Central to 'Private Sector-led Urban Development Projects' lays the concept of private sector-led urban development projects. Such projects involve project developers taking a leading role and local authorities adopting a facilitating role, in managing the development of an urban area, based on a clear public-private role division. Such a development strategy is quite common in Anglo-Saxon urban development practices, but is less known in Continental European practices. Nonetheless, since the beginning of the millennium such a development strategy also occurred in the Netherlands in the form of 'concessions'. However, remarkably little empirical knowledge is available about how public and private actors collaborate on and manage private sector-led urban development projects. Moreover, it remains unclear what the effects of such projects are. This dissertation

provides an understanding of the various characteristics of private sector-led urban development projects by conducting empirical case study research in the institutional contexts of the Netherlands and the UK. The book provides an answer to the following question: What can we learn from private sector-led urban development projects in the Netherlands and UK in terms of the collaborative and managerial roles of public and private actors, and the effects of their (inter)actions?

Treaties and Other International Acts of the United States of America: Documents 41-79: 1819-1835 TU Delft

This book endeavours to interpret the development of private international law in light of social change. Since the end of World War II the socio-economic reality of international relations has been characterised by a progressive move from closed to open societies. The dominant feature of our time is the opening of borders for individuals, goods, services, capital and data. It is reflected in the growing importance of ex ante planning – as compared with ex post adjudication – of cross-border relations between individuals and companies. What has ensued is a shift in the forces that shape international relations from states to

private actors. The book focuses on various forms of private ordering for economic and societal relations, and its increasing significance, while also analysing the role of the remaining regulatory powers of the states involved. These changes stand out more distinctly by virtue of the comparative treatment of the law and the long-term perspective employed by the author. The text is a revised and updated version of the lectures given by the author during the 2012 summer courses of the Hague Academy of International Law.

Social Policies and Private Sector Participation in Water Supply Routledge

Research has paid little attention to date on how European Union law and regulation affect both the public-private mix in healthcare and the organization of private health insurance as an industry. Filling this gap, this collective book provides insights on the political economy of EU insurance regulation, its impact on private health insurers and on its interactions with domestic healthcare policy-making in four countries. Assembling original contributions drafted by a multidisciplinary team, *Private Health Insurance and the European Union* offers a thorough examination of a largely unrecognized source of EU influence in healthcare – and sheds a new light on the role played by private actors in social policy. Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Des institutions pour les marchés. Rapport 2002 BRILL

Recent changes to the health service including new structures and ways of working at both local and national levels are having major influences on the working lives of every health visitor and community nurse and on their professional opportunities. Understanding these changes is essential and this practical and authoritative handbook addresses them all. The authors all have first-hand experience of the radical changes underway. The clear straightforward format is designed to allow quick access to relevant and up-to-date information. The book is vital reading for every community practitioner.

The Law of Open Societies Springer

How does EU internal market law, in particular the rules on free movement and competition, apply to private regulation? Through a close analysis of three case studies (sports, the legal profession, and standard-setting) this book studies how internal market law is used as a control mechanism over private regulators.

Private Sector-Led Urban Development Projects Helbing & Lichtenhahn Verlag AG

Since the 1980s, neoliberals have openly contested the idea that the state should protect the socio-economic well-being of its citizens, making 'privatization' their mantra. Yet, as historians and social scientists have shown, welfare has always been a 'mixed economy', wherein private and public actors dynamically interacted, collaborating or competing with each other in the provision of welfare services. This book will be of interest to students, scholars and practitioners of welfare by developing three innovative approaches. Firstly, it illuminates the productive nature of public/private entanglements. Far from amounting to a zero-sum game, the interactions between the two sectors have changed over time what welfare encompasses, its contents and targets, often engendering the creation of new fields of intervention. Secondly, this book departs from a well-established tradition of comparison between Western nation-states by using and mixing various scales of analysis (local, national, international and global) and by covering case studies from Spain to Poland and France to Greece in the nineteenth and twentieth centuries. Thirdly, this book goes beyond state centrism in welfare studies by bringing back a host of public and private

actors, from municipalities to international organizations, from older charities to modern NGOs. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Private Health Insurance and the European Union Springer Nature

Economic sanctions are instruments of foreign policy. However, they can also affect legal relations between private parties – principally in contract. In such cases, the court or arbitration tribunal seized must decide whether to give effect to the economic sanction in question. Private international law functions as a 'filter', transmitting economic sanctions that originate in public law to the realm of private law. The aim of this book is to examine how private international law rules can influence the enforcement of economic sanctions and their related foreign policy objectives. A coherent EU foreign policy position – in addition to promoting legal certainty and predictability – would presuppose a uniform approach not only concerning the economic sanctions of the EU, but also with regard to the restrictive measures imposed by third countries. However, if we examine in detail the application of economic sanctions by Member States' courts and arbitral tribunals, we find a somewhat different picture. This book argues that this can be explained in part by the divergence of private international law approaches in the Member States.

General course on private international law MDPI

This book demonstrates that, when reforming the water sector, policymakers should arrange social policies that mitigate the negative impact of reforms. It presents a detailed analysis of the current issues, and uses country studies to show how social policies are vital in ensuring affordable access to water supply. A Criminology of Policing and Security Frontiers Bristol University Press

This book addresses one of the core challenges in the corporate social responsibility (or business and human rights) debate: how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights. However, ensuring access to remedy depends on a series of normative and judicial elements that become highly complex when disputes are transnational. In such cases, courts need to consider and apply different laws that relate to company governance, to determine the competent forum, to define which bodies of law to apply, and to ensure the adequate execution of judgments. The book also discusses how alternative methods of dispute settlement can relate to this topic, and the important role that private international law plays in access to remedy for corporate-related human rights abuses. This collection comprises 20 national reports from jurisdictions in Europe, North America, Latin America and Asia, addressing the private international law aspects of corporate social responsibility. They provide an overview of the legal differences between geographical areas, and offer numerous examples of how states and their courts have resolved disputes involving private international law elements. The book draws two preliminary conclusions: that there is a need for a better understanding of the role that private international law plays in cases involving transnational elements, in order to better design transnational solutions to the issues posed by economic globalisation; and that the treaty negotiations on business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses, which could also help to identify and bridge the existing gaps that limit effective access to remedy. Adopting a comparative approach, this book appeals to academics, lawyers, judges and legislators

concerned with the issue of access to remedy and reparation for corporate abuses under the prism of private international law.

Commission Du Droit Du Canada Rapport Annuel Edward Elgar Publishing

This book investigates the economic decisions behind the implementation of public-private partnerships (PPPs). The first part of the book discusses different forms of public procurement contracts, in particular in France and the UK, and provides an economic analysis of the potential advantages and pitfalls of public-private partnerships. This exploration of PPPs' efficiency also includes an examination of the financing conditions of public procurements, as well as regulatory requirements. By reviewing empirical studies on PPPs, the second part of the book compares their advantages over purely public solutions and offers practical guidance on their implementation. Practitioners will also learn best practices on how to involve stakeholders in calls for bids.

Polarized Law (with an English Translation of the Hague Conventions on Private International Law). Routledge
Private International Law is often criticized for failing to curb private power in the transnational realm. The field appears disinterested or powerless in addressing global economic and social inequality. Scholars have frequently blamed this failure on the separation between private and public international law at the end of the nineteenth century and on private international law's increasing alignment with private law. Through a contextual historical analysis, Roxana Banu questions these premises. By reviewing a broad range of scholarship from six jurisdictions (the United States, France, Germany, the United Kingdom, Italy, and the Netherlands) she shows that far from injecting an impetus for social justice, the alignment between private and public international law introduced much of private international law's formalism and neutrality. She also uncovers various nineteenth century private law theories that portrayed a social, relationally constituted image of the transnational agent, thus contesting both individualistic and state-centric premises for regulating cross-border inter-personal relations. Overall, this study argues that the inherited shortcomings of contemporary private international law stem more from the incorporation of nineteenth century theories of sovereignty and state rights than from theoretical premises of private law. In turn, by reconsidering the relational premises of the nineteenth century private law perspectives discussed in this book, Banu contends that private international law could take centre stage in efforts to increase social and economic equality by fostering individual agency and social responsibility in the transnational realm.

Economic Sanctions in EU Private International Law Oxford University Press

The contributions brought together in this book derive from joint seminars, held by scholars between colleagues from the University of Oxford and the University of Paris II. Their starting point is the original divergence between the two jurisdictions, with the initial rejection of the public-private divide in English Law, but on the other hand its total acceptance as natural in French Law. Then, they go on to demonstrate that the two systems have converged, the British one towards a certain degree of acceptance of the division, the French one towards a growing questioning of it. However this is not the only part of the story, since both visions are now commonly coloured and affected by European Law and by globalisation, which introduces new tensions into our legal understanding of what is "public" and what is "private".

Corporate Investigations, Corporate Justice and Public-Private Relations Bloomsbury Publishing

To do ethnography, a researcher must have rapport with research subjects. But what is rapport? Ethnography and

ethnographic methods have increasingly become a feature of social inquiry in general and sociolinguistics in particular, and rapport is generally considered a prerequisite for fieldwork. And yet, unlike related terms such as "communication" and "phatic communion," this concept has remained largely unexamined. Reimagining Rapport turns a critical eye to the use of the term "rapport" across disciplines. The collection analyzes the very idea of rapport, both exploring how it has been shaped by historical forces and actors within sociocultural anthropology, and questioning its usefulness. Rather than viewing the term as simply denoting a type of positive social relationship that needs to be formed between researcher and consultant before research can begin, this book invites us to reimagine rapport theoretically, methodologically, and meta-methodologically. Zane Goebel and other leading sociolinguists challenge readers to think about how rapport has been constructed within these disciplines, and ultimately to see rapport as an emergent, co-constructed social relationship that is actively built during situated multimodal encounters. The contributors collectively examine the role of ideology and mediation in the construction of rapport, and argue that reconceptualizing research-subject relationships is essential for establishing more sophisticated ways of understanding, interpreting, and representing research context. A valuable resource for scholars and students of sociolinguistics and linguistic anthropology as well as for others engaged in ethnographic fieldwork. Reimagining Rapport is the first collection to provide an in-depth investigation of this critically important but previously unexamined concept.

Public Relations and Social Theory Radcliffe Publishing

Public Relations and Social Theory: Key Figures, Concepts and Developments broadens the theoretical scope of public relations studies by applying the work of a group of prominent social theorists to make sense of the practice. The volume focuses on the work of key social theorists, including Max Weber, Karl Marx, John Dewey, Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Dorothy Smith, Zygmunt Bauman, Harrison White, John W. Meyer, Luc Boltanski and Chantal Mouffe. Each chapter is devoted to an individual theorist, providing an overview of that theorist's key concepts and contributions, and exploring how these can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist, along with recommendation of key works and secondary literature.

Free Trade and Competition in the EEC Springer Nature

This title presents twenty-nine topics, prepared by leading scholars in more than 20 countries, providing a comparative analysis of cutting-edge legal topics of the 21st century. Considering topics of vital moment to contemporary legal scholars, the title includes pieces on Surrogate Motherhood, The Balance of Copyright in Comparative Perspective, International Law in Domestic Systems, Constitutional Courts as "Positive Legislators," Same-sex Marriage, Climate Change and the Law, The Regulation of Private Equity, Hedge Funds, and State Funds, and Regulation of Corporate Tax Evasion. Each chapter surveys legal developments in the U.S. and Canada, Europe, Asia, Latin and South America, Africa, and the Middle East in a format that permits the reader easy access to similarities and differences in the approaches of the selected national regimes. This comprehensive volume tells the story of parallel trends in the evolution of legal doctrine despite jurisdictional, cultural, and political barriers. While each of the covered countries stands alone as a sovereign, in a technologically advanced world their disparate systems nonetheless have converged to adopt

comparable strategies in dealing with complex legal issues. The volume is a critical addition to the library of any scholar hoping to keep abreast of the major trends in contemporary law.

The Public-private Mix for Health Edward Elgar Publishing
Policing and security provision are subjects central to criminology. Yet there are newer and neglected forms that are currently unscrutinised. By examining the work of community safety officers, ambassador patrols, conservation officers, and private police foundations, who operate on and are animated by a frontier, this book reveals why criminological inquiry must reach beyond traditional conceptual and methodological boundaries in the 21st century. Including novel case studies, this multi-disciplinary and international book assembles a rich collection of policing and security frontiers both geographical (e.g. the margins of cities) and conceptual (dispersion and credentialism) not seen or acknowledged previously.

The World Development Report, now in its 24th edition, is the standard reference work for international economic data. It contains an appendix of social and economic statistics for more than 200 countries. World Development Report 2001--Institutions for Markets--focuses on the performance of transition countries in their progress toward market economies. This edition is centered around the issues related to market reform and how reforms can improve and sustain living standards. It answers such questions as: How can institutions better support markets? and What are the institutions which make markets effective in delivering inclusive growth?

Public and Private Welfare in Modern Europe Oxford University Press

This book focuses on how public and private international law address civil liability for transboundary pollution. In public international law, civil liability treaties promote the implementation of minimum procedural standards in domestic tort law. This approach implicitly relies on private international law to facilitate civil litigation against transboundary polluters. Yet this connection remains poorly understood. Filling the gap, this book engages in a meaningful dialogue between the two areas and explores how domestic private international law can reflect the policies developed in international environmental law. It begins with an investigation of civil liability in international environmental law. It then identifies preferable rules of civil jurisdiction, foreign judgments and choice of law for environmental damage, using Canadian private international law as a case study and making extensive references to European law. Liability for transboundary pollution is a contentious issue of the law, both in scholarship and practice: international lawyers both private and public as well as environmental lawyers will welcome this important work.

Newsletter Bloomsbury Publishing

This book examines the extent of free trade within the EEC and attempts to establish the conditions under which a State may operate in the Market through the medium of the undertakings which it controls. It discusses the ways in which Member States may tamper with free market forces without infringing the principle of free competition, and whether state liability can be established for such actions. It also assesses the separate liability of both public and private enterprises which operate under such a heavily state-regulated environment that a certain anti-competitive behaviour is virtually imposed upon them. The book concludes that the system as it operates is not as successful as it might be and that the Council of Ministers and the Commission should set guidelines for co-ordinated action in order to avoid national policies leading to a rejection of the free-market principle.
