colonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing, harvesting, irrigating and storing - behaviors inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence comes from the records and diaries of the Australian explorers, impeccable sources.
