YARELI RAMOS

Two Prisoners Oxford

University Press

This book analyses the use of the expression 'serious violations of human rights', and similar ones, such as 'gross' or

'grave', in international practice. It highlights some of the recurring responses and consequences to such violations and suggests

that a new special regime - eponymous to the above-mentioned expression - was formed. This special regime is understood as substantively limited to a very specific issue-area of human rights violations. Within this regime, a series of monitoring mechanisms and procedures are in place to highlight, document, and record such violations; specific measures are taken to enforce compliance; and certain consequences arise focused on remedying the

victims of such violations. As such, this special regime is comprised of at least four thinly interconnected components: the substantive, the monitoring, the enforcement, and the remedial ones. This monograph constitutes a first step towards the recognition of such a regime, allowing far more constructive and coherent elaboration in the future. Practice around this category of violations may well evolve in a different direction than the one

suggested here. However, what becomes apparent from this work is that the serious violations of human rights are a key notion in the international legal order as it allows the international community to depict those factual situations requiring its attention and action.

AWS A5. 23/A5.

23M-2011,

Specification for Low-

Alloy Steel Electrodes and Fluxes for Submerged Arc Welding AWS A5. 23/A5. 23M-2011, Specification for Low-Alloy Steel Electrodes and Fluxes for Submerged Arc Welding This specification provides requirements for the classification of solid and composite carbon steel and low-alloy steel electrodes and fluxes for submerged arc welding. Electrode classification is based on chemical composition of the electrode for solid electrodes, and chemical

composition of the weld metal for composite electrodes. Fluxes may be classified using a multiple pass classification system or a two-run classification system, or both, under this specification. Multiple pass classification is based on the mechanical properties and the deposit composition of weld metal produced with the flux and an electrode classified herein. Two-run classification is based upon mechanical properties only. Additional requirements are included for sizes, marking,

manufacturing and packaging. The form and usability of the flux are also included. A guide is appended to the specification as a source of information concerning the classification system employed and the intended use of submerged arc fluxes and electrodes. This specification makes use of both the International System of Units (SI) and U.S. Customary Units. Since these are not equivalent, each must be used independently of the other. AWS A5. 1/A5.

1M-2004, Specification for Carbon Steel Electrodes for Shielded Metal Arc Welding Historic Paxton, Her Days and Her Ways, 1722-1913 Paxton Presbyterian Church is located in Paxtang, Pa., a few miles east of Harrisburg, Pa., and is not to be confused with Paxton, Pa., located to the north of Harrisburg in Upper Paxton Township. Serious Violations of Human Rights Miette lives with her retired father and meets the handsome but wilful

Peter who falls passionately in love with her. Tormented by jealousy he pursues her and they marry. Their idyll is destroyed by the onset of war, when Peter joins the army and ends up a prisoner of war of the Russians. *My Granny Is a Queen* Oxford University Press Today, 215 million people live outside their home countries and another 700 million say they would migrate to another country if they could. This volume examines the ways both sending and

receiving nations are modifying their migration policies to control entry, to encourage assimilation, and to build links between diasporas and their home countries.

Adjusting to a World in Motion

Told in the voice of their adoring grandchildren, this book offers a heartwarming description of grandmothers as royalty. From Baba's royal throne to Nonna and her box of precious-jewels grandmothers truly are the queens of the family! *Historic Paxton, Her Days*

and Her Ways, 1722-1913
This specification provides requirements for the classification of solid and composite carbon steel and low-alloy steel electrodes and fluxes for submerged arc welding. Electrode classification is based on chemical composition of the electrode for solid electrodes, and chemical composition of the weld metal for composite electrodes.
