This book presents the website exactphilosophy.net in 2019. Written by a Swiss physicist, it contains lots of beautiful novel ideas, inspired by nature and physics, ancient and modern philosophy, as well as by astrology, the I Ching and more... For the first time, this book compiles all web pages and articles in a single printed volume. A real treasure trove for anyone with a mind free enough to think outside the tesseract?, about philosophy, science, history, art, and a lot more. Most contributions are related to a new approach to ?elements?, tentatively defined from first principles related to space and time in immediate perception, inspired by Kant, but often going way beyond ancient Greek elements or the trigrams of the Chinese I Ching, considering also how astrology or telepathy could work in ways that would be astonishingly simple everyday physics, even though they would still be ?illusions? in a way. And there is more.

Immerse yourself in the fascinating world of the Egyptian pyramids and discover the secrets of their impressive construction. In this groundbreaking reference book, written by an experienced Egyptologist and a French logistician, the invention and construction of the pyramids is illuminated with a detailed study. From the archaeological documentation of the building evidence to the development of an innovative theory that explains the construction of the pyramids without contradiction, this book offers a comprehensive analysis for experts and interested laymen alike. Learn more about the building techniques of the Old Kingdom, the use of tangential ramps in pyramid construction and the exciting history behind the famous monuments. Immerse yourself in the world of Egyptological reconstruction and solve the mystery of the pyramids.

[The Pyramids \(New and Revised\)](#) C.H.Beck

An authoritative account by preeminent Egyptologist Miroslav Verner covering over 70 of Egypt's and Sudan's pyramids, their historical and political significance, updated in a magnificent new edition A pyramid, as the posthumous residence of a king and the place of his eternal cult, was just a single, if dominant, part of a larger complex of structures with specific religious, economic, and administrative functions. The first royal pyramid in Egypt was built at the beginning of the Third Dynasty (ca. 2592-2544 BC) by Horus Netjerykhet, later called Djoser, while the last pyramid was the work of Ahmose I, the first king of the Eighteenth Dynasty (ca. 1539-1292 BC). Nearly two decades have passed since distinguished Egyptologist Miroslav Verner's seminal *The Pyramids* was first published. In that time, fresh explorations and new sophisticated technologies have contributed to ever more detailed and compelling discussions around Egypt's enigmatic and most celebrated of ancient monuments. In this newly revised and updated edition, including color photographs for the first time, Verner brings his rich erudition and long years of site experience comes to bear on all the latest discoveries and archaeological and historical aspects of over 70 of Egypt's and Sudan's pyramids in the broader context of their more than one-thousand-year-long development. Lucidly written, with 300 illustrations, and filled with gripping insights, this comprehensive study illuminates an era that is both millennia away and vividly immediate.

Pirimoy, die Stadt der 13 Pyramiden, liegt inmitten des Dschungels von Marakatam, tief im Süden von Lorakis. Glücksritter und Piraten vertrieben einst das Volk der Piriwatu aus der Stadt. Lian, die für die Piriwatu-Rebellen spioniert, lernt eines Tages den jungen Arko Melasgar kennen. Sie hält ihn für einen Lügner, doch sein Erscheinen verheißt ihr ein Geschenk der Götter Chaos in der alten Hauptstadt der Piriwatu. Ein Chaos, welches den Rebellen endlich die Chance auf einen Sieg gegen die 13 Admiräle bietet, welche über Pirimoy herrschen. Doch die Unruhe, welche die Ankunft der beiden stiftet, bleibt nicht auf diese Welt beschränkt. Auch in den Feenwelten kommt es zum Kampf auf Leben und Tod ... Der zweite phantastische Roman aus Lorakis, der Welt des dreifach mit dem deutschen Rollenspielpreis ausgezeichneten Rollenspiels Splittermond.

In Excavations at the Seila Pyramid and Fag el-Gamous Cemetery, the excavation team provides crucial information about the Old Kingdom and Graeco-Roman Egypt. While both periods have been heavily studied, Kerry Muhlestein and his contributors provide new archaeological information that will help shape thinking about these eras. The construction and ritual features of the early Fourth Dynasty Seila Pyramid represents innovations that would influence royal funerary cult for hundreds

of years. Similarly, as one of the largest excavated cemeteries of Egypt, Fag el-Gamous helps paint a picture of multi-cultural life in the Fayoum of Egypt during the Ptolemaic and Roman periods. Excavations there provide a statistically impactful understanding of funerary customs under the influence of new cultures and religion.

This comprehensive three-volume set marks the publication of the proceedings of the Eighth International Congress of Egyptologists, held in Cairo in 2000, the largest Congress since the inaugural meeting in 1979. Organized thematically to reflect the breadth and depth of the material presented at this event, these papers provide a survey of current Egyptological research at the dawn of the twenty-first century. The proceedings include the eight Millennium Debates led by esteemed Egyptologists, addressing key issues in the field, as well as nearly every paper presented at the Congress. The 275 papers cover the whole spectrum of Egyptological research. Grouped under the themes of archaeology, history, religion, language, conservation, and museology, and written in English, French, and German, these contributions together form the most comprehensive picture of Egyptology today.

You are surely now asking yourself why you are supposed to keep your hands off this book. Is it just a clever advertising strategy? Hardly so. As you know, two books of Jan van Helsing had been banned in Germany and Switzerland due to their highly controversial contents. And the mainstream media too barely lets a day go by without warning the populace about the ideas of "Germany's most dangerous author of specialized books". Now Jan van Helsing is once again shaking up someone's world view - yours! The advice, "Don't touch this book!" absolutely was meant to be taken seriously. Because after reading this book, it won't be easy for you to continue living your life the way you have been. Today, you could possibly still think, "Nobody told me this, so how was I supposed to know?" Today, you could also still hold the opinion that you, as an individual, have no say anyway and cannot change anything. However, after reading this book, this point of view will be history! If you are someone who is not interested in secrets, who has never felt the wish for internal and external wealth, who is unconcerned about success and health, then it will certainly be better if you follow the well-meant advice and keep your hands off this book. But if you have always felt that something isn't quite right with this world, if you are interested in the last secrets of this "enlightened" world, and if you are someone who wants to find out what else life might have in store, then this book is for you! But don't say you haven't been warned! Because Jan van Helsing will tell you about things and events that will give you a chance to have power over your own life and the power to let others partake in it. And those who have power also bear a huge responsibility. So now you have to make a choice: Do you want to continue being lived by others or has the time come for you to take charge of your own destiny? The decision is yours!

During the time from June 28-July 1, 1978, representatives of different branches of geometry met in Siegen for discussion of and reports on current problems. In particular, the survey lectures, presented by well known geometers, gave nonspecialists the welcome opportunity to learn about the questions posed, the methods used and the results obtained in different areas of the field of geometry. The research areas represented at the meeting in Siegen are reflected in the list of participants and their contributions: Ranging from geometric convexity and related topics to differential geometry and kinematics. The foundations of geometry, an area well established in Germany, was also represented. It is a pleasure to thank all the lecturers as well as other participants in the Geometry Symposium for their contribution to the success of the meeting. We also thank the "Minister für Wissenschaft und Forschung des Landes Nordrhein-Westfalen" and the University of Siegen for their generous support which helped make the Symposium so successful. In order to make the contributions and results of the Symposium accessible to the general public, the publication of a proceedings volume was planned. The idea was to give a summary of a wide spectrum of research in geomet- through survey articles and original research papers.
