Carle is one of the most beloved illustrators of children's books. This retrospective is more than just an appreciation of his art, however. The book also contains an insightful autobiography illustrated with personal photographs, an anecdotal essay by his longtime editor, a photographic essay on how Carle creates his collages, and writings by Carle and his colleagues. Still, it is the artwork in the oversize volume that seizes the imagination. More than 60 of his full-color collage pictures are handsomely reproduced and serve as a statement of Carle's impressive talent. - Booklist

Start with a heart . . . and create beautiful in-proportion people! Aspiring artists who feel intimidated at drawing figures will love Jane Davenport's amazingly easy technique, developed while she worked as a fashion illustrator. It involves using equal-size hearts to build the body's structure, and the results are astounding. Jane lays out the basics and walks you through working with different mediums; drawing the head, face, clothing, hair, and features; and constructing figures inspired by fashion, fantasy, life drawing, and more.

Eclectic, eccentric and tirelessly innovative, art crafted from cut paper has experienced an exciting renaissance in recent years. Published to accompany a traveling exhibit opening at the Museum of Arts and Design in New York, *Slash: Paper Under the Knife* examines the resurgence of traditional handcraft materials and techniques in contemporary art and design. Highlighting the work of forty-five international artists, among them Olafur

Eliasson, Tom Friedman, William Kentridge, and Kara Walker, the book features not only cut but also burned, torn, laser-cut, shredded and sculpted paper art. In addition, the book includes cut paper animation, as well as cut paper incorporated in photography and fashion. Works range from small-scale intricate cuttings to large-scale architectural inventions and sculptures. With an essay by well-known decorative arts expert David Revere McFadden, this singular book reveals that, with ingenuity and craftsmanship, one of our most familiar implements can be transformed into unforgettable works of art.

"Pricked takes the pulse of the international embroidery as practiced today. It is not by any measure an exhibition about embroidery, but rather an exhibition of contemporary art made by artists that use embroidery as a medium to communicate their ideas and visions." ... "Language & art; Process & materials. The pleasure of making and the communication of meaning is vital in the work of each artist in Pricked: extreme embroidery. These are artists that have chosen embroidery as the most direct way to bring their artistic visions to life. A return to materiality in art practice is indicated by the work presented by each artist; it also documents a shift in the way art functions in our lives. These works suggest that the real can trump the virtual, that low-tech activities can be as impressive as high-tech systems, that personal visions are as valid as generic pronouncements, and that process and materials carry their own meaning in contemporary art." -- p. 10 & 97.
