When they prepare for college, few candidates take the time to acquire the caliber of recommendation letters they will need to distinguish themselves in a highly competitive applicant pool. This book, which was written by an Ivy League admissions expert, offers detailed advice to write (and get) persuasive letters that highlight the personal, academic and professional strengths the committee expects to see. It also includes 45 successful recommendation letters for students who have distinguished themselves as scholars, leaders, volunteers, athletes, and performers. Finally, there are also persuasive letters that explain extenuating circumstances in a candidate's history (such as disappointing grades and a low SAT score). At top colleges, where the competition is fierce, the quality and depth of a candidate's recommendation letters can make the difference between acceptance and rejection. Whether you are an applicant who needs a persuasive letter of recommendation, or someone who has been asked to write one, this exceptional book is mandatory reading. "Despite public concern with the increasing politicization of U.S. immigration courts, few people are aware of the system's fundamental flaw: the immigration courts are not really 'courts' but an office of the Department of Justice--the nation's law enforcement agency. Alison Peck's original and surprising account shows how paranoia sparked by World War II and the War on Terror drove the structure of the immigration courts. Focusing on previously unstudied decisions in the Roosevelt and Bush administrations, this book divulges both the human tragedy of our current immigration system and the human crises that led to its creation. Peck provides an accessible legal analysis of recent events to make the case for independent immigration courts, proposing that the courts be moved into an independent, Article I court system. As long as the immigration courts remain under the authority of the attorney general, the administration of immigration justice will remain a game of political football--with people's very lives on the line." -- back cover.

What difference does law make in immigration policymaking? Since the 1970s, networks of progressive attorneys in both the US and France have attempted to use litigation to assert rights for non-citizens. Yet judicial engagement - while numerically voluminous - remains doctrinally curtailed. This study offers new insights into the constitutive role of law in immigration policymaking by focusing on the legal frames, narratives, and performances forged through action in court. Challenging the conventional wisdom that 'cause litigation' has little long-term impact on policymaking unless it produces broad rights-protective principles, this book shows that legal contestation can have important radiating effects on policy by reshaping how political actors approach immigration issues. Based on extensive fieldwork in the United States and France, this book explores the paths by which litigation has effected policy change in two paradigmatically different national contexts.

In the continuing U.S. debate over illegal immigration, a human face has rarely been shown. This collection of letters between undocumented immigrants in California and their families in Mexico, Guatemala, and El Salvador reveals the other side of the story. Published for the first time in paperback, this book reveals the often poignant human drama currently being played out along the U.S.-Mexico border. It is the first book that tells the story of these immigrants in their own words, in Spanish and English. It is also of inestimable value to anyone who wants to understand the full dimensions of the problem.
