personnel.
This latest
2011 edition is

a quick field reference that summarizes selected safety standards from the California Code of Regulations. The major subject headings are alphabetized and cross-referenced within the text, and it has a detailed index. Spiral bound, 8.5 x 5.5"

Ask a**Manager**

Staywell (CA)
From the creator of the popular website Ask a Manager and New York's work-advice

columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in

this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with

your work •
 your
 cubemate's
 loud
 speakerphone
 is making you
 homicidal •
 you got drunk
 at the holiday
 party Praise
 for Ask a
 Manager "A
 must-read for
 anyone who
 works . . .
 [Alison
 Green's]
 advice boils
 down to the
 idea that you
 should be
 professional
 (even when
 others are
 not) and that
 communicatin
 g in a
 straightforwar
 d manner with
 candor and
 kindness will
 get you far, no

matter where
 you
 work."—Bookli
 st (starred
 review) "The
 author's
 friendly,
 warm, no-
 nonsense
 writing is a
 pleasure to
 read, and her
 advice can be
 widely applied
 to
 relationships
 in all areas of
 readers' lives.
 Ideal for
 anyone new to
 the job market
 or new to
 management,
 or anyone
 hoping to
 improve their
 work
 experience."—
 Library Journal
 (starred
 review) "I am
 a huge fan of

Alison Green's
 Ask a Manager
 column. This
 book is even
 better. It
 teaches us
 how to deal
 with many of
 the most
 vexing big and
 little problems
 in our
 workplaces—a
 nd to do so
 with grace,
 confidence,
 and a sense of
 humor."—Rob

 Simon and Schuster

Presents the latest electrical regulation code that is applicable for electrical wiring and equipment installation for all buildings, covering emergency situations, owner liability, and procedures for ensuring public and workplace safety.
Near-Miss Book AIHA
 This new edition focuses on preparing your students to assume the role as a significant member of

the health-care team and manager of care, and is designed to help your students transition to professional nursing practice.
 Developed as a user-friendly text, the content and style makes it a great tool for your students in or out of the classroom.
 (Midwest).
Construction Forms for Contractors F
 A Davis Company
 The Construction Chart Book presents the most

complete data available on all facets of the U.S. construction industry: economic, demographic, employment/income, education/training, and safety and health issues. The book presents this information in a series of 50 topics, each with a description of the subject matter and corresponding charts and graphs. The contents of The Construction Chart Book are relevant to owners,

contractors, unions, workers, and other organizations affiliated with the construction industry, such as health providers and workers compensation insurance companies, as well as researchers, economists, trainers, safety and health professionals, and industry observers. *Guidelines for Preventing Workplace Violence for Health-care and Social-service Workers*

Construction
Research and
Training
In the
Occupational
Safety and
Health Act of
1970,
Congress
declared that
its purpose
was to assure,
so far as
possible, safe
and healthful
working
conditions for
every working

man and
woman and to
preserve our
human
resources. In
this Act, the
National
Institute for
Occupational
Safety and
Health
(NIOSH) is
charged with
recommending
occupational
safety and
health
standards and
describing
exposure
concentrations
that are safe
for various
periods of
employment-
including but
not limited to
concentrations
at which no
worker will
suffer
diminished

health,
functional
capacity, or
life
expectancy as
a result of his
or her work
experience.
By means of
criteria
documents,
NIOSH
communicates
these
recommended
standards to
regulatory
agencies
(including the
Occupational
Safety and
Health
Administration
[OSHA]) and
to others in
the
occupational
safety and
health
community.
Criteria
documents

provide the scientific basis for new occupational safety and health standards. These documents generally contain a critical review of the scientific and technical information available on the prevalence of hazards, the existence of safety and health risks, and the adequacy of control methods. In addition to transmitting these documents to the

Department of Labor, NIOSH also distributes them to health professionals in academic institutions, industry, organized labor, public interest groups, and other government agencies. In 1972, NIOSH published Criteria for a Recommended Standard: Occupational Exposure to Noise, which provided the basis for a recommended standard to reduce the risk of developing permanent

hearing loss as a result of occupational noise exposure [NIOSH 1972]. NIOSH has now evaluated the latest scientific information and has revised some of its previous recommendations. The 1998 recommendations go beyond attempting to conserve hearing by focusing on preventing occupational noise-induced hearing loss (NIHL). This criteria document reevaluates and reaffirms the

recommended exposure limit (REL) for occupational noise exposure established by the National Institute for Occupational Safety and Health (NIOSH) in 1972. The REL is 85 decibels, A-weighted, as an 8-hr time-weighted average (85 dBA as an 8-hr TWA). Exposures at or above this level are hazardous. By incorporating the 4000-Hz audiometric frequency into the definition of hearing impairment in

the risk assessment, NIOSH has found an 8% excess risk of developing occupational noise-induced hearing loss (NIHL) during a 40-year lifetime exposure at the 85-dBA REL. NIOSH has also found that scientific evidence supports the use of a 3-dB exchange rate for the calculation of TWA exposures to noise. The recommendations in this document go beyond attempts to conserve

hearing by focusing on prevention of occupational NIHL. For workers whose noise exposures equal or exceed 85 dBA, NIOSH recommends a hearing loss prevention program (HLPP) that includes exposure assessment, engineering and administrative controls, proper use of hearing protectors, audiometric evaluation, education and motivation, recordkeeping, and program

audits and evaluations. Audiometric evaluation is an important component of an HLPP. To provide early identification of workers with increasing hearing loss, NIOSH has revised the criterion for significant threshold shift to an increase of 15 dB in the hearing threshold level (HTL) at 500, 1000, 2000, 3000, 4000, or 6000 Hz in either ear, as determined by two consecutive tests. To permit timely

intervention and prevent further hearing losses in workers whose HTLs have increased because of occupational noise exposure, NIOSH no longer recommends age correction on individual audiograms.

Occupational Noise Exposure

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the

2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had

changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration . While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

OSH Survey Operating Manual

From the makers of OET. Test and build your English skills with this official OET Nursing resource. This Practice Test Book includes:* Three OET practice tests with answer keys* An overview of OET and how the test is scored* The Test-Taker's Information Guide* Key assessment criteria* Useful language information.**
