Daily Lives of Civilians in Wartime Modern America

The hundreds of illuminated miniatures found in the Cantigas de Santa Maria, sponsored by King Alfonso X (1252-84), reveal many vistas of daily life in thirteenth century Spain. No other source provides such an encyclopedic view of all classes of medieval European society, from kings and popes to the lowest peasants. Men and women are seen farming, hunting, on pilgrimage, watching bullfights, in gambling dens, making love, tending silkworms, eating, cooking, and writing poetry, to name only a few of the human activities represented here. Combining keen observation of detail with years of experience in the field, John Keller and Annette Grant Cash bring to life a world previously little explored.

Temporal Experiments Hendrickson Publishers

In post-Civil War America, civilians were ordinarily far-removed from the actual fighting. War brought about tremendous and far-

reaching changes to America's society, politics, and economy nonetheless. Readers are offered detailed glimpses into the lives of ordinary folk struggling with the privations, shortages, and anxieties brought on by U.S. entry into war. They are also shown how they strove to turn changing times to their advantage, especially civically and economically, as minorities pressed for political inclusion and traders profited from government contracts and women took on well-paying skilled jobs in large numbers for the first time. Susan Badger Doyle's chapter on the Indian Wars in the American West shows how for whites the migration westward was the path to a land of opportunity, for Native Americans migration it was a disastrous epoch that led to their near-extermination. Michael Neiberg's piece on World War I highlights how America's entry into the war on the Allied side was far from universally popular or supported because of large German and Irish immigrant communities, and how this tepid support led to the creation of some of the harshest censorship and curtailment of civil rights in U.S. history. Judy Litoff's chapter on the home front during World War II focuses on the exceptional changes brought on by total mobilization for the war effort, African-Americans' push for expanded civil rights, to women entering the workforce in large numbers, to the public's acceptance, even expectation, of centralized planning and government intervention in economic and social matters. Jon Timothy Kelly's essay on the Cold War provides a look at how the country quickly returned to a state of readiness when the end of World War II ushered in the Cold War and the immanent threat of nuclear annihilation, even as a booming economy brought undreamt of material prosperity to huge numbers of Americans. Finally, James Landers describes how American involvement in Vietnam, the first televised war, profoundly changed American attitudes about war even as this particular conflict touched few Americans, but divided them like few previous events have.

Reading films, television dramas, reality shows, and virtual exhibits, among other popular texts, *Engaging the Past* examines the making and meaning of history for everyday viewers. Contemporary media can encourage complex interactions with the past that have far-reaching consequences for history and politics. Viewers experience these representations personally, cognitively, and bodily, but, as this book reveals, not just by identifying with the characters portrayed. Some of the works considered in this volume include the films *Hotel Rwanda* (2004), *Good Night and Good Luck* (2005), and *Milk* (2008); the television dramas *Deadwood*, *Mad Men*, and *Rome*; the reality shows *Frontier House*, *Colonial House*, and *Texas Ranch House*; and *The Secret Annex Online*, accessed through the Anne Frank House website, and the *Kristallnacht* exhibit, accessed through the United States Holocaust Museum website. These mass cultural texts cultivate what Alison Landsberg calls an "affective engagement" with the past, tying the viewer to an event or person and fostering a sense of intimacy that does more than transport the viewer back in time. Affect, she suggests, can also work to disorient the viewer, forcibly pushing him or her out of the narrative and back into his or her own body. By analyzing these specific popular history formats, Landsberg shows the unique way they provoke historical thinking and produce historical knowledge, prompting a reconsideration of what constitutes history and an understanding of how history works in the contemporary mediated public sphere.

Several encyclopedias overview the contemporary system of criminal justice in America, but full understanding of current social problems and contemporary strategies to deal with them can come only with clear appreciation of the historical underpinnings of those problems. Thus, this five-volume work surveys the history and philosophy of crime, punishment, and criminal justice institutions in America from colonial times to the present. It covers the whole of the criminal justice system, from crimes, law enforcement and policing, to courts, corrections and human services. Among other things, this encyclopedia: explicates philosophical foundations underpinning our system of

justice; charts changing patterns in criminal activity and subsequent effects on legal responses; identifies major periods in the development of our system of criminal justice; and explores in the first four volumes - supplemented by a fifth volume containing annotated primary documents - evolving debates and conflicts on how best to address issues of crime and punishment. Its signed entries in the first four volumes--supplemented by a fifth volume containing annotated primary documents--provide the historical context for students to better understand contemporary criminological debates and the contemporary shape of the U.S. system of law and justice.

Applying interdisciplinary perspectives about everyday life to vital issues in the lives of older people, this book maps together the often taken-for-granted aspects of what it means to age in an ageist society. Part of the Ageing in a Global Context series, the two parts address the materialities and the embodiments of everyday life respectively. Topics covered include household possessions, public and private spaces, older drivers, media representations, dementia care, health-tracking, dress and sexuality. This focus on micro-sociological conditions allows us to rethink key questions which have shaped debates in the social aspects of ageing. International contributions, including from the UK, USA, Sweden and Canada, provide a critical guide to inform thinking and planning our ageing futures.

Indispensable for the student or researcher studying women's history, this book draws upon a wide array of cultural settings and time periods in which women displayed agency by carrying out their daily economic, familial, artistic, and religious obligations. Since record keeping began, history has been written by a relatively few elite men. Insights into women's history are left to be gleaned by scholars who undertake careful readings of ancient literature, examine archaeological artifacts, and study popular culture, such as folktales, musical traditions, and art. For some historical periods and geographic regions, this is the only way to develop some sense of what daily life might have been like for women in a particular time and place. This reference explores the daily life of women across civilizations. The work is organized in sections on different civilizations from around the world, arranged chronologically. Within each society, the encyclopedia highlights the roles of women within five broad thematic categories: the arts, economics and work, family and community life, recreation and social customs, and religious life. Included are numerous sidebars containing additional information, document excerpts, images, and suggestions for further reading.

Readable and scholarly, this up-to-date book covers every aspect of the life of women in ancient Egypt. This book focuses on the life of women in ancient Egypt, while also putting forth a vast array of information about ancient Egyptians in general. Readers begin with a short but thorough introduction to the three great periods of Pharaonic civilization: the Old Kingdom, the Middle Kingdom, and the New Kingdom. Main chapters include the newest evidence scholars have uncovered at important archeological sites in ancient Egypt. The scope of this book is wide and all inclusive, even though it is focused on the life of ancient Egyptian women. The topics in the book cover a vast amount of the knowledge we have about the ancient Egyptians, including material on architecture, art, law, education, medicine, food, religion, music, and spiritual beliefs. It is important to point out that royal women are only discussed in one chapter, so that more "ordinary" ancient Egyptians are the focus of the book. This book is also designed to be readable for people without any background knowledge of the time period. Any reader interested in ancient Egypt will discover a great deal of material.

Temporal Experiments: Seven Ways of Configuring Time in Art and Literature conducts an expansive exploration of different modes of timing. Its seven chapters pursue the question of time as it is embodied in key figures that shape both aesthetic and pragmatic life. Working closely with literary, visual, and musical artworks, the book aims to provoke new ways of engaging with the question of time. It treats artworks as experiments that launch temporal figures, and that test out the possibilities and connections these different figures enable. Thus, the book seizes upon works by artists like Anne Carson, King Tubby, and Raymond Queneau as opportunities for thinking through the valence of both existing and untested temporal configurations. What other modes of shaping time, it asks, might be conjured out of the viewing of an Omer Fast film, the reading of a poem by Baudelaire, or of a novel by Tom McCarthy? In treating artworks as temporal experiments, this book stresses the fact that artworks always experiment with the raw materials of time, fashioning it or refashioning it into novel combinations. This book follows the imperatives of these experiments in order to advance a nuanced understanding of the way time insinuates itself into all aspects of social and intellectual life.

Recent publications about King Alfonso X have tended to focus on his role as monarch in the context of the institutions of the realm. This book, however, emphasizes the human dimension of this extraordinary figure. Drawing on King Alfonso's own works and on extensive archival sources, both well-known and neglected, Salvador Martínez brings to life a king who valued the possession of knowledge above all earthly riches. The "Learned King" left a vast legacy of work, which would influence developments in both Spain and Europe, most significantly in the transfer of knowledge from the Arabs to the Christian West. With his intellectual curiosity and his pursuit of wisdom, Alfonso X is a towering figure

at the origins of modernity.

Daily Life of Women [3 volumes] Univ of California Press

The study of historic foodways is as multifaceted and varied as food itself. The changes we see in food habits and choices over history reveal evolving social and political climates and help us envision our ancestors' everyday lives and imagined afterlives. Food certainly played a role in funerary rites; it was offered to the dead, of course, but also shared at the grave among the living family members, symbolically bridging between this world and the next. Choosing the food was embedded in a series of traditions and norms; how it relates to what was actually eaten in associated settlements enables an understanding of its meaning. Feasts, whether for the dead or the living, were laden with

political and social meaning. Fasting, although requiring abstention from certain foods, also involves the management- from sourcing and storing to cooking and eating- of the permitted foods, a key concern in contexts such as monasteries where fasting occurred. This collective work demonstrates the diversity of possible approaches to food. It presents the current state of research on the foodways of Egypt and Sudan and highlights the importance of further interdisciplinary collaboration for a "big picture" approach. It brings together 16 articles covering archaeology (in the broadest sense), theory, anthropology, language, ethnography, and architecture to illustrate food traditions and history in Egypt and Sudan from as early as the 4th millennium BC to the 20th century.
