Gardening Without Poisons

Artech House
Mobile Communicat
This book examines
the complex and
under-researched
relationship between
recruitment
experiences and
reintegration outcomes
for child soldiers. It
looks at time spent in
the group, issues of
cohesion,
identification,
affiliation, membership
and the post
demobilization
experience of return,
and resettlement.

Sexual Crime and Intellectual Functioning

Touchstone
New to the Wiley

Series in Forensic
Clinical Psychology,
Offence Paralleling
Behaviour presents an
original framework of
individualised
assessment and
treatment methods for
clinicians working in
the forensic
environment. Provides
a framework that helps
practitioners to identify
and work with offence-
relevant behaviour and
evidence pro-social
change Describes how
Offence Paralleling
Behaviour (OPB) can
be successfully
identified and used in
risk assessment and
treatment planning
Brings together leading
academics and
frontline clinicians,
including psychiatric
nurses, psychologists,
psychiatrists,
occupational
therapists, drug and
alcohol specialists, and

correctional officers, as well as featuring the views of prisoners on OPB Presents methods which allow staff to identify and use OPB in clinical practice

An Integrated Theory of Sexual Offending
MIT Press

This volume of comparative studies documents the continuing relevance of the state in environmental politics and policy. The book also demonstrates the analytical power of the comparative approach to the study of environmental politics and policy, offering cross-national comparisons of environmental governance in both developed and developing countries. Some chapters are based on qualitative studies from a small

number of countries; others offer statistical analyses of quantitative data from many more countries over a longer time period.

Tearing Apart the Land Springer

Germany boasts one of the strongest environmental records in the world. The Rhine River is cleaner than it has been in decades, recycling is considered a civic duty, and German manufacturers of pollution-control technology export their products around the globe. Yet, little has been written about the country's remarkable environmental history, and even less of that research is available in English. Now for the first time, a survey of the country's natural and cultural landscapes is available

in one volume. Essays by leading scholars of history, geography, and the social sciences move beyond the Green movement to uncover the enduring yet ever-changing cultural patterns, social institutions, and geographic factors that have sustained Germany's relationship to its land. Unlike the American environmental movement, which is still dominated by debates about wilderness conservation and the retention of untouched spaces, discussions of the German landscape have long recognized human impact as part of the "natural order." Drawing on a variety of sites as examples, including forests, waterways, the Autobahn, and natural

history museums, the essays demonstrate how environmental debates in Germany have generally centered on the best ways to harmonize human priorities and organic order, rather than on attempts to reify wilderness as a place to escape from industrial society. Germany's Nature is essential reading for students and professionals working in the fields of environmental studies, European history, and the history of science and technology.

Interconnection Regulation and Contract Law John Wiley & Sons

Since January 2004, a violent separatist insurgency has raged in southern Thailand, resulting in more than three thousand deaths.

Though largely unnoticed outside Southeast Asia, the rebellion in Pattani and neighboring provinces and the Thai government's harsh crackdown have resulted in a full-scale crisis. *Tearing Apart the Land* by Duncan McCargo, one of the world's leading scholars of contemporary Thai politics, is the first fieldwork-based book about this conflict. Drawing on his extensive knowledge of the region, hundreds of interviews conducted during a year's research in the troubled area, and unpublished Thai-language sources that range from anonymous leaflets to confessions extracted by Thai security forces, McCargo locates the

roots of the conflict in the context of the troubled power relations between Bangkok and the Muslim-majority "deep South." McCargo describes how Bangkok tried to establish legitimacy by co-opting local religious and political elites. This successful strategy was upset when Thaksin Shinawatra became prime minister in 2001 and set out to reorganize power in the region. Before Thaksin was overthrown in a 2006 military coup, his repressive policies had exposed the precariousness of the Bangkok government's influence. A rejuvenated militant movement had emerged, invoking Islamic rhetoric to challenge the authority

of local leaders obedient to Bangkok. For readers interested in contemporary Southeast Asia, insurgency and counterinsurgency, Islam, politics, and questions of political violence, *Tearing Apart the Land* is a powerful account of the changing nature of Islam on the Malay peninsula, the legitimacy of the central Thai government and the failures of its security policy, the composition of the militant movement, and the conflict's disastrous impact on daily life in the deep South. Carefully distinguishing the uprising in southern Thailand from other Muslim rebellions, McCargo suggests that the conflict can be ended

only if a more participatory mode of governance is adopted in the region.

Political Legitimation in Communist States

Peachpit Press

"While you're reading *Neuro Web Design*, you'll probably find yourself thinking 'I already knew that...' a lot. But when you're finished, you'll discover that your ability to create effective web sites has mysteriously improved. A brilliant idea for a book, and very nicely done." - Steve Krug, author of *Don't Make Me Think! A Common Sense Approach to Web Usability* Why do people decide to buy a product online? Register at your Web site? Trust the information you provide? *Neuro Web Design* applies the

research on motivation, decision making, and neuroscience to the design of Web sites. You will learn the unconscious reasons for people's actions, how emotions affect decisions, and how to apply the principles of persuasion to design Web sites that encourage users to click. *Neuro Web Design* employs "neuro-marketing" concepts, which are at the intersection of psychology and user experience. It's scientific, yet you'll find it accessible, easy to read, and easy to understand. By applying the concepts and examples in this book, you'll be able to dramatically increase the effectiveness and conversion rates of your own Web site.

The State and the Global Ecological Crisis
Rutgers University Press

This book explores sexual crime and intellectual functioning. Drawing on expertise from clinical practice and applied research, the volume begins with an exploration of the theoretical and historical background to the interest in links between sexual offending and intellectual functioning. The authors then move on to discuss assessment of intellectual functioning in prison, interventions for low intellectual functioning, autistic spectrum and personality disorder. This book offers a rare insight into the phenomenon of high IQ and sexual offending, a much neglected aspect

of the sexual crime literature, and includes novel research that unpacks this link. It further offers an extraordinary insight into the experiences of a person of superior IQ in the criminal justice system for a sexual offence. The book is relevant not only to psychologists, criminologists, social workers and students, but also to practitioners, researchers and the general public with an interest in learning about sexual offending and intellectual functioning.

Neuro Web Design

Good Year Books
Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy, experts explore

responses to environmental problems across nations and political systems.

'The SAGE Handbook of Conflict Resolution demonstrates the range of themes that constitute modern conflict resolution. It brings out its key issues, methods and dilemmas through original contributions by leading scholars in a dynamic and expanding field of inquiry. This handbook is exactly what it sets out to be: an indispensable tool for teaching, research and practice in conflict resolution' - Peter Wallensteen, Professor of Peace and Conflict Research, Uppsala

University and University of Notre Dame 'Bercovitch, Kremenyuk and Zartman are among the most important figures in the conflict resolution field. They have pieced together, with the help of more than 35 colleagues from numerous countries, a state-of-the-art review of the sources of international conflict, available methods of conflict management, and the most difficult challenges facing the individuals and organizations trying to guide us through these conflict-ridden times. The collection is brimming with penetrating insights, trenchant analyses, compelling cases, and disciplined speculation. They help us understand both the

promise of as well as the obstacles to theory-building in the new field of conflict resolution' - Lawrence Susskind, Professor and Director of the MIT - Harvard Public Disputes Program 'The last three sentences of this persuasive book: "We conclude this volume more than ever convinced that conflict resolution is not just possible or desirable in the current international environment. It is absolutely necessary. Resolving conflicts and making peace is no longer an option; it is an intellectual and practical skill that we must all possess." If you are part of that "we," intellectually or professionally, you will find this book a superb companion' - Thomas C Schelling, Professor

Emeritus, Harvard University and University of Maryland Conflict resolution is one of the fastest-growing academic fields in the world today. Although it is a relatively young discipline, having emerged as a specialized field in the 1950's, it has rapidly grown into a self-contained, vibrant, interdisciplinary field. The SAGE Handbook of Conflict Resolution brings together all the conceptual, methodological and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters. The Handbook is designed to reflect where the field is today by drawing on the contributions of

experts from different fields presenting, in a systematic way, the most recent research and practice. Jacob Bercovitch is Professor of International Relations, and Fellow of the Royal Society, at the University of Canterbury in Christchurch, New Zealand. Victor Kremenyuk is deputy director of the Institute for USA and Canada Studies, Russian Academy of Sciences, Moscow. He is also a research associate at IIASA. I. William Zartman is Jacob Blaustein Professor of Conflict Resolution and International Organization at the Nitze School of Advanced International Studies of Johns Hopkins University
The Second Self
 Wiley-Blackwell

This overview brings you up-to-date on technologies for low-speed data, speech, and broadband communications, competing standards, adjacent technologies, new generation networks, and future developments. It includes all developments in European mobile telecommunications technology up to 1998.

The Essen Climate Evaluation Schema
EssenCES SAGE

The interrelationships of living organisms, in soil, crop plants, weeds, and plant pests are the main consideration in this approach to the modern pesticide problem.

Mobile Telecommunications

Springer
The book will introduce

the Integrated Theory of Sexual Offending (ITSO) and start with a general overview. The core assumptions of the theory will be examined in subsequent chapters (eg the biological component, the neuropsychological systems and social competency problems), which will include the evidence and supporting theory for ITSO. The final chapters will sketch out the practical implications of ITSO for risk assessment and treatment.

Legacy and Legitimacy
Cornell University Press

The first comprehensive examination of Black Americans? attitudes toward the Supreme Court.

Offence Paralleling Behaviour MIT Press

Explores the prospects for reinstating the state as the facilitator of environmental protection, through analyses and case studies of the green democratic potential of the state and the state system.

Policy Statement of the Council of Ministers

Artech House

The social atmosphere in forensic hospitals and prisons is crucial to their success - this "manual and more" shows how to assess the climate and identify ways of improving it. The social climate in settings such as forensic psychiatric hospitals and prisons is crucial to their success. The Essen Climate Evaluation Schema (EssenCES) described here is a short, well-validated questionnaire that measures three

essential facets of an institution's social atmosphere. An overview of the EssenCES is followed by detailed advice on how to administer and score it and how to interpret findings, as well as reference norms from various countries and types of institution. The EssenCES "manual and more" is thus a highly useful tool for researchers, clinicians, and service managers working in forensic settings.

The United Nations Environment

Programme MIT Press

In *The Second Self*, Sherry Turkle looks at the computer not as a "tool," but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to

explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. "Technology," she writes, "catalyzes changes not only in what we do but in how we think." First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture-to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a

new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners-people confronting machines that seem to think and at the same time suggest a new way for us to think-about human thought, emotion, memory, and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the

introduction to this edition, Turkle quotes a PDA user as saying, "When my Palm crashed, it was like a death. I thought I had lost my mind." Why we think of the workings of a machine in psychological terms-how this happens, and what it means for all of us-is the ever more timely subject of *The Second Self*. Book jacket.

Child Soldiers: From Recruitment to Reintegration Temple University Press
Gain a thorough understanding of the dynamics of today's mobile telecommunications standards with this unique new resource. The book examines the development and adoption trajectories of major European standards, such as

UMTS, GSM, ERMES, and TETRA. It presents a framework that analyzes the factors that influenced each standard's level of success, and includes the most-comprehensive case studies on these standards.

Politics in Germany

Subnational conflict is the most widespread, enduring, and deadly form of conflict in Asia. Over the past 20 years (1992-2012), there have been 26 subnational conflicts in South and Southeast Asia, affecting half of the countries in this region. Concerned about foreign interference, national governments limit external access to conflict areas by journalists, diplomats, and personnel from international

development agencies and non-governmental organizations. As a result, many subnational conflict areas are poorly understood by outsiders and easily overshadowed by larger geopolitical issues, bilateral relations, and national development challenges. The

interactions between conflict, politics, and aid in subnational conflict areas are a critical blind spot for aid programs. This study was conducted to help improve how development agencies address subnational conflicts.
