Hetherington, *The Clarity CEO* With the availability of self-publishing services and the rise of the entrepreneur as a thought leader, writing a book is becoming more appealing to an increasing number of small business owners. The problem? Most businesspeople aren't writers, have never written a book before, are time poor and don't know where to start. While many want to write a book, they worry about investing months of their time and thousands of their dollars to write something that isn't any good, or even whether they will finish. *Book Blueprint* gives a step-by-step framework that any entrepreneur can follow to write a great book quickly, even if they're not a writer.

"The newbie investor will not find a better guide to personal finance." —Burton Malkiel, author of *A RANDOM WALK DOWN WALL STREET* TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling *Pound Foolish*, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize

control of your financial life.

Discover the (surprising) secret to lifelong financial freedom with real estate investing. Real estate has always been a powerful tool for investing, and many people believe that a single-family home investment strategy will help them achieve their goals. However, the true path to financial freedom using real estate is found in apartment buildings. Real estate investing expert and author Michael Blank learned that once investors did their first deal, the curious "Law of the First Deal" led to the second and third deals in rapid succession. Most were able to quit their jobs within 3-5 years of getting started. Of course, when most people hear "apartment buildings" they immediately assume they need years of investing experience and money saved up to be able get into the game. This simply isn't true. Michael has compiled the results of his research into his new book, *Financial Freedom with Real Estate Investing: The Blueprint to Quitting Your Job with Real Estate - Even without Experience or Cash*. He's outlined the "Financial Freedom Blueprint" that guides you through your first multifamily deal, even if you have no prior experience or your own cash.

WHAT IS HOLDING YOU BACK FROM CREATING MORE FREEDOM, WEALTH, AND IMPACT? Too many people are running so hard on the hamster wheel of work and life that they never stop to ask simple questions or challenge the "conventional" wisdom we've all been taught--questions such as: - Why do we max out our debt with school loans and credit cards? - Why do we sacrifice our entire working life, trading time for dollars, until we're in our sunset years? - Why do we keep our hard-earned dollars in a retirement 401(k) or IRA, waiting until we're sixty before the dollars can work for us? - And why do we work so hard for our wealth, instead of letting our wealth work for us? Author David Phelps has spent his entire career questioning the traditional approach to work and wealth. In the process, he discovered the most powerful question we can ask: "What's my next?" In *What's Your Next?*, Phelps presents busy professionals with a powerful guide to use wealth and an alternative income path to achieve a deeper level of freedom. How to write a novel in the most efficient way by tackling the hardest part before you start to write, from top book coach Jennie Nash "This process makes me want to write, and it makes what I'm writing better. I read it before every draft. It's that good." -KJ Dell'Antonia, New York Times bestselling author of *The Chicken Sisters* Whether you're writing your first novel or your tenth, there is a temptation to pin it to the page before it disappears. It's such a brilliant idea and you can see the whole thing shimmering in your mind, just out of reach. Maybe you do some work on character development and plotting, but you're a racehorse at the gate, ready to run, ready to write. This book is an argument to stop and define the foundational elements of your story before you keep writing - which means understanding your motivation as a writer, considering your reader's expectations, and making sure your story has a solid structure that will hold up inside and out from beginning to end. This clarity is what gives a novel its power and a writer their confidence. Jennie Nash is the creator of the Book Coach Certification program at Author Accelerator and has taught hundreds of book coaches and thousands of novelists how to use the Blueprint for a Book system--and the Inside Outline at the heart of it - to help them produce their best work in the most efficient way. "Jennie

Nash turned me into a plotter and changed the way I think about approaching any new project. I'm an Inside Outside outline fan for life!" -Alison Hammer, author of You and Me and Us and Little Pieces of Me "If you are about to start writing or revising your novel - hold up! You need this book before putting fingers to keyboard. It's a step-by-step design-your-novel manual that encapsulates the most important aspect of great story-telling: how to reach deep into your writerly heart and into the heart of the story you want to bring to life." - Janet Fox, author of The Artifact Hunters "I will sing the praises of the Inside Outline forever. It's f\*ing genius." -Carla Naumburg, author of How to Stop Losing Your Sh\*t With Your Kids "The Inside Outline is making writing easier. I can focus more on the writing rather than discovering what the scene is about when I'm creating it. Why isn't every writer using it? Instead, people are plonking down good money to be told ten key steps in writing dialogue or setting a scene. I'm so grateful I'm no longer one of them." - Kate Kimball, first time novelist

This is a story of hope, but also of peril. It began when our nation's polarized political class started conscripting everyday citizens into its culture war. From their commanding heights in political parties, media, academia, and government, these partisans have attacked one another for years, but increasingly they've convinced everyday Americans to join the fray. Why should we feel such animosity toward our fellow citizens, our neighbors, even our own kin? Because we've fallen for the false narrative, eagerly promoted by pundits on the Left and the Right,

that citizens who happen to vote Democrat or Republican are enthusiastic supporters of Team Blue or Team Red. Aside from a minority of party activists and partisans, however, most voters are simply trying to choose the lesser of two evils. The real threat to our union isn't Red vs. Blue America, it's the quiet collusion within our nation's political class to take away that most American of freedoms: our right to self-governance. Even as partisans work overtime to divide Americans against one another, they've erected a system under which we ordinary citizens don't have a voice in the decisions that affect our lives. From foreign wars to how local libraries are run, authority no longer resides with We the People, but amongst unaccountable officials. The political class has stolen our birthright and set us at one another's throats. This is the story of how that happened and what we can do about it. America stands at a precipice, but there's still time to reclaim authority over our lives and communities.

"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is

the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things--mostly about money and investing--she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock

market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!
