The role of
manufacturing

in a country's economy and societal development has long been established through their wealth generating capabilities. To enhance and widen our knowledge of materials and to increase innovation and responsiveness to ever-increasing international needs, more in-depth studies of functionally graded materials/tailor-made materials, recent advancements in

manufacturing processes and new design philosophies are needed at present. The objective of this volume is to bring together experts from academic institutions, industries and research organizations and professional engineers for sharing of knowledge, expertise and experience in the emerging trends related to design, advanced materials processing and characterization, and

advanced manufacturing processes. Law for Architects: What You Need to Know Springer Computer-Aided Oral and Maxillofacial Surgery: Developments, Applications, and Future Perspectives is an ideal resource for biomedical engineers and computer scientists, clinicians and clinical researchers looking for an understanding on the latest technologies applied to oral and

<p>maxillofacial surgery. In facial surgery, computer-aided decisions supplement all kind of treatment stages, from a diagnosis to follow-up examinations. This book gives an in-depth overview of state-of-the-art technologies, such as deep learning, augmented reality, virtual reality and intraoperative navigation, as applied to oral and maxillofacial surgery. It covers</p>	<p>applications of facial surgery that are at the interface between medicine and computer science. Examples include the automatic segmentation and registration of anatomical and pathological structures, like tumors in the facial area, intraoperative navigation in facial surgery and its recent developments and challenges for treatments like zygomatic implant placement. -</p>	<p>Provides comprehensive, state-of-the-art knowledge of interdisciplinary applications in facial surgery - Presents recent algorithmic developments like Deep Learning, along with recent devices in augmented reality and virtual reality - Includes clinical knowledge of two facial surgeons who give insights into the current clinical practice and challenges of facial surgeons in</p>

university hospitals in Austria and China Annual Report Academic Press The book focuses on both theory and applications in the broad areas of communication technology, computer science and information security. This two volume book contains the Proceedings of International Conference on Advanced Computing and Intelligent Engineering. These volumes bring

together academic scientists, professors, research scholars and students to share and disseminate information on knowledge and scientific research works related to computing, networking, and informatics to discuss the practical challenges encountered and the solutions adopted. The book also promotes translation of basic research into applied investigation and convert

applied investigation into practice. SDGs in Africa and the Middle East Region CRC Press Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department

does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department

operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and

past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years. *Grade 4 Decimals and Fractions* Taylor & Francis This report identifies effective strategies to tackle skills imbalances in South Africa. Hilāl Bloomsbury Publishing USA The GCRO Barometer 2014 depicts developmenta l progress in the Gauteng

City-Region (GCR) in a single interactive graphic using 38 indicators across ten key sectors. It serves as a tracking and diagnostic tool to inform policy makers and the public on where development progress is being made, and areas of concern. It also serves as a tool for benchmarking Gauteng against other South African provinces and similar sized city-regions across the world. The GCRO

Barometer 2014 is the first release and shows progress in 2012 against three base years: 2002, 2007 and 2011. Overall, the Barometer shows that the development outlook for Gauteng is positive with significant progress realised between 2002 and 2012 in nearly all sectors. For instance, the poverty rate has fallen dramatically since 2002 and access to basic services has improved. However,

there are challenges in areas such as Social Cohesion, Governance, the Labour Market and Sustainability. Sadly, people's perceptions of government, as well as their unwillingness to participate in governance matters do not correspond to the achievements made by government during this period. This should be a cause for concern for policy makers in all spheres of government

as it reflects dissatisfaction with the nature and quality of services being provided as well as the methods of provision. The Barometer also shows that the impact of government programmes is minimal over shorter time spans - change between 2002 and 2012 is considerable, but change between 2011 and 2012 is insignificant. This is a cause for concern given the 5-year cycle of electoral

terms for local government in South Africa. The Barometer's outcomes underscore the need for government to step up policy and programme monitoring with a view to achieving immediate and positive short-term impacts on communities. Redefining Education and Development OECD Publishing The introduction of ECPs in South African Universities is seen by many as South

Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study. Even so, this transformative strategic imperative has been plagued by a range of

challenges that include poor systems readiness; poor selection mechanisms in the identification of ECP students; poor numeracy and literacy amongst students, and indifferent teacher involvement in ECPs. This volume offers a rare insight into many of the above-recognised challenges and in so doing provides critical matter for thought for educators within the higher education

sector. *Becoming Right* Princeton University Press The 1662 Act of Uniformity and the consequent 'ejections' on 24th August (St. Bartholomew's Day) of those who refused to comply with its stringent conditions comprise perhaps the single most significant episode in post-Reformation English religious history. Intended, in its own words, 'to settle the

peace of the church' by banishing dissent and outlawing Puritan opinion it instead led to penal religious legislation and persecution, vituperative controversy, and repeated attempts to diversify the religious life of the nation until, with the Toleration Act of 1689, its aspiration was finally abandoned and the freedom of the individual conscience and the right to dissent were, within limits, legally

recognised. Bartholomew Day was hence, unintentionally but momentarily, the first step towards today's pluralist and multicultural society. This volume brings together nine original essays which on the basis of new research examine afresh the nature and occasion of the Act, its repercussions and consequences and the competing ways in which its effects were shaped

in public memory. A substantial introduction sets out the historical context. The result is an interdisciplinary volume which avoids partisanship to engage with episcopalian, nonconformist, and separatist perspectives; it understands 'English' history as part of 'British' history, taking in the Scottish and Irish experience; it recognises the importance of European and transatlantic relations by

including the Netherlands and New England in its scope; and it engages with literary history in its discussions of the memorialisation of these events in autobiography, memoirs, and historiography. This collection constitutes the most wide-ranging and sustained discussion of this episode for fifty years. Comparative and International Education Gauteng City Region

Observatory (GCRO) Drawing on the South African case, this book looks at shifts in higher education around the world in the last two decades. In South Africa, calls for transformation have been heard in the university since the last days of apartheid. Similar claims for quality higher education to be made available to all have been made across the African continent. In	spite of this, inequalities remain and many would argue that these have been exacerbated during the Covid pandemic. Understanding Higher Education responds to these calls by arguing for a social account of teaching and learning by contesting dominant understandings of students as decontextualised learners premised on the idea that the university is a meritocracy.	This book tackles the issue of teaching and learning by looking both within and beyond the classroom. It looks at how higher education policies emerged from the notion of the knowledge economy in the newly democratic South Africa, and how national qualification frameworks and other processes brought the country more closely into conversation with the global order.
---	---	--

The effects of this on staffing and curriculum structures are considered alongside a proposition for alternative ways of understanding the role of higher education in society.

The 6th FTRA International Conference on Computer Science and its Applications (CSA-14) will be held in Guam, USA,

Dec. 17 - 19, 2014. CSA-14 presents a comprehensive conference focused on the various aspects of advances in engineering systems in computer science, and applications, including ubiquitous computing, U-Health care system, Big Data, UI/UX for human-centric computing, Computing Service, Bioinformatics and Bio-Inspired Computing and will show recent advances on

various aspects of computing technology, Ubiquitous Computing Services and its application.

experimental approaches, which can reveal new scientific and technological directions in several fields, expanding the versatility to yield a variety of new complex materials with desirable applications and functions. Some of the challenges and opportunities in this field are also discussed, targeting the development of new emergent complex functional materials with tailored

properties to solve problems related to renewable energy, health, and environmental sustainability. A more fundamental understanding of the physical and chemical properties of new emergent complex functional materials is essential to achieving more substantial progress in a number of technological fields. With this goal in mind, the editors invited acknowledged specialists to

contribute chapters covering a broad range of disciplines. *Getting Skills Right: South Africa* Springer
An essential reference for practitioners, emphasizing how legal concepts affect the process of bringing architectural vision to reality. *Law for Architects: What You Need to Know* guides design professionals through the daunting landscape where design and construction

meet the legal system. It provides an introduction—written in clear, reader-friendly language—to issues that arise at every stage in the practice of architecture. For architects starting or building their own practice: Why do I need a written agreement with my clients? Why do I need insurance? How do I organize my firm? For seasoned architects considering retirement: How do I

transfer ownership in my company? How can I benefit from the good will I helped to build? For students who want to learn more about the practicalities of starting out: Why is it important to have a license? Isn't it enough to have a degree in architecture? What are my rights as an employee? It also addresses the perennial questions that concern architects: How do I protect myself

from being sued? How do I protect my intellectual property rights in my work? and much more. Law for Architects identifies the legal issues that lurk in every corner of your design practice and helps you figure out what questions you need to ask. The GCRO Barometer 2014 Africa Institute of South Africa 1. This book offers a fresh perspective on tribal studies in India. 2. It highlights

issues of development, health, youth aspirations amongst the tribals. 3. This book will be of interest to departments of anthropology, tribal studies and sociology across UK and USA.

'Settling the Peace of the Church'

Kumon Math Workbooks
The authoritative resource for the organization, preparation, use, and interpretation of construction documents encompassing

the entire life cycle of a facility. This new edition considers the need for interdependent processes of design, construction and facility use. The Fifth Edition expands the scope of the manual to meet the requirements of all participants involved in a construction project in a stage-by-stage progression, including owners, A/Es, design-builders, contractors, construction

managers, product representatives, financial institutions, regulatory authorities, attorneys, and facility managers. It promotes a team model for successful implementation.

Applied Statistical Methods in Agriculture, Health and Life Sciences

McGraw Hill Professional
This book explores and further expands on the rich history of theoretical and empirical research in

open and distributed learning, and addresses the impact of the “data revolution” and the emergence of learning analytics on this increasingly diverse form of educational delivery. Following an introductory chapter that maps the book’s conceptual rationale, the book discusses the potential, challenges and practices of learning analytics in various open and

distributed contexts. A concluding chapter briefly summarises the chapters before providing a tentative future research agenda for learning analytics in open and distributed environments. *Street Addressing and the Management of Cities* Springer Nature There has been a dramatic demographic shift from rural areas to cities in sub-Saharan

African countries over the last few decades. This continuing urbanisation trend has created new challenges for local governments in terms of managing urban services, since over half of the city streets in these countries have no names or addresses, and the problem is particularly acute in the poorest neighbourhoods. This publication examines the use of street

addressing initiatives to address this problem, giving information on current and future applications, considering examples of use in many African countries, and setting out a methodological guide for implementing such initiatives.

Twenty Years of Education Transformation in Gauteng 1994 to 2014

World Bank Publications
“We walked on a patch of grass that

seemed to have been burnt a few hours earlier, with soot covering our feet. There, in front of us, lay my beloved brother, Adonis, lifeless, his body facing up. There were numerous stab wounds on his body, including his face, and his lumber jacket was half burnt.” Thus begins Kaizer Nyatumba’s tragic story of his twin brother’s horrible murder. It is also an intriguing look

into aspects of South African life hitherto unknown to many. They were twins of a special kind, the closest of friends, and each other’s confidantes. Their mothers were sisters, they were inseparable when they grew up, they were the first graduates in the extended family, and were the ones the family depended on for leadership. When Adonis was brutally murdered in the Pretoria area in June 2009, Kaizer was shattered

<p>and his life irrevocably changed. A part of him died with Adonis, and he has yet to come fully to terms with the loss. A very private man, the author bares his soul in this book. "This story by the master craftsman, Kaizer Nyatumba, is so absorbing that it is impossible to stop reading." – Michael Mandl'aButi Mathabela</p> <p><u>Learning Analytics in Open and Distributed Learning</u> Emerald</p>	<p>Group Publishing</p> <p>1.
