This joint publication from the United Nations Environment Programme and the World Tourism Organization sets out guidance on effective measures to promote sustainable tourism development. Although it is acknowledged that there is not a 'one size fits all', the report highlights the need for co-operation by all key stakeholders within and outside government. Therefore, although the guidance is designed primarily for governments, it is also relevant to public authorities, non-governmental organisations, tourism businesses and trade associations.

Fair Game tells the story of the Kruger's hidden history and heritage, from its establishment as the Sabi Reserve in 1898 to its eventual declaration as a national park, and beyond. It's an engrossing tale filled with stubborn personalities, twists of fate, unlikely heroes, greedy villains and (luckily) a very happy ending. So, prepare yourself for a grand historical safari as we recount the little-known tale of an unwanted wasteland that grew into the one of the greatest game reserves in the world. The Kruger National Park is an internationally renowned wildlife sanctuary and one of South Africa's top tourist attractions. However, this wasn't always the case. For the first 30 years of the park's existence, it was very unpopular and many people downright hated the idea of a reserve dedicated to the preservation of animals ('But what's the point of looking at the things?', one critic decried). In fact, without the dedication and fortitude of a handful of champions, the park would likely have been abandoned, diluted or deproclaimed altogether.

Also included: a comprehensive planning guide and custom maps to help you make the most of your visit to the Kruger National Park.

South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. Beyond Memory: Recording the History, Moments and Memories of South African Music is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

In 1994, the new South African Government made a firm commitment to an integrated and sustainable programme of transformation, which was expressed through the Reconstruction and Development Programme(RDP). Despite impressive achievements in several aspects of its ambitious transformation programme, SA's development outcomes remain uneven and weak, particularly in the area of pro-poor economic transformation.

In explaining how developments in the Kruger National Park have been integral to the wider political and socio-economic concerns of South Africa, this text opens an alternative perspective on its history. Nature protection has evolved in response to a variety of stimuli including white self-interest, Afrikaner nationalism, ineffectual legislation, elitism, capitalism and the exploitation of Africans.

Kruger National Park and Mpumalanga Rough Guides Snapshot South Africa (includes Pilgrim's Rest, Blyde River Canyon, Nelspruit, and Hazyview) Penguin

The introduction of transfrontier conservation areas (TFCAs) in southern Africa was based on an enchanting promise: simultaneously contributing to global biodiversity conservation initiatives, regional peace and integration, and the sustainable socio-economic development of rural communities. Cross-border collaboration and eco-tourism became seen as the vehicles of this promise, which would enhance regional peace and stability along the way. However, as these highly political projects take shape, conservation and development policymaking progressively shifts from the national to regional and global arenas, and the peoples most affected by TFCA formation tend to disappear from view. This book focuses on the forgotten people displaced by, or living on the edge of, protected wildlife areas. It moves beyond the grand 'enchanting promise' of conservation and development across frontiers, and unfounded notions of TFCAs as integrated social-ecological systems. Peoples' dependency on natural resources – the specific combination of crop cultivation, livestock keeping and natural resource harvesting activities – varies enormously along the conservation frontier, as does their reliance on resources on the other side of the conservation boundary. Hence, the studies in this book move from the dream of eco-tourism-fuelled development supporting nature conservation and people towards the local realities facing marginalized people, living adjacent to protected areas in environments often poorly suited to agriculture.

The Routledge Handbook of Tourism Experience Management and Marketing offers a comprehensive and thorough inquiry into both customary and emergent issues of tourism experience and co-creation. Drawing together contributions from 83 authors from 28 countries with varied backgrounds and interdisciplinary interests, the handbook highlights multiple representations and interpretations of the theme. It also integrates a selection of illustrative global case studies to effectively present its chapter contents. Tourism experience drives the contemporary tourist's behavior as they travel in pursuit of experiencing unique and unusual destinations and activities. Creating a memorable and enduring experience is therefore a prerequisite for the all tourism business organizations irrespective of the nature of their products or services. This handbook focuses on conceptualizing, designing, staging, managing and marketing paradigms of tourism experiences from both supply and demand perspectives. It sheds substantial light on the contemporary theories, practices and future developments in the arena of experiential tourism management and marketing. Encompassing the latest thinking and research themes, this will be an essential reference for upper-level students, researchers, academics and industry practitioners of hospitality as well as those of tourism, gastronomy, management, marketing, consumer behavior, cultural studies, development studies and international business, encouraging dialogue across disciplinary boundaries.

Kruger National Park and Ecotourism

The dismantling of the apartheid regime in South Africa caused massive transformation in both geographical and economic terms, not only in this country but also in the region as a whole. As the post-apartheid government enters its second term, this captivating volume assesses its progress in unravelling the geography of apartheid, both in South Africa itself and in its relationships with other countries in Southern Africa and Africa. It also considers the ways in which South Africa, now that it is no longer a pariah state, has begun to position itself within the current global economy. Examining South Africa's land and agriculture, mining and minerals, manufacturing, tourism, corporate finance, the labour market and transport, the volume discusses the challenges of balancing growth and redistribution, the extent and nature of progress, change and relationships within the regional and global economy. A compelling investigation into the economics of South Africa's neighbouring states in relation to their natural resources, colonialism and inter-relationships with themselves and with South Africa leads to a focus on the region as a whole and its relations with the global economy.
