The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. “This is an important book, exceptionally

well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book.” —Samuel M. Strong, *The American Journal of Sociology* “This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those whose preferences stand against, a behavioristic

approach to human activity.” —Harry Prosch, *Ethics*

Who of us can claim never to have made a mistake, missed a goal, regretted a choice, or suffered because of another's action? For those who suffer from a constant sense of regret about the past, who feel their present lives have been immutably shaped by actions they could or should or would have taken but didn't, real help is at hand. In clear, uncomplicated language, Dr. Arthur Freeman, a leading exponent of cognitive therapy, and his colleague Rose DeWolf, a skillful translator of the cognitive method, describe the techniques and provide

exercises that will enable readers to actually "unblock" the past. The authors demonstrate that would/coulda/shoulda thinking can be unlearned and that this process can be accomplished in a relatively short period of time.

Even though statisticians report that more than 37 million Americans suffer from diagnosable social phobia, common sense suggests that nearly all of us have, at one time or another, had clammy palms and knocking knees because of an intimidating, uncomfortable social situation. The party where you don't know a single soul, the crowded lobby of a movie theatre, the presentation you've been dreading for weeks-any of these have the potential to ruin your week without necessarily sending you to the psychiatrist's couch. The ten simple exercises in this book help you shed your shyness and start socializing with confidence and Élan. *10 Simple Solutions to Shyness* examines shyness by symptoms: physical discomfort, anxious thoughts, and bothersome behaviors.

Solutions follow, directly addressing all three. You can carry the book in a briefcase or purse for last minute support and extra confidence. Once the ten simple solutions are learned, they will become your constant companions, providing courage, poise, and composure whenever you need them most.

The culmination of more than 25 years of clinical work and research, this is the authoritative presentation of cognitive processing therapy (CPT) for posttraumatic stress disorder (PTSD). Written by the treatment's developers, the book includes session-by-session guidelines for implementation, complete with extensive sample dialogues and 40 reproducible client handouts. It explains the theoretical and empirical underpinnings of CPT and discusses how to adapt the approach for specific populations, such as combat veterans, sexual assault survivors, and culturally diverse clients. The large-size format facilitates photocopying and day-to-day use. Purchasers also get access to a Web page where they can download and print the reproducible materials. CPT is endorsed by the U.S. Departments of Veterans Affairs and Defense, the International Society of Traumatic Stress

Studies, and the U.K. National Institute for Health and Care Excellence (NICE) as a best practice for the treatment of PTSD. *The Case Formulation Approach to Cognitive-Behavior Therapy* CRC Press

In this book, the IOM makes recommendations for permitting independent practice for mental health counselors treating patients within TRICARE-the DOD's health care benefits

program. This would change current policy, which requires all counselors to practice under a physician's supervision without regard to their education, training, licensure or experience.
