Guidance in Today's Schools New York : Wiley

There is a fundamental discrepancy between man as he is and man as he could be, if only he recognized his true being and purpose. Ethics is the discipline by which man can understand how he can pass from the first condition to the second. Udo Schaefer's Bah ' Ethics in Light of Scripture is an attempt to analyse the underlying structures and detect the interior architecture of the Bah ' moral system and is a step towards developing a Bah ' moral theology. Doctrinal Fundamentals, the first of two volumes, provides a historical overview of the Bah ' Faith, a systematic survey of its doctrines and an overview of the origin and derivation of moral values. It considers the metaphysical nature of human beings and human responsibilities, looks at reason and conscience, and explores liberty and its limits. Schaefer's second volume deals with concrete values - the virtues, divine commandments and principles of social ethics from a Bah ' perspective.

The School Counselor's Guides is a set of three volumes, providing a tailored guidance curriculum for Elementary, Middle, and High School students, including approximately 100 classroom activities that are organized and designed to meet the National Standards created by the American School Counselor Association (ASCA). These activities can be used in the design of a comprehensive guidance curriculum, which addresses the academic, career, and personal/social development of all students. Each of The Guides provide assessment instruments that allow counselors to measure how school counseling programs make a difference for their students. These assessment instruments measure the guidance curriculum's effectiveness to promote the academic, career, and personal/social developmental domains. These publications have been assembled in three-ring binders in order to make it convenient for the user to photocopy handouts for students and easily transport the day's lesson plans before returning them to the binder for storage.

Fundamentals of Guidance and Counselling

Elementary teachers spend considerable time advising and counseling while teaching pupils to read, spell and add. High school teachers find an increasing demand for assistance in educational, vocational, and personal matters. Colleges now see the need for offering guidance service to our older youth and adults. While much guidance can and must be done by the classroom teacher, some guidance teachers with special training must be available to help students. This book then considers the essentials of a good guidance program and the personnel necessary to make it effective. The four final chapters of the text deal with the budget, public relations, circulation of guidance information, and evaluation of the guidance program.
