This book/CD-ROM package covers key information that will help novice and experienced nurses gain competence in assessing the respiratory system. The text begins with an overview of anatomy and physiology concepts, then outlines steps of clinical assessment and describes how normal breath sounds are produced, what they sound like, and how they are classified. Breath sounds are correlated with common physiological conditions, linking material to ambulatory care and bedside practice. Margin tips and quizzes are included, and the CD-ROM contains examples of breath sounds. Annotation : 2004 Book News, Inc., Portland, OR (booknews.com)--[source inconnue].
