 This book addresses the distinct representations of emotions in non-fictional texts from the seventeenth to the mid-nineteenth century (1600-1850).

Focusing on memoirs, autobiographies, correspondences and conduct manuals, it argues that in those writings, passions and emotions are differently expressed than in fiction. It also offers a comparative study of texts from cultures as diverse as English, French, Korean and Chinese, and of emotions in relation to genre, identity, and morality during significant cultural transformation of the early modern period. This book is distinctive in its choice of non-fictional genres, its period, and its cross-cultural approach. It can benefit scholars interested in exploring emotion as a historical and cultural product, and in enriching their knowledge of an emerging scholarly direction: studies in self-narratives (autobiography, memoirs, dream narratives, letters, etc.) often insufficiently explored in earlier historical periods.

L'epistemologie genetique ne se confond pas avec la psychologie gene tique et celle-ci n'est elle-meme pas identique a la psychologie de l'enfant. Cette derniere etudie l'enfant pour lui-meme, tandis que la psychologie genetique cherche dans l'etude de l'enfant la solution des problemes generaux, tels que celui du mecanisme de l'intelligence, de la perception, etc., car, ce n'est qu'en analysant la formation de tels mecanismes que l'on parvient a fournir leur explication causale. En effet, en psychologie comme en biologie, l'explication est inseparable du developpement. De meme l'epistemologie genetique a pour objet l'examen de la formation des connaissances comme telles, c'est-a-dire des relations cognitives entre le sujet et les objets: elle fait donc la transition entre la psychologie genetique et l'epistemologie en general, qu'elle espere enrichir par la consideration du developpement. Mais si l'epistemologie comporte toujours des presuppositions psychologiques (meme dans les theories qui pretendent pouvoir negliger le sujet et reduire son activite a un simple {laquo}langage{raquo}), qu'il s'agit donc de sou mettre au controle de l'experience et des faits, il intervient en outre dans la theorie des connaissances des considerations de logique ou d'algebre generale, etc., qui ne reLevent plus d~ la psychologie, mais de la formalisation ou de la deduction pure. L'epistemologie genetique est donc de par sa nature meme une recherche interdisciplinaire, ou

la psychologie genetique joue un role necessaire mais nullement suffisant.

Conçu comme une introduction générale à la syntaxe, cet ouvrage présente les notions de base nécessaires à une étude de la combinaison des unités lexicales et grammaticales au sein d'un énoncé. Sans se placer dans un cadre préconçu, l'ouvrage étudie les différentes possibilités pour la représentation des structures syntaxiques, en fonction des principes généraux et des critères particuliers retenus. Élaboré avec l'objectif de fournir une base pour l'enseignement de la syntaxe à l'université, cet ouvrage souhaite montrer qu'on peut dégager de manière méthodique les propriétés des langues et mettre de l'ordre dans la forêt vierge que constitue chaque langue. Il est divisé en trois parties : comment élaborer le modèle d'une langue, comment déterminer les unités de base de la langue en fonction de leur sens, forme et combinatoire, comment définir et représenter les différents modes d'organisation des unités. Cette dernière partie présente une abondance de diagrammes syntaxiques de diverses natures. L'ouvrage est découpé en de petites sections, alternant le contenu principal avec des éclairages, des notes historiques, des élaborations plus formelles, des exemples linguistiques dans diverses langues, des propositions de lectures additionnelles et des exercices avec des éléments de correction. Kim Gerdes et Sylvain Kahane collaborent depuis 20 ans et ont publié ensemble plus de 40 articles. Ils se sont intéressés à différents aspects de la syntaxe des langues. Après avoir travaillé sur la modélisation formelle de l'ordre des mots en allemand et en français, ils ont commencé à partir de 2008 à développer des corpus annotés en syntaxe de dépendance pour le français parlé, s'intéressant à la fois aux problèmes théoriques de l'analyse en dépendance et aux questions plus particulièrement posées par les productions orales, notamment concernant les limites de la syntaxe. Conceived as a general introduction to syntax, this book presents the basic concepts necessary for a study of the combination of lexical and grammatical units within an utterance. The book does not impose a preconceived framework, but rather examines the various possibilities for the representation of syntactic structures, according to the general principles and specific criteria that have been adopted. The aim of this book is to provide a basis for teaching syntax at

university, and to show that it is possible to identify the properties of languages in a methodical way and to put order in the jungle of each language. The book is divided into three parts: How to develop the model of a language? How to determine the basic units of a language according to their meaning, form, and combinatorial nature? How to define and represent the different ways in which the units are organized? This last part presents an abundance of syntactic diagrams of a wide range of types. The book is divided into small sections, alternating the main content with insights, historical notes, formal elaborations, linguistic examples in diverse languages, proposals for further reading, and exercises with answer keys. Kim Gerdes and Sylvain Kahane have been collaborating for 20 years and have published together more than 40 articles. They have been interested in different aspects of the syntax of languages. After working on formal modeling of word order in German and French, they started in 2008 to develop annotated corpora in dependency syntax for spoken French, focusing both on theoretical problems of dependency analysis and on questions more specifically raised by oral productions, notably concerning the limits of syntax.

The primary focus of this volume is to bring to the fore the contribution of McClendon and Smith's work on convictions and the application of that work in helping understand the processes of moral reasoning in the context of conflict. Both were indebted to Zuurdeeg, and their concept was incorporated in models of moral reasoning by Baptist scholars Glen Stassen and Parush Parushev. The usefulness of the concept is critically evaluated. The volume concludes with a case study on the conflict in Northern Ireland, including the role of religion and the key issues raised in the referendum on the Belfast Agreement in 1998. It includes an examination of the contribution of four Christian groups in Northern Ireland who publicly engaged in this six-week period of intense and passionate debate on the Agreement and the difficult issues it addressed, as the focus for examining and testing the application of the model of moral reasoning. On the basis of the case study is demonstrated that the concept of convictions can prove to be a helpful means of getting to the heart of what drives moral reasoning in contexts of conflict. The purpose of this book is to issue a call to engage with, critique, and

consider the importance and application of a much undervalued methodological approach to discerning the convictions that are the primary influencers of thought and action.

This remarkable compendium brings together more than eighty scholars from throughout the world to examine the experience of the kibbutz and communal living. Through careful examination of the ideological, historical, educational, sociological, and economic origins and realities of communal living, the contributors provide strong and positive support for the belief that a cooperative society can exist within an antagonistic, competitive system. Taken together, these contributions provide dialogue among and between those who research communal life, and those who live it.

This is the third in a set of four collections of articles by Michel Huglo to be published in the Variorum series. It brings together the studies of Gregorian chant and of later monophonic and polyphonic additions to the earlier repertory that occupied Huglo in the second phase of his research.

Represented here are articles on the Kyrie, the introit tropes of St-Gall, an elegy for William the Conqueror (d. 1087), the versus by Venantius Fortunatus for the cathedral of Paris, the liturgical dramas of Fleury, early organum, the Mass of Tournai, and, finally, the Requiem by Eustache Du Caurroy. Ce volume des articles de Michel Huglo est le troisième de la série de quatre dans la collection Variorum. Il réunit des études sur le chant grégorien et sur les additions de pièces monodiques ou polyphoniques faites au répertoire primitif, sujets qui ont occupé Michel Huglo dans la seconde phase de sa carrière de chercheur. Dans ce volume, le lecteur trouvera des articles sur le Kyrie, les tropes d'introït de St-Gall, l'élégie pour Guillaume le Conquérant (d. 1087), les versus de Venance Fortunat pour la cathédrale de Paris, les drames liturgiques de Fleury, les débuts de l'organum, la Messe de Tournai, et finalement le Requiem d'Eustache Du Caurroy.

Paris, un immeuble haussmannien dont la façade est en ravalement. Derrière leur apparente respectabilité, les habitants cachent de nombreux secrets, des couples s'y forment, s'y conforment ou s'y déforment au gré des désirs. Il y a, entre autres, la transformation touchante de Nadège, la très catholique propriétaire de l'immeuble ; les pratiques insolites du docteur Dupuis, gynécologue ; les découvertes extrêmes de Lili, la jeune première ; l'idylle entre Marie, pédopsychiatre frustrée, et Jean-Do, ancien pompier bellâtre et macho... A la façon d'un Georges Perec dans *La Vie, mode d'emploi*, Anne Vassivière bâtit un texte uniquement basé sur les pensées intimes et sexuelles des protagonistes, en adoptant un style différent pour chacun. Sa plume audacieuse convoque des mots forts et obscènes, aussi bien que poétiques ou ironiques.

This first volume of Collected Works of the ERC Project TYPARABIC focuses on the history of printing during the 18th century in the Ottoman Empire and the Romanian Principalities among diverse linguistic and confessional communities. Although "most roads lead to Istanbul," the many pathways of early modern Ottoman printing also connected authors, readers and printers from Central and South-Eastern Europe, Western Europe and the Levant. The papers included in this volume are grouped in three sections. The first focuses on the first Turkish-language press in the Ottoman capital, examining the personality and background of its founder, İbrahim Müteferrika, the legal issues it faced, and its context within the multilingual Istanbul printing world. The second section brings together studies of printing and readership in Central and South-East Europe in Romanian, Greek and Arabic. The final section is made up of studies of the Arabic liturgical and biblical texts that were the main focus of Patriarch Athanasios III Dabbās' efforts in the Romanian Principalities and Aleppo. This volume will be of interest to scholars of the history of printing, Ottoman social history, Christian Arabic literature and Eastern Orthodox liturgy.

Rule and resistance can no longer be understood in national contexts only. They both have transnationalised over the last decades. The scholarly discourse, however, still lags behind these developments. While International Relations only sees institutional "governance", social movement studies

only see instances of resistance. Both, however, lack the necessary vocabulary to describe the dynamic interplay between systems of rule and resistance. While we are governed by transnational structures of rule, a systematic analysis of how this operates and how it can be resisted remains to be developed. This book develops an understanding of these power relations through rich empirical case studies of different forms of rule-resistance relationships. Some resistant groups demand reforms of particular policies and institutions. Others attack institutions head-on. Yet other actors

attempt to escape the rules they reject. Which forms of resistance can we expect under different kinds of rule? How can we understand transnational rule in the first place? The book gives new inspiring answers to these difficult questions. *Supplement to the Official Journal of the European Communities* Routledge
