Agriculture, Ancient and Modern: a Historical Account of Its Principles and Practice, Exemplified in Their Rise, Progress, and Development BRILL

In parallel columns of French and English, lists over 4,000 reference works and books on history and the humanities, breaking down the large divisions by subject, genre, type of document, and province or territory. Includes titles of national, provincial, territorial, or regional interest in every subject area when available. The entries describe the core focus of the book, its range of interest, scholarly paraphernalia, and any editions in the other Canadian language. The humanities headings are arts, language and linguistics, literature, performing arts, philosophy, and religion. Indexed by name, title, and French and English subject. Annotation copyrighted by Book News, Inc., Portland, OR
La splendeur des dieux: Quatre études iconographiques sur l'hellénisme égyptien (2 vols) Springer Science & Business Media
Dans La Splendeur des dieux, Gaëlle Tallet aborde la question de la transformation des divinités égyptiennes à l'époque gréco-romaine et de l'hellénisation de leur iconographie en interrogeant les enjeux de l'élaboration d'un hellénisme proprement égyptien, et les stratégies qu'il recouvre. In La Splendeur des dieux, Gaëlle Tallet provides a full reappraisal of the transformation of Egyptian deities and of their Hellenized depiction in Graeco-Roman times, and questions the issues and strategies at stake behind the elaboration of an Egyptian Hellenicity.

Bioversity International

'Living on the Edge' examines the function of the Sahel region of Africa as an important wintering area for long-distance migrant birds. It describes the challenges the birds have to cope with - climate change, of course, and rapid man-made habitat changes related to deforestation, irrigation and reclamation of wetlands. How have all these changes affected the birds, and have birds adapted to these changes? Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel, or vice versa?

Data, Models and Analysis IRPP

biological attributes of the three species according to the sequence in which they invade successively as a conse Studies on sample plots in Halimione portulacoides communities show that environmental disturbances, either quence of environmental disturbance. It can therefore be concluded that for understanding this mechanism in the natural or induced by man, start a sequence of partly salt-marsh ecosystem a thorough study on the functioning overlapping density maxima in Suaeda maritima, Aster of these and other relevant biological attributes in the local tripolium and Puccinellia maritima successively, before the populations is essential. original Halimione community totally recovers. When Returning to the basic questions put in the introduction succession time before recovering is long enough, there are it is concluded that: tendencies in redundancy of this sequence stressing the unilinear character of the succession. Minor environmental a) There exist orderly and predictable succession patterns in the investigated salt-marsh vegetation. impacts induce a longer time-lag period of the Suaeda b) Following occasional disturbances, whatever these may density maximum, suggesting threshold values of these impacts for the species to maintain minimal population be, the vegetation recovers via a sequence of overlapping interim species populations showing a unilinear or obliga densities or to become locally extinct. This sequence of tory (Hom 1976) succession pattern.

Les ailes du Sahel UBC Press

This book gives an overview of the relationships between agriculture and air quality, which is an issue of increasing importance for practitioners and policy makers. It provides the keys to understand natural and anthropogenic mechanisms governing emission and deposition of pollutants produced by and/or impacting agricultural activities It identifies how management practices can help mitigating emissions and how public policies on air pollution progressively addressed the agricultural sector This book was written for students, researchers and agriculture actors as well as for public decision-makers
Journals IUCN

Background papers and proceedings of a conference held in Montreal, October 23-28, 1961, in which Canada's renewable resources were considered in relation to material, regional and provincial goals for economic development. Some problems of resource policy, management and administration were identified, and guidelines for action proposed.

Proceedings of the International Grassland Conference Scarecrow Press

A fascinating analysis of the work of notable women by national group, giving thorough data comparing the contributions of women in choice fields. Among the women presented are more than a few colorful personalities representative of the entire social scale, from a royal princess to the daughter of a Paris slum shopkeeper. Researchers in the field of women's history and science history will find this indexed volume a valuable resource.
Etude sur les irrigations des Pyrenees-Orientales Routledge
From the Foreword: Dr. Harvey deals with one of the oldest problems of the Prairie provinces: the carriage of grain to world markets efficiently and at low cost to the producer...The problem is how to reform the system without injury to the Prairie economy and unfairness to the producers. Dr. Harvey argues that a change in system is indeed possible, with benefit to grain producers, to the agricultural economy of the West, to the taxpayers of Canada - and possibly even to the railways. He recognizes that compensation must be paid to grain producers if freight rates for the movement of grain are increased to an economic level. He

proposes a method of compensation that, he thinks, will permit economic forces to produce a net benefit to western agriculture, and will result in an increase in Pairie income and a diversification of the western economy.

Bibliographical Contributions Étude sur les monuments de l'architecture militaire des Croisés en Syrie et dans l'île de Chypre Étude géologique des terrains de la rive gauche de l'Yonne, compris dans les arrondissements d'Auxerre et de Joigny, ... par M. le T.... de L....., etc Volume du Congrès International pour l'étude de l'Ancien Testament, Strasbourg 1956

Fire in the tropics has a long history in which frequent wide-spread burning has profoundly altered physical and cultural environments. A vast and diverse literature pertaining to fire and its effects in tropical forests and grasslands was evaluated, classified and presented in a selected bibliography. Emphasis is on the relation of fire to climate, natural vegetation, soils, cultural origins, technological level and way of life and other significant factors of the total environment. The incidence and frequency of occurrence of fire are examined in terms of the geographic distribution of passive and active environmental characteristics. The relationship of burning to climate and natural vegetation is shown on maps which represent a first attempt to depict the geographic distribution of fire in the tropics. Potential combustibility and the implications of fire to military operations are discussed.

The Prairie Provinces cover Alberta, Saskatchewan and Manitoba. *Resources for Tomorrow: Conference background papers [on resource management problems of agriculture, water and regional development* Scarecrow Press

This volume contains the ten most cited articles that have appeared in the journal Atmosphere-Ocean since 1995. These articles cover a wide range of topics in meteorology, climatology and oceanography. Modelling work is represented in five papers, covering global climate model development; a cumulus parameterization scheme for global climate models; development of a regional forecast modelling system and parameterization of peatland hydraulic processes for climate models. Data rehabilitation and compilation in order to support trend analysis work on comprehensive precipitation and temperature data sets is presented in four papers. Field studies are represented by a paper on the circumpolar lead system. While the modelling studies are global in their application and applicability, the data analysis and field study papers cover environments that are specifically, but not uniquely, Canadian. This book will be of interest to researchers, students and professionals in the various sub-fields of meteorology, oceanography and climate science.

Le présent ouvrage tente la mise en oeuvre de l'analyse structurelle pour vingt psaumes, soit les Pss. 52, 54-60, 108, 62, 64-66, 78-80, 91-92, et le grand Ps. 119. Son ambition est de montrer à quel point l'architecture de ces textes en conditionne et en ouvre l'interprétation. Les considérer comme des ensembles structurés, faisant jouer entre les diverses unités des rapports multiples et ordonnés, est nécessaire à leur compréhension. A l'occasion on montre comment l'analyse structurelle permet de mieux saisir l'enchaînement des psaumes consécutifs dans le Psautier, ou encore les rapports entre psaumes opérant entre eux d'importants emprunts (57, 60, 108). Ici sera donc pris en compte en priorité le texte lui-même tel qu'il se présente à nous, afin de

saisir ces clefs d'interprétation qui y sont inscrites. L'ouvrage devrait retenir l'attention non seulement des spécialistes des Psaumes, mais encore de quiconque entend les connaître de près. Les études qu'il contient ont été à cette fin basées sur une traduction littérale de chaque psaume, sans renoncer pour autant à recourir, chaque fois que cela s'est avéré nécessaire, au texte hébreu.

Issues in Ecosystem Ecology / 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Microbial Ecology. The editors have built Issues in Ecosystem Ecology: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Microbial Ecology in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Ecosystem Ecology: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.
