*Deep Future* Independently Published

The first investigative analysis of how corporate interests gained control of America's most popular winter sport, and how they are gutting ski towns, the natural mountain environment, and skiing itself in the desperate search for short-term profit.

### **Fifty Places to Ski & Snowboard Before You Die**

Createspace Independent Publishing Platform

After decades of debate, sweeping changes have transformed the financial services industry. At the same time, more and more Canadians are turning to professionals to invest their money and

arrange their financial affairs. John J. De Goey argues that financial advisors are changing the way they do business. Instead of earning commissions for placing products, they are increasingly charging fees for rendering more professional services. In the process, they are putting the interests of their clients ahead of the interests of their employers and product suppliers. Investors are finally becoming empowered to make informed decisions about whom they work with. This book will help them avoid the industry's bad apples. This fourth edition is updated to keep you on top of recent changes in the industry and is written in an accessible manner. Whether you work in the financial services industry or are currently an investor, it should be required reading.

**Multifunctional Landscapes** University of Pennsylvania Press

Crossing the Owl's Bridge uses the wisdom of worldwide folk tales to demonstrate how to share, ritualize, and transform grief. Each chapter describes psychological tasks as communicated through folk tales, offers stories about others, and provides guidelines for application. The premise is that although we do have to say goodbye to our material relationship, we are also being presented with a chance to say hello to a different type of relationship. Crossing the Owl's Bridge illustrates creative outcomes to mourning that allow one to recognize, contain, release, and yet stay in relationship and keep loving. Kim Bateman, Ph.D., has facilitated grief workshops and taught courses in Death and Dying for over 20 years. Her research interests include bereavement, organizational psychology, and humor, and she has presented over 60 projects in the behavioral sciences at regional and national psychology conferences. Dr. Bateman has delivered many notable keynote addresses, including: "There's a Fox Under My Bed and Pixie Dust in My Hair," at the Developmental Psychology Conference, "The Psychology of Humor" at the Women's Wellness Conference, and "College Culture Through the Song Lyrics of Bob Marley," at the Community College League of California convention. She recently presented a TEDx talk called "Singing Over Bones." Dr. Bateman serves as the executive dean of the Tahoe-Truckee Campus of Sierra College.

#### The Story of Modern Skiing National Geographic Books

Sit back and enjoy this children's book parody about a squirrel named Dee and his friends love for his big nuts. Each page will have you laughing and going nuts! This may look like a typical children's book but once the book opens, you will enjoy

references that only adults will understand. Dee's Big Nuts makes a great gift for birthdays, anniversaries, bridal shower, wedding gifts, housewarming gifts or just a great gift to make a friend or loved one giggle in laughter.

#### *Forests, Trees and Human Health* Springer Science & Business Media

Beginning with an overview of data and concepts developed in the EU-project HABIT-CHANGE, this book addresses the need for sharing knowledge and experience in the field of biodiversity conservation and climate change. There is an urgent need to build capacity in protected areas to monitor, assess, manage and report the effects of climate change and their interaction with other pressures. The contributors identify barriers to the adaptation of conservation management, such as the mismatch between planning reality and the decision context at site level. Short and vivid descriptions of case studies, drawn from investigation areas all over Central and Eastern Europe, illustrate both the local impacts of climate change and their consequences for future management. These focus on ecosystems most vulnerable to changes in climatic conditions, including alpine areas, wetlands, forests, lowland grasslands and coastal areas. The case studies demonstrate the application of adaptation strategies in protected areas like National Parks, Biosphere Reserves and Natural Parks, and reflect the potential benefits as well as existing obstacles. A general section provides the necessary background information on climate trends and their effects on abiotic and biotic components. Often, the parties to policy change and conservation management, including managers, land users and stakeholders, lack both expertise and

incentives to undertake adaptation activities. The authors recognise that achieving the needed changes in behavior – habit – is as much a social learning process as a matter of science-based procedure. They describe the implementation of modeling, impact assessment and monitoring of climate conditions, and show how the results can support efforts to increase stakeholder involvement in local adaptation strategies. The book concludes by pointing out the need for more work to communicate the cross-sectoral nature of biodiversity protection, the value of well-informed planning in the long-term process of adaptation, the definition of acceptable change, and the motivational value of exchanging experience and examples of good practice.

A blank notebook to help you keep organized during your busy day. This 6x9 notebook with 100 pages of lined paper is the perfect size to carry around with you and keep in your purse or bag. It's great for taking notes, making lists, journaling, or using as a diary. It also makes a great gift idea! SIZE: 6x9 inches PAPER: 100 pages of lined paper COVER: Soft cover

*Original Story* by Macmillan

A Kirkus Reviews Best Nonfiction of 2011 title A bold, far-reaching look at how our actions will decide the planet's future for millennia to come. Imagine a planet where North American and Eurasian navies are squaring off over shipping lanes through an acidified, ice-free Arctic. Centuries later, their northern descendants retreat southward as the recovering sea freezes over again. And later still, future nations plan how to avert an approaching Ice Age... by burning what remains of our fossil fuels. These are just a few of the events that are likely to befall

Earth and human civilization in the next 100,000 years. And it will be the choices we make in this century that will affect that future more than those of any previous generation. We are living at the dawn of the Age of Humans; the only question is how long that age will last. Few of us have yet asked, "What happens after global warming?" Drawing upon the latest, groundbreaking works of a handful of climate visionaries, Curt Stager's *Deep Future* helps us look beyond 2100 a.d. to the next hundred millennia of life on Earth.

*Managing Protected Areas in Central and Eastern Europe Under Climate Change* Chiron Publications

Amsterdamse Bos, Bois de Boulognes, Epping Forest, Hong Kong's country parks, Stanley Park: throughout history cities across the world have developed close relationships with nearby

woodland areas. In some cases, cities have even developed – and in some cases are promoting – a distinct ‘forest identity’. This book introduces the rich heritage of these city forests as cultural landscapes, and shows that cities and forests can be mutually beneficial. Essential reading for students and researchers interested in urban sustainability and urban forestry, this book also has much wider appeal. For with city forests playing an increasingly important role in local government sustainability programs, it provides an important reference for those involved in urban planning and decision making, public affairs and administration, and even public health. From providers of livelihoods to healthy recreational environments, and from places of inspiration and learning to a source of conflict, the book presents examples of city forests from around the world. These cases clearly illustrate how the social and cultural development of towns and forests has often gone hand in hand. They also reveal how better understanding of city forests as distinct cultural and social phenomena can help to strengthen synergies both between cities and forests, and between urban society and nature.

**Rural Tourism in Europe** Simon and Schuster

This work is a large, powerfully illustrated interdisciplinary natural sciences volume, the first of its kind to examine the critically important nature of ecological paradox, through an abundance of lenses: the biological sciences, taxonomy, archaeology, geopolitical history, comparative ethics, literature, philosophy, the history of science, human geography, population ecology, epistemology, anthropology, demographics, and futurism. The ecological paradox suggests that the human biological—and from an insular perspective, successful—struggle to exist has come at

the price of isolating *H. sapiens* from life-sustaining ecosystem services, and far too much of the biodiversity with which we find ourselves at crisis-level odds. It is a paradox dating back thousands of years, implicating millennia of human machinations that have been utterly ruinous to biological baselines. Those metrics are examined from numerous multidisciplinary approaches in this thoroughly original work, which aids readers, particularly natural history students, who aspire to grasp the far-reaching dimensions of the Anthropocene, as it affects every facet of human experience, past, present and future, and the rest of planetary sentience. With a Preface by Dr. Gerald Wayne Clough, former Secretary of the Smithsonian Institution and President Emeritus of the Georgia Institute of Technology. Foreword by Robert Gillespie, President of the non-profit, Population Communication.

**Lost Ski Areas of Southern Vermont** Springer Science & Business Media

There are many reasons why strategic intelligence is required to support policy decisions. These primarily stem from the nature of today's knowledge society with two contrasting trends. On the one hand, there is a trend of increasing human intelligence in the economic, social and political systems. On the other hand, there is a trend towards dissolving certainties about the problems and solutions of today's society. Clearly, more information does not necessarily imply more certainties on how to act. What is more, the same facts are often interpreted in markedly different ways: the same policy relevant information can – and often does – result in conflicting framing of a problem by different stakeholders. This is mainly due to competing assumptions,

rather than because of inconsistent facts. Therefore, it is not surprising that policy-makers are calling for strategic intelligence to support their understanding of today's challenges, including the relevant aspects of science and technology, their impact and their possible future developments. Over the last 15 years, Europe has rapidly adopted the practice of developing and using Impact Assessment (IA) tools to support decision-making. Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States. The adoption of IA procedures alone, however, does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation.

Wilmington: 6x9 College Ruled Notebook to Write in with Skyline of Wilmington, North Carolina Coach House Books

This is the definitive history of the sport that has exhilarated and infatuated about 30 million Americans and Canadians over the course of the last fifty years. Consummate insider John Fry chronicles the rise of a ski culture and every aspect of the sport's development, including the emergence of the mega-resort and advances in equipment, technique, instruction, and competition. *The Story of Modern Skiing* is laced with revelations from the author's personal relationships with skiing greats such as triple Olympic gold medalists Toni Sailer and Jean-Claude Killy, double gold medalist and environmental champion Andrea Mead Lawrence, first women's World Cup winner Nancy Greene, World Alpine champion Billy Kidd, Sarajevo gold and silver medalists Phil and Steve Mahre, and industry pioneers such as Vail founder Pete Seibert, metal ski designer Howard Head, and plastic boot

inventor Bob Lange. Fry writes authoritatively of alpine skiing in North America and Europe, of Nordic skiing, and of newer variations in the sport: freestyle skiing, snowboarding, and extreme skiing. He looks closely at skiing's relationship to the environment, its portrayal in the media, and its response to social and economic change. Maps locating major resorts, records of ski champions, and a timeline, bibliography, glossary, and index of names and places make this the definitive work on modern skiing. Skiers of all ages and abilities will revel in this lively tale of their sport's heritage.

*Best Backcountry Skiing in the Northeast* Appalachian Mountain Club

This book presents definitions, key concepts and projects in landscape research and related areas, such as landscape science and landscape ecology, addressing and characterising the international role, status, challenges, future and tools of landscape research in the globalised world of the 21st century. The book brings together views on landscapes from leading international teams and emerging authors from different scientific disciplines and regions of the globe. It describes approaches for achieving sustainability and for handling the multifunctionality of landscapes and includes international case studies demonstrating the great potential of landscape research to provide partial sustainable solutions while developing cultural landscapes and protecting semi-natural landscapes. It is intended for scientists from various disciplines as well as informed readers dealing with landscape policies, planning, evolution, management, stewardship and conservation.

Bie's loving tributes to Steamboat is illustrated with dramatic photos which capture the colorful history and other glories of Steamboat then and now. 180 photos.

### **Snow Guns Before Sunrise** Hal Leonard Corporation

Ever wonder what it's like to operate a snowcat, or even run the whole show as a ski resort General Manager? Get ready to lift the veil on your favorite sport, and discover how every other business venture is made boring in the shadow of the ski resort industry! Snow Guns Before Sunrise will let you in on all the secrets as you walk, and ski, in the boots of ski industry insiders to see what really goes on behind the scenes. Complete with job descriptions, "a-day-in-the-life-of" details, and anecdotes from industry professionals, you'll discover everything you wanted to know, and then some, about the inner workings of a ski resort. Get a glimpse of the complexity of the ski operation and its many moving parts, and explore the mystique of working in the mountains for the sake of skiing. You'll learn the metrics by which a ski area measures success, and read about the "unsung heroes" behind the scenes. For skiers who want to know more about what it takes to deliver their favorite sport to the masses, Snow Guns Before Sunrise answers all the questions that come to mind on a quiet and thoughtful lift ride, or in a spirited online discussion: Why aren't they making snow on my favorite trail? How is corduroy made? What does it take to be a ski area manager? With these kind of lift ticket prices, ski areas must be flush with cash, right? If they just let me run the place, it would be so much better. Or would it? Snow Guns Before Sunrise is where you'll find out! For anyone thinking of a career in the ski industry, Snow Guns Before Sunrise is your primer. Regardless of

your particular area of interest in ski area operations, having a big-picture understanding will make you a better employee, and provide you with the insight it takes to get noticed as a potential leader. For professionals already working in the industry, Snow Guns Before Sunrise offers you a fresh perspective and refines your literacy of different areas of the ski area operation. You'll catch yourself chuckling as you relate on many levels from your own ski resort experience! Snow Guns Before Sunrise is the book to read if you like to ski and want to know more about how ski areas actually operate, so boot up and get ready to load the lift that takes you inside the resort operation!

Bluetongue and Related Orbiviruses National Academies Press  
Satellite remote sensing is the primary tool for measuring global changes in the land, ocean, biosphere, and atmosphere. Over the past three decades, active remote sensing technologies have enabled increasingly precise measurements of Earth processes, allowing new science questions to be asked and answered. As this measurement precision increases, so does the need for a precise geodetic infrastructure. Evolving the Geodetic Infrastructure to Meet New Scientific Needs summarizes progress in maintaining and improving the geodetic infrastructure and identifies improvements to meet new science needs that were laid out in the 2018 report *Thriving on Our Changing Planet: A Decadal Strategy for Earth Observation from Space*. Focusing on sea-level change, the terrestrial water cycle, geological hazards, weather and climate, and ecosystems, this study examines the specific aspects of the geodetic infrastructure that need to be maintained or improved to help answer the science questions being considered.

*Sustainability Impact Assessment of Land Use Changes*

Secretariat of Convention

The director, screenwriter, and playwright provides a look into his world, introducing the wide array of stars he has met over the years and revealing the hardship and joy that comes with a life in show business.

[Policies, Methods and Tools for Visitor Management](#) Springer Verlag

Using Toronto as a case study, *Subdivided* asks how cities would function if decision-makers genuinely accounted for race,

ethnicity, and class when confronting issues such as housing, policing, labor markets, and public space. With essays contributed by an array of city-builders, it proposes solutions for fully inclusive communities that respond to the complexities of a global city. Jay Pitter is a writer and professor based in Toronto. She holds a Masters in Environmental Studies from York University. John Lorinc is a Toronto-based journalist who writes about urban affairs, politics, and business. He co-edited *The Ward: The Life and Loss of Toronto's First Immigrant Neighbourhood* (Coach House, 2015).
