THOMAS AUGUST

D. Phil. Jacob Speners Catechismus- Tabellen Academic Press

Vols. for include separately paged material
of the Leipziger Bienenzeitung.

The National Union Catalog, Pre-1956 Imprints

This book is a centennial volume
celebrating the enormous progress made
in hematology in the 20th century. It is

edited by Marshall Lichtman, a
distinguished senior hematologist, past
president of the American Society of
Hematology, and co-editor of the leading
text in the field. Hematology is a
compendium, with commentaries, of the
most important papers published in the
field from 1900-1999. The book will be
useful for reference--many of the older
papers can no longer be found in most
libraries, yet are still referred to in current
publications, especially review articles--as
well as teaching. The Editor and a team of
associate editors have included the most

important papers covering eight
categories: anemia; phagocytic cells;
platelets; coagulation and thrombosis;
lymphocytes and immune disorders;
transfusion medicine; hematologic
malignancies and therapeutics; and
laboratory developments. Each paper is
accompanied by a 1-2 page commentary
explaining its impact, and references to
the developments that resulted. Key
Features * Contains 86 landmark articles
from the last 100 years of research in
clinical hematology * Includes expert
commentaries discussing the impact of

each article * Cites approximately 1000 preceding or subsequent articles of consequence in the commentaries * Includes the English translations of nine articles originally published in other languages * Provides easy access to several papers that may no longer be found in libraries
