### **The Ford that Beat Ferrari**

Motorbooks

In a highly focussed 10 year period Porsche sports cars went from being regular but comparatively humble class winners to completely dominate international prototype racing. This was a time of non-stop development mixed with turmoil and success under the

direction of Dr. Ferdinand Piech.

**Supercar Revolution** Thunder Bay Press (CA)

Automotive History

*Classic Car* Penguin

The 1950s saw the automobile come of age, with some of the most imaginative developments in car design asserting a new confidence in the car as an accessible symbol of freedom. One of the great eras of automobile production, the '50s saw cars such as the Chevrolet Corvette, Ford Thunderbird, and Jaguar

XK120 hit the roads, as well as the more glamorous MGA, Mercedes 190SL, and the Triumph TR3. Hot Cars of the '50s celebrates the best cars of the decade, providing a detailed look at more than sixty of the greatest and most stylish automobiles from around the world. All the great names are covered, including Aston Martin, Bentley, BMW, Cadillac, Chevrolet, Fiat, Jaguar, MG, Oldsmobile, Pontiac, and Rolls-Royce. Illustrated with specially commissioned photography, each car is examined from all angles in close-up detail. Specifications are provided for each machine, including performance statistics, engine type, transmission, special features, running gear, and dimensions. The book also takes a close look under the hood, examining the chassis and suspension as

well as the design of the engine. Finally, the book tracks the production milestones of each car and marks refinements and developments in styling and performance. Packed with information and great photos, this volume is a must for all lovers of the classic and stylish machines of the 1950s. Book jacket.

Speed Read Supercar Crowood

“There's no writer alive like de Botton” (Chicago Tribune), and now this internationally heralded author turns his attention to the insatiable human quest for status—a quest that has less to do with material comfort than love. Anyone who's ever lost sleep over an unreturned phone call or the neighbor's Lexus had better read Alain de Botton's irresistibly clear-headed new book, immediately.

For in its pages, a master explicator of our civilization and its discontents explores the notion that our pursuit of status is actually a pursuit of love, ranging through Western history and thought from St. Augustine to Andrew Carnegie and Machiavelli to Anthony Robbins. Whether it's assessing the class-consciousness of Christianity or the convulsions of consumer capitalism, dueling or home-furnishing, *Status Anxiety* is infallibly entertaining. And when it examines the virtues of informed misanthropy, art appreciation, or walking a lobster on a leash, it is not only wise but helpful.

*Acid News* University of Pennsylvania Press

Get the official story behind the eighth generation of Chevrolet's legendary

sports car in this licensed book featuring engaging text and photography from GM's archives and Corvette team members. This updated edition of *Corvette Stingray* is revised to cover the C8's latest developments, including the 70th Anniversary model, high-performance Z06, and the all-new hybrid E-Ray. Corvette is Chevrolet's iconic performance car. Its importance and status in the performance-car world cannot be overstated. Thus each new Corvette generation is sweated by Chevy's designers, engineers, marketing staff, and executives to ensure that it sets the bar higher than the preceding version. With the eighth generation, Chevrolet did more than raise the bar or move the goalpost—they tore down the stadium and rebuilt it from scratch. For

the first time ever in a production version, the Corvette featured a mid-engine configuration. Though Corvette engineers had experimented with this engine placement for several decades, 2020 marked the first time Chevrolet had committed it to production cars. The seventh-generation Corvette had prodigious power on tap and excellent performance, but its front-engine configuration had reached its traction limit with increasing horsepower levels. The mid-engine Corvette eliminated any remaining barriers and took the battle to supercar rivals like Ferrari, Lamborghini, and McLaren. With the new Z06 and E-Ray versions, Corvette brought even more heat to the competition. Corvette Stingray reveals the story every Corvette fan needs to read.

**Porsche Prototype Era** Motorbooks In Day One, automotive journalist Marty Schorr recalls life on the front line in the classic muscle car era, thrashing brand-new cars that would become collector vehicles. Most muscle-car books celebrate beautifully-restored vehicles surrounded by hard facts; Day One tells the real story from the point-of-view of one of the period's most respected automotive journalists, Marty Schorr. For the first time in print, you'll get a unique perspective on what it was like to actually drive, race, and otherwise thrash what are some of today's most valuable collector cars. CARS, the iconic magazine Marty wrote and edited didn't rely on industry advertising for revenue. Instead, the magazine made money the old fashioned way, from newsstand

sales, leaving it able to be honest and frank in its coverage of high-performance street cars. CARS magazine reported on both Day stock and modified cars, cars the traditional magazines wouldn't touch, like the ultra-high-performance vehicles from companies like Baldwin-Motion, Yenko Chevrolet, Nickey Chevrolet, Royal Pontiac, and Tasca Ford. Prepare yourself for Day One to cover the most important cars of a given year, including: Pontiac's 1962-1963 lightweight Super-Duty 421 street and Swiss Cheese models Chevrolet's 1963 big-block 427 Mystery Motor and ZL-1 Impala. Ford 1963 ½ 427/425 Galaxie fastback The 1964 Ramchargers The first 426 Street Hemi Cotton-Owens prepared Hemi Coronet A 1966 Olds Twin-Engined (850 cubic

inches) Grant Toronado, currently owned by Jay Leno A prototype 1966 Plymouth 426 Street Hemi Satellite One of two 427 SOHC Galaxies prototypes A '67 Royal Bobcat GTO Plymouth's original '68 Hemi Road Runner Hurst-built Plymouth & Dodge 1968 Hemi-Darts and Hemi-Cudas **Ferrari Hypercars** David and Charles After Ford unsuccessfully attempted to buy Ferrari, in 1963, the American car giant instead embarked on its own racing programme in a bid to beat the famous Italian marque at the world's most prestigious race, the Le Mans 24 Hours, as told in the forthcoming Hollywood movie Ford v. Ferrari. This updated edition of The Ford that Beat Ferrari tells the story of how that mission was eventually accomplished. Development of the GT40: how the

prototype Ford GT emerged in 1964 from the previous year's Lola GT programme. The works teams and the GT40: the car's racing exploits in its earlier years, first with Ford Advanced Vehicles (1964), then Shelby American (1965) and Alan Mann Racing (1966). The big ones: this section of the book covers the GT40's evolution into the 7-litre monsters that brought enormous success, including the first two Le Mans victories with the Mark II (1966) and Mark IV (1967), before becoming outlawed by new restrictions on engine size. The Gulf years: against all expectations, the venerable GT40, now back to 5-litre power, raced on with John Wyer's crack JW Automotive Engineering outfit in the iconic blue and orange colours of Gulf, successes including two further Le Mans wins (1968

and 1969). The production line racer: the stories of the 68 privateers, big and small, who raced GT40s. Chassis and drivers: a data section giving resumés of type designations, chassis histories and all drivers who raced GT40s. The magic lives on: the book's concluding sections show surviving cars at differing stages in their later life and bring the story up to date with developments since the 2005 edition.

Revolution Française Bloomsbury Publishing

From the Chevrolet Bel Air to the Ferrari Testarossa, this stunning book showcases the most iconic and important classic cars from every decade since the 1940s. Few things ignite such reverence as a classic car. With more than 250 iconic models from

the 1940s to the early 1990s, photographed from every angle, this title is a glorious celebration of the stars in the classic car firmament. Classic Car brings you the story of more than 20 great marques, including household names Bentley, Mercedes, Ferrari, Cadillac and Aston Martin. Its lavish photography reveals every detail in close-up of models that range from the 1940s giant two-ton Daimler DE36, which ferried royals about in style, through to sleek Ferraris from the 1980s capable of smashing the 200mph barrier. It puts you in the driving seat of such icons as the Chevrolet Corvette, the Ford Thunderbird, and the Mercedes 300SL, and brings you the designers of these amazing machines and the story of their manufacturers. This ultimate

guide to classic cars further features: - A comprehensive catalog that draw out the key features of each important model, with detailed profiles and specification. - Feature pages broaden the scope of the book, covering everything from the designers and manufacturers who created them to their evolution over the decades. - Stunningly shot DPS images add an extra layer of color and flavor to the book. - Written by award-winning author and expert on all aspects of motoring, Giles Chapman, Editor-in-Chief of DK's The Car Book, which has sold over 550,000 copies worldwide to date. Updates will include the key models that have grown in popularity since the last edition. Whether you dream of owning one of these super-cool cars, or you are a collector already, Classic Car is set to

become a treasured favorite.

The World's Fastest Cars Motorbooks

This landmark book is the result of interviews with many of the greatest names in Ferrari history, and is loaded with never-before-seen stories and photos.

*Car and Driver* Motorbooks International

The All-American Muscle Car provides the ultimate hands-on history of the American Muscle car and where it is now -- Mustangs, Camaros, 'Cudas, Challengers, you name it. When John Z. DeLorean and his cadre of enthusiastic rule benders took it upon themselves to bolt Pontiac's hottest engine into a mid-sized Tempest, disobeying orders from the top of General Motors food chain, they created something that should not have been, and will never be again: the

muscle car. The resulting GTO spearheaded a new breed of performance car aimed at a new breed of buyer: the baby boom generation, tens of millions of young customers entering the market each year. The All-American Muscle Car: The Rise, Fall and Resurrection of Detroit's Greatest Performance Cars tells the story of these brutal performance machines through the words of muscle-car icons like Jim Wangers, the man who marketed DeLorean's thuggish invention, Joe Oldham, a legendary automotive journalist who tested these cars when they first came off the production line, often via illegal street racing, and classic-car broker Colin Comer, who has been instrumental in restoring some of the most iconic (and valuable) muscle

cars. Top muscle car experts like Randy Leffingwell and David Newhardt tell other facets of the muscle-car story, like the pony-car wars between the Mustang, Camaro, 'Cuda, and Challenger; the ultra-high performance dealer specials; and the rebirth of the modern muscle car. All told, this book provides the ultimate hands-on history of these most American of cars.

*The Bright Side of Prison Life* Capstone Classroom

The Complete Book of Pontiac GTO gives you a year-by-year, model-by-model exploration of the world's first muscle car, all in full color photography, most of which has never been published. When Pontiac created the original muscle car—the GTO—it reshaped the automotive world like a four-inch piston

going through a three-inch cylinder bore. Everything changed the moment John Zachery DeLorean and his crew of hot-rodding miscreants bolted a big engine into a smaller car and created the 1964 GTO. Make no mistake: DeLorean and his partners in crime were genuine outlaws. The GTO broke so many of General Motors' corporate rules that the people responsible should have been fired. And they would have been, except the car was a hit. The Complete Book of Pontiac GTO explores every iteration of the first car created specifically for baby boomers. With rare photography from the archives of Hot Rod and Motor Trend magazines, this book is the complete resource for fans of the world's first muscle car.

*The American Speed Shop* DK Publishing

(Dorling Kindersley)

Tells the story of Tesla and argues that, under Elon Musk's "insane mode" leadership, the company is bringing an end to the era of gasoline-powered transportation.

*Motion Performance* Motorbooks

Now in Paperback! Revealing the inside story of Carroll Shelby's last quarter century: the legend, the man, and the vehicles he helped develop with the author: Ford GT, Shelby GT500, Shelby Cobra Concept, Shelby GR1, Super Snake, secret projects, and the return of 'Daisy,' the last Shelby Cobra.

*The last Shelby Cobra* Duke University Press

Women at the Wheel explores women's historical experience with automobiles. Katherine Parkin argues that in every

regard, from learning to drive to repairing cars, from being a passenger to taking the wheel, women had a distinct experience with cars in American culture.

The All-American Muscle Car CarTech Inc

For nearly sixty years, TVR produced some of the most thrilling, spine-tingling, hand-built sports cars to emerge from any British motor manufacturer. Yet it was the period between 1981 and 2004, under the management of Peter Wheeler, when the company finally shook off its shed-built roots and proved that it could produce cars that could match anything from Maranello or Stuttgart in terms of performance, but at a fraction of their price. Illustrated with over 300 photographs, TVR - Cars of the Peter Wheeler Era tells the story of the

design, development and engineering of some of TVR's fastest, outrageous and most successful cars, from the retro-styled S1, to the racing Tuscan, 1000bhp Speed Twelve and the brutal Sagaris.

#### TVR Mitchell Beazley

Speed, the sensation one gets when driving fast, was described by Aldous Huxley as the single new pleasure invented by modernity. The *Speed Handbook* is a virtuoso exploration of Huxley's claim. Enda Duffy shows how the experience of speed has always been political and how it has affected nearly all aspects of modern culture. Primarily a result of the mass-produced automobile, the experience of speed became the quintessential way for individuals to experience modernity, to feel modernity in their bones. Duffy

plunges full-throttle into speed's "adrenaline aesthetics," offering deft readings of works ranging from F. Scott Fitzgerald's *The Great Gatsby*, through J. G. Ballard's *Crash*, to the cautionary consumerism of Ralph Nader. He describes how speed changed understandings of space, distance, chance, and violence; how the experience of speed was commodified in the dawning era of mass consumption; and how society was incited to abhor slowness and desire speed. He examines how people were trained by new media such as the cinema to see, hear, and sense speed, and how speed, demanded of the efficient assembly-line worker, was given back to that worker as the chief thrill of leisure. Assessing speed's political implications, Duffy considers

how speed pleasure was offered to citizens based on criteria including their ability to pay and their gender, and how speed quickly became something to be patrolled by governments. Drawing on novels, news reports, photography, advertising, and much more, Duffy provides a breakneck tour through the cultural dynamics of speed.

*Autocar* Dutton Juvenile

Take a look at the vehicle sitting in your driveway. It may be the last one you ever own. With an estimated 33 million fully autonomous cars and taxis projected to hit the road by 2040, an automotive renaissance is soon to be upon us. Personal car ownership currently costs the average medium-sized sedan owner \$9,282 annually. But personal car ownership may soon be a

thing of the past. The A.I.-powered machines of the future will be doing the driving for us. Autonomous vehicles will be the most disruptive technology ever deployed by mankind.

**Porsche Turbo** David Bull Publishing

This book contains rare pictures, schemas and graphs detailing the many unique qualities of the Nissan GT-R, a car that revolutionised modern sports car dynamics. Analysis of the motorsport history of the GT-R provides an original view of development of the models, and comparison of them with other sports and racing cars. It features an original and critical analysis of the new GT-R R35, and the R35 Spec V, which was launched in the beginning of 2009, is also represented in the book. With over 400 colour photographs, this is essential

reading for sports car fans.

### Dream Cars Stanley Museum Incorporated

Celebrate the rebirth of the world's most stunning high-performance automobile. Porsche made history when it brought turbocharging to the racing world in the form of the 917. When strict regulations regarding engine displacement took away the option of bigger engines, manufacturers turned to forced induction. In its wildest trim, the original 12-cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower! Porsche's official philosophy was that racing cars must have a connection to street cars, so it was preordained that Porsche would eventually produce a turbocharged version of its air-cooled flat-six cylinder

engine. The resulting 930 Turbo appeared in the spring of 1975 in Europe. Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds, and its top speed was 155 miles per hour. The Turbo's distinctive rear wing let the world know that this was something very special. It was nothing less than the rebirth of the high-performance automobile. At a time when the big-block engines in America's so-called "muscle cars" were putting out 180 horsepower and the engines in exotic supercars weren't much more ambitious, the lightweight Porsche was a genuine rocket. Porsche Turbo: The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance, both on the track and on

the street. It covers all of the major racing cars as well as the turbocharged street cars, including the 930, 935, 924, 944, 968, 911, and Cayenne Panamera. Don't let this one fly past you!

**Nissan GT-R Supercar: Born to race**  
Motorbooks

100 Cars That Changed the World showcases vehicles from the end of the nineteenth century to today. Along the way, you'll see vehicles such as the Ford

Model T that put America on wheels; the Volkswagen Beetle that was loved around the world; the Jeep that helped win World War II and popularized off-road adventure; the Pontiac GTO that launched the muscle car era; the Dodge Caravan that changed the way families travel; the Ford Explorer that ignited the SUV movement; and the Tesla Model S that made electric cars exciting.
