abstract: The
ability to read
is an
important
prerequisite
for
participating
in social life.

Without it, many areas of daily life are not accessible. It was precisely under this aspect that the results of the Pisa study presented to the public were all the more shocking. The findings regarding the reading motivation of pupils indicated that 42% of the participating German 15-year-olds never read for pleasure, including not only reading books but also newspapers and

magazines. However, since my topic is "Promoting reading motivation in primary school", one might ask why findings from the PISA study are cited that do not show the performance of primary school students but that of 15-year-old school leavers. The reason is that these poor results are rooted in the beginning of the school years. If primary school teachers do not succeed in

conveying "reading" as something enjoyable and enriching from the beginning, children will not see reading as something personally valuable either and may turn their backs on books already during their primary school years and migrate to other media such as computers or game consoles. The central question of the is which social factors have a promoting and inhibiting

effect on children's motivation to read and to what extent primary school can contribute to creating a long-term love of reading among pupils. First, the family environment is discussed as an important influencing factor in the development of a person's reading motivation. The second important influencing factor will be school, whereby I will limit myself to primary school.

Starting with motivation problems at the beginning of the initial lessons, through problems in the continuing reading lessons, to the motivation problem among boys. Gender-specific differences in reading behaviour will be explained and attempted explanations given. In addition, school-based solution perspectives are pointed out. The last chapter of this thesis deals

with practical support possibilities, i.e. it shows methods that the primary school teacher can use in class to increase the reading motivation of his pupils.

 All the World an Icon is the fourth book in an informal "quartet" of works by Tom Cheetham on the spirituality of Henry Corbin, a

major twentieth-century scholar of Sufism and colleague of C. G. Jung, whose influence on contemporary religion and the humanities is beginning to become clear. Cheetham's books have helped spark a renewed interest in the work of this important, creative religious thinker. Henry Corbin (1903-1978) was professor of Islamic religion at the Sorbonne in Paris and director of the	department of Iranian studies at the Institut Franco-Iranien in Teheran. His wide-ranging work includes the first translations of Heidegger into French, studies in Swedenborg and Boehme, writings on the Grail and angelology, and definitive translations of Persian Islamic and Sufi texts. He introduced such seminal terms as "the imaginal realm" and "theophany" into Western thought, and his use of the	Shi'ite idea of ta'wil or "spiritual interpretation" influenced psychologist James Hillman and the literary critic Harold Bloom. His books were read by a broad range of poets including Charles Olson and Robert Duncan, and his impact on American poetry, says Cheetham, has yet to be fully appreciated. His published titles in English include Creative Imagination in the Sufism of

<p>Ibn Arabi, Avicenna and the Visionary Recital, and The Man of Light in Iranian Sufism. As the religions of the Book place the divine Word at the center of creation, the importance of hermeneutics, the theory and practice of interpretation, cannot be overstated. In the theology and spirituality of Henry Corbin, the mystical heart of this tradition is to be found in the creative, active imagination;</p>	<p>the alchemy of spiritual development is best understood as a story of the soul's search for the Lost Speech. Cheetham eloquently demonstrates Corbin's view that the living interpretation of texts, whether divine or human—or, indeed, of the world itself seen as the Text of Creation—is the primary task of spiritual life. In his first three books on Corbin, Cheetham explores</p>	<p>different aspects of Corbin's work, but has saved for this book his final analysis of what Corbin meant by the Arabic term ta'wil—perhaps the most important concept in his entire oeuvre. "Any consideration of how Corbin's ideas were adapted by others has to begin with a clear idea of what Corbin himself intended," writes Cheetham; "his own intellectual and spiritual cosmos is</p>

already highly complex and eclectic and a knowledge of his particular philosophical project is crucial for understanding the range and implications of his work." Cheetham lays out the implications of ta'wil as well as the use of language as integral part of any artistic or spiritual practice, with the view that the creative imagination is a fundamentally linguistic phenomenon for the Abrahamic religions, and,

as Corbin tells us, prayer is the supreme form of creative imagination. **ASSIMIL - German with ease (Lehrbuch + 4 Audio-CDs)** Yale University Press Annie and her friends are enjoying a lazy day by the lake when ominous clouds appear. In the scramble to escape the storm, Annie's cousin Gina goes missing. After a fruitless search in the rain, the teens call the police

for help. But as the days pass without a trace of the lost girl, nerves fray, accusations begin to fly, and disturbing information about the relationships Annie holds so dear come to light. If a girl can't trust her best friends, who can she trust? *All the World an Icon* Routledge This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries

from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perenis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography -

action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the wealth of European language diversity as found in dictionaries by developing and testing new digital annotation tools and a historical morphological dictionary prototype.  For some time

now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books to be devoted to

work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the

"advances" type, carrying the subtitle Progress in Cognitive Development Research. Volumes in the Progress sequence are strongly thematic, in that each is limited to some well-defined domain of cognitive-developmental research (e. g. , logical and mathematical development, semantic development). All Progress volumes are edited collections. Editors of such books, upon consultation

with the Series Editor, may elect to have their works published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors will be published as separate volumes within the series. A fairly broad definition of cognitive development is being used in the selection of books for this series.

The Routledge Handbook of Literacy Studies offers a comprehensive view of the field of language and literacy studies. With forty-three chapters reflecting new research from leading scholars in the field, the Handbook pushes at the boundaries of existing fields and combines with related fields and disciplines to develop a lens on

contemporary scholarship and emergent fields of inquiry. The Handbook is divided into eight sections:

- The foundations of literacy studies
- Space-focused approaches
- Time-focused approaches
- Multimodal approaches
- Digital approaches
- Hermeneutic approaches
- Making meaning from the everyday
- Co-constructing literacies with communities.

This is the first handbook of literacy

studies to recognise new trends and evolving trajectories together with a focus on radical epistemologies of literacy. The Routledge Handbook of Literacy Studies is an essential reference for undergraduate and postgraduate students and those researching and working in the areas of applied linguistics and language and literacy. Annotation A response to the book that generated wide-scale public discussion and controversy about libraries and archives. **Guide to Microforms in Print** Routledge Lobotomy is a lurid and unlikely temperance tract from the underbelly of rock 'n' roll. Taking readers on a wild rollercoaster ride from his crazy childhood in Berlin and Munich to his lonely methadone-

soaked stay at a cheap hotel in Earl's Court and newfound peace on the straight and narrow, Dee Dee Ramone catapults readers into the raw world of sex, addiction, and two-minute songs. It isn't pretty. With the velocity of a Ramones song, Lobotomy rockets from nights at CBGB's to the breakup of the Ramones' happy family with an unrelenting backbeat of hate and squalor: his girlfriend ODs;

drug buddy Johnny Thunders steals his ode to heroin, "Chinese Rock"; Sid Vicious shoots up using toilet water; and a pistol-wielding Phil Spector holds the band hostage in Beverly Hills. Hey! Ho! Let's go!	political aspirations of the progressive left. <u>The Deliberate Corruption of Climate Science</u> Birkhäuser In Benjamin's Library, Jane O. Newman offers, for the first time in any language, a reading of Walter Benjamin's notoriously opaque work, <u>Origin of the German Tragic Drama</u> that systematically attends to its place in discussions of the Baroque in Benjamin's day. Taking into account	the literary and cultural contexts of Benjamin's work, Newman recovers Benjamin's relationship to the ideologically loaded readings of the literature and political theory of the seventeenth-century Baroque that abounded in Germany during the political and economic crises of the Weimar years. To date, the significance of the Baroque for <u>Origin of the German Tragic Drama</u>
---	--	--

has been glossed over by students of Benjamin, most of whom have neither read it in this context nor engaged with the often incongruous debates about the period that filled both academic and popular texts in the years leading up to and following World War I. Armed with extraordinary historical, bibliographical, philological, and orthographic research, Newman shows the extent to which

Benjamin participated in these debates by reconstructing the literal and figurative history of sixteenth- and seventeenth-century books that Benjamin analyzes and the literary, art historical and art theoretical, and political theological discussions of the Baroque with which he was familiar. In so doing, she challenges the exceptionalist, even hagiographic, approaches that have become

common in Benjamin studies. The result is a deeply learned book that will infuse much-needed life into the study of one of the most influential thinkers of the twentieth century.

Mit Niegeschichte liefert Dietmar Dath eine Einführung in sein liebstes Thema:

Science Fiction. Seine kenntnisreiche Theoriegeschichte und persönliche Genre-Erkundung ist eine Einladung an alle, spekulative Literatur als hochrelevant für unsere Zukunft zu begreifen – gerade weil sie von dem erzählt, was so nie stattfinden wird. Egal ob als Serie auf Netflix, im Radio oder als Comic oder Buch: Science Fiction erlebt in den letzten Jahren eine Wiederbelebung, geradezu	einen Boom. Steckt dahinter Eskapismus angesichts der Schief lagen in unserer Gegenwart oder handelt es sich um den Hunger nach Möglichkeiten, die Welt anders zu denken? Für Dietmar Dath ist Science Fiction Teil seiner Biografie und weit mehr als Sternenerstörer und Perry-Rhodan-Hefte. Sie ist auch Form und Methode, eine Art der Wissensproduktion. Die Geschichte	des Genres erzählt er als eine Eroberungsgeschichte, die einen Bogen schlägt von Mary Shelley, Jules Verne und H. G. Romantic Ireland is definitely dead and gone. With the exhilarating Eureka Street, Robert McLiam Wilson cheerfully and obscenely sends it to its grave. Jake Jackson, his thoughtful anti-hero,

finds Belfast's tragedies are built on comedy: Catholics and Protestants so intent on declaring their differences "resembled no one now as much as they resembled each other.... That was what I liked about Belfast hatred. It was a lumbering hatred that could survive completely on the memories of things that never existed in the first place." He spends a certain amount of time worrying about

seeming too Catholic and an equal amount worrying about not seeming sufficiently Catholic. Sometimes, after several drinks, Jake forgets that he's not a Protestant. Each position is as dangerous, and absurd, as the other. His best friend is less torn up. Chuckie Lurgan is a chubby Methodist whose only accomplishments so far have been shaking Reagan's

hand, appearing in the same photo as the Pope, and having "an intense and troubling relationship with mail-order catalogues." But Chuckie suddenly surprises Jake with his first entrepreneurial scheme. Though he's placed an ad for an enormous sex toy in Northern Ireland's "only mucky paper," he hasn't any intention of ever fulfilling an order. Instead, he follows legal

protocol and sends each disappointed customer a refund check, in the proper amount, stamped GIANT DILDO REFUND. The gamble is that most people will be too embarrassed to cash them. "Chuckie smiled the smile of the just-published poet." And soon he has more than 40,000 pounds in the bank and a lust for big money. He also has a rich, new girlfriend: "He hoped his dreams

wouldn't suffer from all this reality." Jake is more preoccupied with the day-to-day. His construction site job gives him ample opportunity to consider his romantic failures and the ever-present symbols of war. There's also a new graffito that has sprouted among the various deadly acronyms. IRA, UVF, and UDA make no more sense than OTG, but at least everyone knows what

they stand for. OTG becomes a puzzle to all of Belfast--is it, the authorities wonder, a new terrorist group? (Jake also notes several other phrases, FTP, FTQ, and FTNP--the "T" stands for the and "P" and "Q" for Pope and Queen. The "N" is for Next.) Despite his love for Belfast, Jake loses heart with its zealots and fanatics and, halfway through, Eureka Street threatens to slide into windy bathos.

It's only a momentary lapse amid energetic, colloquial poetry and comic realism. Shame Matters Springer Science & Business Media Christopher Dawson concludes that the period of

the fourth to the eleventh centuries, commonly known as the Dark Ages, is not a barren prelude to the creative energy of the medieval world. Instead, he argues that it is better described as "ages of dawn" for it is in this rich and confused period that the complex and creative interaction of the Roman empire, the Christian Church, the classical tradition, and barbarous societies provided the

foundation for a vital, unified European culture. In an age of fragmentation and the emergence of new nationalist forces, Dawson argued that if "our civilization is to survive, it is essential that it should develop a common European consciousness and sense of historic and organic unity." But he was clear that this unity required sources deeper and more complex than the

political and economic movements on which so many had come to depend, and he insisted, prophetically, that Europe would need to recover its Christian roots if it was to survive. In a time of cultural and political ambiguity, The making of Europe is an indispensable work for understanding not only the rich sources but also the contemporary implications of the very idea of Europe.
