#### Multilingual Matters

Through a range of unconventional genres, representations of data, and dialogic, reflective narratives alongside more traditional academic genres, this book engages with contexts of decoloniality and border thinking in the Global South. It addresses processes of knowledge production and participation in the highly divided and unequal schooling

and higher education system in South Africa, and highlights the consequences of the monolingual myth in post-colonial education, demonstrating opportunities for learning provided by translanguaging. It explores both embodied, multimodal and multilingual instances of knowledge-making in teaching and teacher education that take place outside but alongside formal classroom, lecture and seminar modes, and the positionality and learning experiences of teacher educators in science, literacy and language across the curriculum. The book is not only transdisciplinary but also captures the

learning that takes place beyond the borders of disciplines and formal classroom spaces.

*The State, Education and Equity in Post-Apartheid South Africa* Springer Nature  
This book presents a comparative look at the norms and attitudes related to youth violence. It aims to present a perspective outside of the typical Western context, through case studies comparing a developed / Western democracy (Germany), a country with a history of institutionalized violence (South Africa), and an emerging democracy that has experienced heavy terrorism (Pakistan).

Building on earlier works, the research presented in this innovative volume provides new insights into the sociocultural context for shaping both young people's tolerance of and involvement in violence, depending on their environment. This volume covers: Research on interpersonal violence. Thorough review of the contribution of research on gangs, violence, neighborhoods and community. Analyses on violence-related norms of male juveniles (ages 16-21 years old) living in high-risk urban neighborhoods. Intense discussion of the concept of street code and its use. Application of street code concept to contexts outside the US. An integrating chapter focused on where the street code exists, and how it is modified or interpreted by young men. With a foreword by Jeffrey Ian Ross, this book aims to provide a broader context for research. It does so via a rigorous comparative methodology, presenting a framework that may be applied to future studies. This open access book will be of interest to researchers in criminology and criminal justice, as well as related fields such as sociology, demography,

psychology, and public health. *The Codes of the Street in Risky Neighborhoods* HSRC Press

This two-volume set constitutes the proceedings of the 19th IFIP WG 6.11 Conference on e-Business, e-Services, and e-Society, I3E 2020, held in Skukuza, South Africa, in April 2020.\* The total of 80 full and 7 short papers presented in these volumes were carefully reviewed and selected from 191 submissions. The papers are organized in the following topical sections: Part I: block chain; fourth industrial revolution; eBusiness; business processes; big data and machine learning; and ICT and education Part II: eGovernment; eHealth; security; social media; knowledge and knowledge management; ICT and gender equality and development; information systems for governance; and user experience and usability \*Due to the global COVID-19 pandemic and the consequential worldwide imposed travel restrictions and

lockdown, the I3E 2020 conference event scheduled to take place in Skukuza, South Africa, was unfortunately cancelled. Responsible Design, Implementation and Use of Information and Communication Technology Pearson South Africa  
The importance of the first-year experience is now well recognised. This collection of papers makes a fascinating and important contribution to our understanding of students' transition to higher education. This is a scholarly, engaging and illuminating text, that is relevant not only in the context of South Africa, but for anyone interested in student learning in the first year of university education. David Gosling, Plymouth University  
*Learning Zulu Multilingual Matters*  
Teacher education programmes seek to provide student teachers with the knowledge and expertise to provide quality teaching and learning in a diverse and challenging school context. Learning to Teach in post-apartheid South Africa: Student Teachers' Encounters with Initial Teacher Education addresses the complexities of teacher education programmes in preparing students to

teach. It adds to the knowledge about teacher education, contributing critical understanding of education and the schooling system. The book provides important insights to deepen researchers, academics, teacher education providers, policy-makers, and students' understanding of the importance to address equity, redress, and quality in South African education in a post-apartheid era. This book further helps to build student teachers' capacities to work creatively and to become active and critical agents of transformation. It ultimately outlines the challenges face in designing and delivering successful Initial Teacher Education programmes, and the impact this has on delivering equitable and quality education.

Springer Nature

The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working-class, poor and remote rural communities in resource-constrained systems like South Africa. At the core of

this book is the theory and evidence for a powerful, new, interlocking and mutually reinforcing change model. Inspired by the AIDS treatment story, the three-pronged approach of structured daily lesson plans, appropriate and high-quality educational materials, and one-on-one instructional coaching to help teachers transform their instructional practices in early grade classrooms, shows that it will improve learning outcomes. For education systems defined by low levels of early grade learning and profoundly unequal outcomes, *The Education Triple Cocktail* offers a theoretically informed, evidence-based way forward. This book will be of immense use to teachers, students of Education, policymakers and parents.  
Primary Education in Crisis Taylor & Francis

This book brings together the first book collection of African research in mathematics education in multilingual societies and chronicles current research in different linguistic contexts across the African continent, (including Algeria, Namibia, Malawi, Morocco, Rwanda, South Africa) on issues of multilingualism in mathematics education, but more

importantly, it foregrounds pertinent issues for future research. With many of the authors building on earlier path-breaking African research, the book is a unique contribution of careful thinking through how linguistic diversity and multilingualism manifest in ways that differ from one geopolitical context to another. This volume is an important contribution to the growing recognition of multilingualism as the global 'linguistic dispensation' in mathematics education. It is an invitation to how we might (as an international community where more and more multilingualism is the norm rather than an exception) pay more attention to the multilingual agency and capabilities of both students and teachers in order to better harness the epistemic potential of multiple languages in contexts of language diversity in mathematics education.

*Handbook of Quality of Life in African Societies* UJ Press

This study gives statistical and evidential illustration to what influences student choices and behavioral patterns as well as trends in the youth market in South Africa.  
Response-ability in the Era of AIDS

**AFRICAN SUN MeDIA**

With the advent of the National Gambling Act (no 33 of 1996) the legislative environment with regards to gambling changed dramatically.

Learning to teach in post-apartheid South Africa Pearson South Africa

This substantive report is essential reading for those involved in higher education planning and policy-making.

*The Social Impact of Gambling in South Africa* Springer Nature

This is a series of books from the LOITASA (Language of Instruction in Tanzania and South Africa) project. LOITASA is a NUFU-funded (Norwegian University Fund) project which began in January 2002 and continued till the end of 2006. It is, what in donor circles is known as a 'South-South-North' cooperation project which, in this case, involves research cooperation between South Africa, Tanzania and Norway. The first book, entitled Language of instruction in Tanzania and South Africa (LOITASA), focused on the current language in education situation in the two countries by providing a description and analysis of existing language policies and practices.

**From School to Higher Education?****AFRICAN SUN MeDIA**

This book is based on chapters in a series of four books from the first five years (2002-2006) of the Language of Instruction in Tanzania and South Africa (LOITASA) project. LOITASA is a NUFU-funded (Norwegian University Fund) project which began in January 2002 and will continue through to the end of 2011. The chapters reflect the state of the research at the end of the first five years of LOITASA in 2006 and were selected by reviewers independent of the project.

*Zulu Warriors* African Minds

This book addresses the importance of language in matters of sustainability and incorporating such concerns in implementing the UN's Sustainable Development Goals (SDGs). Sustainable language policy must aim to include all groups, including language minorities and marginalized populations, such as refugees and aid recipients, in conditions that allow for their inclusion in making and implementing policy. The book brings together nine studies covering such topics as language and digital resources, sustainable and inclusive multilingual

education, national language policy, and language in peacekeeping operations. A final chapter addresses the crucial intersection between sociolinguistics and economics, and the implications of this for development and the SDGs.

International Comparative Perspectives on Religion and Education AFRICAN SUN MeDIA

The world is not an equal place. There are high- and low-income countries and high- and low-income households. For each group, there are differential educational opportunities, leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education, from human capital and human rights approaches, in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science and public policy.

**Education and Equity** HSRC Press

The SALRM 2011 provides a rich source of information on a range of language-related subjects. A prominent issue remains the changing of street and place names, including the Pretoria/Tshwane and Louis Trichardt/Makhado sagas. Language in education remains a thorny issue; as medium of instruction at school and tertiary level, and the proposal that passing an African language should be a requirement in order to obtain a tertiary degree in South Africa. In terms of language legislation, the draft version of the National Language Act was proposed. The language of record in courts also received attention in the media.

*English as a Language of Learning, Teaching and Inclusivity* Emerald Group Publishing

This book scrutinises religion in education in ten countries. It reveals much about the tension between religion and education in secular countries, and the blending between religion and education in religious countries, such as Iran and Malaysia, as well as secular countries such as the Netherlands. It also shows the important role the church currently plays in

education in developing countries, such as Tanzania.

My First Zulu ( IsiZulu ) Alphabets Picture Book with English Translations Heinemann Educational Books

This volume is the first published collection of papers on the impact of diglossia and dialectal variations on language and literacy acquisition, impairment, and education. The authors are pioneering in this field and are leading researchers with substantial experience in conducting research in this area. A wide range of areas and languages are covered, including the US, South Africa, Israel, and various European countries. The chapters present novel data and insights regarding the role of dialectal variations on language and literacy, from a wide range of countries and perspectives. These insights have significant theoretical and practical implications. A majority of literacy learners worldwide are taught to read and write in a language variety or a dialect that is not the same as their spoken language. Not only is this the global norm, but it is probably also the greatest obstacle to literacy learning. This volume is the first published collection of papers on the role

of dialect in language and literacy acquisition, impairment, and education in a variety of languages and situations across Europe, the Middle East, North America, Africa, and Asia. The authors are pioneers in this field.

Springer Nature

Hibbert explores South Africa's higher education crisis utilising case studies and first-hand experiences with English as the language of instruction. The historical overview provides a framework with which to understand the complicated nature of using English as a language of instruction in South Africa, past and present. Student narratives are presented to illustrate mainly breakthroughs, but also challenges. An overview is provided, of imported English teaching methodologies and how they have emerged and developed in the local educational system over decades. It is demonstrated how these methodologies relate to socio-economic and political events and trends at each juncture. By applying defamiliarisation as a research method of investigation, students' translanguaging struggles are recorded and discussed, both pre-pandemic and in the pandemic period. The experiences of

non-monolingual English-speaking staff and students, and of local English/African language bilinguals is foregrounded, as they are by far the majority in South African higher education and schools. The relevance of the experiences and learning paths of those staff and students is enhanced. This book aids lecturers across disciplines and English language facilitators in the improvement of English acquisition curricula through exposure to arguments, case studies and learning path narratives in this volume, and prompts and inspires researchers to develop further theories and experiments in their own context.

#### Bilingual explanatory maths dictionary Springer

In the past decade, the national preoccupation has been on the crisis in secondary schools. Lurking behind the intractable problem of low pass rates, the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education. Drawing on the work of researchers in a range of fields including psychology, sociology, anthropology, linguistics, economics, the health sciences, and mathematics education, this book documents the depth and scope of the

primary education crisis and provides a comprehensive and rigorous explanation of its causes. Primary education in crisis pulls together the wealth of research on health, poverty, resources, language and teaching as factors in academic achievement in reading, writing and mathematics. At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach, and why it is that teaching is at the heart of the crisis in primary education. The author suggests that there are no quick fixes, but only hard choices and that, for reform to succeed, it must be evidence-based.
