Fragile Dwelling Maker Media, Inc.

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city.

These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop

managers, designers, and architects.

Reading Behind Bars John Wiley & Sons

A step-by-step guide to building an electric motorcycle from the ground up Written by alternative fuel expert Carl Vogel, this hands-on guide gives you the latest technical information and easy-to-follow instructions for building a two-wheeled electric vehicle--from a streamlined scooter to a full-sized motorcycle. *Build Your Own Electric Motorcycle* puts you in hog heaven when it comes to hitting the road on a reliable, economical, and environmentally friendly bike. Inside, you'll find complete details on every component, including motor, batteries, and frame. The book covers electric motorcycles currently on the market and explains how to convert an existing vehicle. Pictures, diagrams, charts, and graphs illustrate each step along the way. Whether you want to get around town on a sleek ride or cruise the super slab on a tricked-out chopper, this is the book for you. *Build Your Own Electric Motorcycle* covers: Energy savings and environmental benefits Rake, trail, and

fork angle Frame and design Batteries and chargers DC and AC motor types Motor controllers Accessories and converters Electrical system and wiring Conversion process Safety, maintenance, and troubleshooting

"A dark, suburban fantasy . . . richly funny, even whimsical, and bizarrely familiar." —*The New Yorker* In the seaside community of Donald Antrim's Elect Mr. Robinson for a Better World, the citizens are restless. The mayor has fired stinger missiles into the Botanical Garden reflecting pool, and his public execution was a messy affair. As these hawkish suburbanites fortify their houses with deadly moats and land mines, a former third-grade teacher named Pete Robinson steps forward with a tenuous bid to replace the mayor. But can anyone satisfy the terrible will of the people? By turns funny and phantasmagorical, fiercely intelligent and imaginative, Donald Antrim's story of suburban civics turned macabre is a new American classic. [DeLong's Guide to](#)

Bicycles & Bicycling

Bloomsbury Publishing
While feminists have long recognised the importance of self-managed, alternative media to transport their messages, to challenge the status quo, and to spin novel social processes, this topic has been an under-researched area. Hence, this book explores the processes of women's and feminist media production in the context of participatory spaces, technology, and cultural citizenship. The collection is composed of theoretical analyses and critical case studies. It highlights contemporary alternative feminist media in general as well as blogs, zines, culture jamming, and street art.

Control Your Mind and Master Your Feelings

Nostalgia Road
This book showcases how new and emerging technologies like Unmanned Aerial Vehicles (UAVs) are trying to provide solutions to unresolved socio-economic and environmental problems. Unmanned vehicles can be classified into five different types according to their operation. These five types are unmanned ground vehicles, unmanned aerial vehicles,

unmanned surface vehicles (operating on the surface of the water), unmanned underwater vehicles, and unmanned spacecraft. Unmanned vehicles can be guided remotely or function as autonomous vehicles. The technology has a wide range of uses including agriculture, industry, transport, communication, surveillance and environment applications. UAVs are widely used in precision agriculture; from monitoring the crops to crop damage assessment. This book explains the different methods in which they are used, providing step-by-step image processing and sample data. It also discusses how smart UAVs will provide unique opportunities for manufacturers to utilise new technological trends to overcome the current challenges of UAV applications. The book will be of great interest to researchers engaged in forest carbon measurement, road patrolling, plantation monitoring, crop yield estimation, crop damage assessment, terrain modelling, fertilizer control, and pest control. **Invisible Bicycle** McGraw-Hill Professional
A guide to the decline of

the American empire for individuals, families and communities The United States is in steep decline. Plagued by runaway debt, a shrinking economy, and environmental catastrophes to rival Chernobyl, the United States has been retracing the trajectory of the Soviet Union in the early 1980s toward national bankruptcy and political dissolution. By comparing a collapse that has run its course to one that is now unfolding, Dmitry Orlov holds a unique lens up to America's present and future. As Orlov's predictions continue to come true, his writing continues to gain mainstream acceptance. This revised and updated edition of *Reinventing Collapse* examines the circumstances of the demise of the Soviet superpower and offers clear insights into how we might prepare for the events that are unfolding here. Orlov gives no quarter to prophets of doom and gloom, finding plenty of room for optimism, if only we focus our efforts on personal and cultural transformation instead of trying to perpetuate an impossible status quo. This challenging yet inspiring and surprisingly

upbeat work is a must-read for anyone concerned about peak oil, the environment, geopolitics, international relations, and life in a resource-constrained world. Dmitry Orlov is an American engineer who was an eyewitness to the Soviet collapse and has written extensively on the subject of the impending collapse of the United States.

Greenstream Publishing
Miniature vintage and classic caravans & otherwise known as `tinies& and `teardrops& & have become hugely

popular in recent years, due to their dinkiness and versatility. The good use of compact spaces and the appeal of quality design have always caught Don and Marilyn Jessen's imagination, and their travels have connected them with a wide variety of people at the forefront of the `tinies& and `teardrops& movement. This book pulls together a collection of these small but perfectly formed mobile spaces from across Australia and New Zealand.

Comprehensive, bilingual volume from Norway's sage; translated by the Roberts Bly and Hedin. [To Life!](#) Center Point
The purpose of this book is to provide a basic understanding of the aerodynamics involved in designing an ultra-streamlined land vehicle. It describes many of the important design goals

and parameters for producing a low-drag body. It is designed to be a how-to manual for the budding ground-up solar car and ultralight vehicle constructor, as well as the solar/electric/ultralight vehicle enthusiast.

New edition! Revealing why Morgan returned to its original 3 Wheeler concept. How the new 3 Wheeler was created, became a bestseller. Shows what it's like to drive, strengths, weaknesses, and factory improvements made since the 2011 launch - from modifications, possible developments, and even why it is - or isn't - your kind of vehicle.

The 100 Greatest

American Cars Haynes Publishing UK

Once upon a time, I watched an episode of Top Gear test three track-day cars. Richard Hammond turned up in a Morgan 3-Wheeler. I had never seen or heard of the 3-Wheeler before, but I immediately developed an intense need to have one. This book describes my journey. his book is not a set of plans to build your own 3-Wheeler. A set of plans would require you

to follow my build exactly, make the same compromises I made, and want exactly what I came up with. This book is, instead, a documentation of the process I went through to build my own 3-Wheeler. I encountered many new problems to solve in building my 3-Wheeler and I hope an examination of how I solved those problems will help you with your project.

User's Guide Springer Nature
The all-color practical Build Your Own Sports Car provides all the information needed to build a road-going two-seater, open-top sports car on a budget, using

standard tools, basic skills and low-cost materials. The down-to-earth text clearly explains each step along the road to producing a well-engineered, high-performance sports car, providing a learning experience in engineering and design - and opening up a whole new world of fun motoring. The Haynes Roadster, which has fully independent rear suspension, has been designed with the aid of CAD software to develop the chassis and suspension, resulting in a car with performance and handling to challenge many established kit cars and mainstream sports cars. The design is intended to make use of components sourced primarily from a Ford Sierra donor, although alternative donors are mentioned.

The Latest Advances in Universal Design
Thoroughly updated and packed with examples of global standards and design solutions, Universal Design Handbook, Second Edition, covers the full scope of universal design, discussing how to develop media, products, buildings, and

infrastructure for the widest range of human needs, preferences, and functioning. This pioneering work brings together a rich variety of expertise from around the world to discuss the extraordinary growth and changes in the universal design movement. The book provides an overview of universal design premises and perspectives, and performance-based design criteria and guidelines. Public and private spaces, products, and technologies are covered, and current and emerging research and teaching are explored. This unique resource includes analyses of historical and contemporary universal design issues from seven different countries, as well as a look at future trends. Students, advocates, policy makers, and design practitioners will get a theoretical grounding in and practical reference on the physical and social roles of design from this definitive volume.

Elect Mr. Robinson for a Better World Picador

This proceedings book includes papers that cover the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics and advanced engineering methods. Authors of the papers selected for this book are experts from research, industry and universities, coming from different

countries. The overall objectives of the presentations are to respond to the major challenges faced by the automotive industry, and to propose potential solutions to problems related to automotive technology, transportation and environment, and road safety. The congress is organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with SAE International. The purpose is to gather members from academia, industry and government and present their possibilities for investigations and research, in order to establish new future collaborations in the automotive engineering and transport domain. This proceedings book is just a part of the outcomes of the congress. The results presented in this proceedings book benefit researchers from academia and research institutes, industry specialists, Ph.D. students and students in Automotive and Transport Engineering programs.

Solar Electricity Handbook Springer Nature

In December 2008, twentysomething Jill Grunenwald graduated with her master's degree

in library science, ready to start living her dream of becoming a librarian. But the economy had a different idea. As the Great Recession reared its ugly head, jobs were scarce. After some searching, however, Jill was lucky enough to snag one of the few librarian gigs left in her home state of Ohio. The catch? The job was behind bars as the prison librarian at a men's minimum-security prison. Talk about baptism by fire.
