Military Implications Of United Nations Peacekeep

Downloaded from intra.itu.edu by guest

SHAMAR LIA

Peacemaking, Peacekeeping and Coalition Warfare Elsevier
 Proceedings of a series of seminars that were held in October 1991 and November 1992. Includes the keynote address by Thomas R. Pickering, then U.S. Rep. to the U.N. Topics include: command, control and coalition operations; defining a role beyond peacekeeping; command and control issues for the military planner; critical considerations for the military commander; and the U.N. contribution to international peacekeeping. Illustrated.

Military Implications of the United Nations Convention on the Law of the Sea Springer

In August 1941 Churchill and Roosevelt met in a secluded bay off the coast of Newfoundland. It was the first of their wartime meetings and in many respects the most significant. The Atlantic Charter, its result, proclaimed the two leaders' vision of a new world order, a set of principles that would govern international relations with the coming of peace. This remarkable collection of

essays is the result of an international conference of American, British, and Canadian scholars held at Memorial University of Newfoundland that marked the 50th anniversary of the historic meeting. The essays discuss both the Charter's formulation and its long-term significance, and provide fascinating perspectives on the Second World War and its aftermath.

The United Nations and Peacekeeping United Nations

The role of the United Nations in collective security has been evolving since its inception in 1945. This book explores collective security as practiced within the legal framework provided by the United Nations Charter, with a particular focus upon activity undertaken under the auspices of the UN Security Council, the body conferred by the Charter with the primary responsibility for the maintenance of international peace and security. Although the book is primarily grounded in international law, where appropriate it also draws upon relevant political insights in order to present a clear picture of the UN collective security system in operation and the factors which impact upon the way in which it functions. Offering a comprehensive analysis it considers the full range of measures which can be utilised by the UN in the performance of its collective security remit including military

enforcement action, peacekeeping, non-military sanctions and diplomacy. The book considers each of these measures in detail, assessing the legal framework applicable to the form of action, the main legal controversies which arise in respect of their appropriate utilisation, and the UN's use of this collective security 'tool' in practice. The book draws conclusions about the main strengths and shortcomings of the various means through which the UN can attempt to prevent, minimise or end conflict.

One of the most vexing issues that has faced the international community since the end of the Cold War has been the use of force by the United Nations peacekeeping forces. UN intervention in civil wars, as in Somalia, Bosnia and Herzegovina, and Rwanda, has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances. When and how should peacekeepers use force to protect themselves, to protect their mission, or, most troublingly, to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice. Drawing on these insights the author examines proposals for future conduct of UN operations, including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.

Changing Security Scenario Springer

Few episodes in recent history have aroused as much controversy as the United Nations military operations in the Congo. This controversy has no simple, straight-forward, and uniform explanation. Part of the explanation is to be found in the successes and failure of the operation itself; part in its labyrinthine international ramifications. But the most important explanation lies in its significance as a precedent. The ability of the Organization to take "collective measures" to maintain law and order within the territory of a Member State, albeit as a means of preserving international peace, was demonstrated, challenged and criticized. So much has been reported of the details and so varied has been the commentary that only the most intrepid spirit would venture something more with which to detain interested parties. The present study does not pretend to uncover new data so as to complete or correct the historical record; it attempts, rather, to reflect on what has already been brought out and, against that background of factual knowledge, to indicate and examine the legal problems involved. In so doing,

it has been necessary to be ruthless in deciding what are central issues and in rejecting what is often interesting but probably peripheral.

The Use of Force in UN Peacekeeping New York : United Nations The Disarmament Study Series highlights United Nations General Assembly studies in the field of disarmament undertaken by groups of governmental experts. Pursuant of resolution 35/141 of 12 December 1980, this report analyzes the economic and social consequences of the arms race and its extremely harmful effects on world peace and security. It points out that the forces driving the arms race, the purposes it serves, and the various forms of its manifestation, have made it a phenomenon adversely affecting global socio-economic options, because its very continuation presupposes conflict and reinforces confrontation.

The 1988 Nobel Peace Prize has thrown into sharp relief the significant role United Nations' peacekeepers have played on the international stage since the first operation 40 years ago. This volume takes stock of our peacekeeping past and present and considers its future. It gives an insider's look at management and financing issues, the views of troop-contributing countries and the effect of operations on peacekeepers and local populations. This volume strengthens the case for peacekeeping in a viable system for international peace and security.

*Military Implications of the United Nations Convention on the Law of the Sea, S. Hrg. 108-796, April 8, 2004, 108-2 Hearing,** Routledge

In the 1990s the UN's potential has been reborn. Now the world must find ways to incorporate elements of that success into the UN system. No single reform or even expansion of UN military power can achieve the necessary changes; rather a series of political and military innovations are needed soon to develop a UN peace and security system. The authors make specific recommendations in the areas of the Security Council, the Military Staff Committee, the Secretary General and the Secretariat, operational elements, regional security

arrangements, and financial resources. Co-published with the International Economic Studies Institute.

Military Implications of NATO Enlargement and Post-conflict Iraq
United Nations

The actions by the United Nations Security Council in the matter of Iraq's attempt to annex Kuwait have lead some observers to conclude that the United Nations is now well positioned to play a consequential role in the maintenance of international order. The coalition formed to meet Iraq's aggression included thirty-seven member states from five continents. This successful action represented a significant precedent for future preventive diplomacy and collective security actions by the world body. As one senior Canadian official somewhat exuberantly observed, a powerful message has been sent: 'the United Nations, can as it was intended, safeguard world order and security.'

This report is in response to mandates of the General Assembly on the economic and social consequences of the arms race. It discusses the dynamics and resources of the arms race, military outlays and socio-economic development and international consequences of the arms race. The analysis reveals a continuity of negative effects but a greater degree of change since its previous reports.

Military Implications of United Nations Peacekeeping Operations
Nova Publishers

The deployment of a large number of soldiers, police officers and civilian personnel inevitably has various effects on the host society and economy, not all of which are in keeping with the peacekeeping mandate and intent or are easily discernible prior to the intervention. This book is one of the first attempts to improve our understanding of unintended consequences of peacekeeping operations, by bringing together field experiences and academic analysis. The aim of the book is not to discredit peace operations but rather to improve the way in which such operations are planned and managed.

Reduction of the Military Budgets of States Permanent Members of the Security Council by 10 Per Cent and Utilization of Part of the Funds Thus Saved to Provide Assistance to Developing

Countries [London?] : United Nations Association

"This book is essential for enhancing one's understanding of international conflict and for the continued relevance of the UN as a key stakeholder and participant in world affairs." --Maj. Gen. Kristin Lund, Head of Mission and Chief of Staff, UN peacekeeping mission in the Middle East (UNTSO) "This outstanding collection is a must-read for anyone interested in the challenges of peacekeeping today." --Dr. Lise Howard, Georgetown University, USA "I would recommend this book to policy makers, peacekeepers and scholars who wish to understand and improve the effectiveness of modern peacekeeping." --Lt. Gen. Carlos Alberto dos Santos Cruz, former Force Commander in the UN missions in the DRC (MONUSCO) and Haiti (MINUSTAH) "This exceptional collection of analyses by experts from both the global North and South will be of interest to practitioners and scholars alike - highly recommended." --Prof. Ramesh Thakur, Australian National University This open access volume explores how UN peace operations are adapting to four trends in the changing global order: (1) the rebalancing of relations between states of the global North and the global South; (2) the rise of regional organisations as providers of peace; (3) the rise of violent extremism and fundamentalist non-state actors; and (4) increasing demands from non-state actors for greater emphasis on human security. It identifies emerging conflict and peace trends (robustness of responses, rise of non-state threats, cross-state conflicts) and puts them in the context of tectonic shifts in the global order (rise of emerging powers, North-South rebalancing, emergence of regional organisations as providers of peace). The volume stimulates a discussion between practitioners and academics, offering an analysis of how the international community collectively makes sense of the changing global order and its implications for UN peace operations. Cedric de Coning is Senior Research Fellow at the Norwegian Institute of International Affairs (NUPI), Norway and Senior Advisor for the African Centre for the Constructive Resolution of Disputes (ACCORD), South Africa. Mateja Peter is Lecturer at the University of St. Andrews, UK and Senior Research Fellow at the Norwegian Institute of International Affairs (NUPI), Norway.

Economic and Social Consequences of the Arms Race and of Military Expenditures Ashgate Publishing, Ltd.

Drawing from a diverse range of military, policing, academic and policymakers' experiences, this book seeks to provide solutions of how national militaries and police can work together to better support future United Nations peacekeeping operations. It addresses the growing tension between increasing non-combat related responsibilities being placed on land forces and the ability of UN peacekeeping forces to fulfil the demands of government and development tasks in fragile and conflict-affected environments. An original contribution to the debate on UN peacekeeping reforms that includes constructing an enhanced partnership for peacekeeping; building on renewed commitment to share the burden and for regional cooperation; providing peacekeepers with the necessary capabilities to protect civilians; and supporting nations in transition from conflict to stabilisation. This book offers the very latest in informed analysis and decision-making on UN peacekeeping reform.

United Nations Peacekeeping Challenge Springer

Disarmament: The Human Factor covers the proceedings of a colloquium on the Societal Context for Disarmament, sponsored by UNITAR and Planetary Citizens and held at the United Nations, New York. The book focuses on the dynamics of disarmament and security policies, including the political and military implications of disarmament. The selection first discusses the neglected human factors of disarmament. The exchanges focus on humanizing the approach to disarmament, conditions and

obsolete perceptions, and approaches on disarmament and international security. The book also ponders on global community values, such as globalism in space, time, global institutions, and education. The text examines the psychodynamics of arms and peace races and the psychological considerations in survival in a nuclear world. The manuscript also tackles the requirements for alternative mechanisms in guaranteeing international peace and security under progressive disarmament and the remarks of Ambassador Piero Vinci on the need to instill measures to effectively imposed disarmament. The publication is a dependable source of data for readers and international security experts interested in the dynamics of disarmament and international security policies.

Military Implications of United Nations Peacekeeping Operations
United Nations

This edited volume provides a detailed and nuanced analysis of UN peacekeeping and the use of force, to inform a better understanding of the complex and interconnected issues at stake for the UN community. Peacekeeping is traditionally viewed as a

largely passive military activity, governed by the principles of impartiality, consent, and the minimum use of force. Today, most large UN Peacekeeping Operations are only authorized to use force in defence of their mandates and to protect civilians under imminent threat of physical violence. Recently, with the deployment of the Force Intervention Brigade in the DRC, the UN has gone beyond peacekeeping and into the realm of peace-enforcement. These developments have brought to the fore questions regarding the use of force in the context of peacekeeping. The key questions addressed in this book examine not only the utility of force, but also the dilemmas and constraints inherent to the purposive use of force at a strategic, operational and tactical level. Should UN peacekeepers exercise military initiative? Is UN peacekeeping capable of undertaking offensive military operations? If so, then under what circumstances should peacekeepers use force? How should force be wielded? And against whom? With chapters written by experts in the field, this comprehensive volume will be of great use and interest to postgraduate students, academics and experts in international security, the UN, peacekeeping and diplomacy.
