In this tale of passion and obsession, Diana Bishop, a young scholar and a descendant of witches, discovers a long-lost and enchanted alchemical manuscript, Ashmole 782, deep in Oxford's Bodleian Library. Its reappearance summons a fantastical underworld, which she navigates with her leading man, vampire geneticist Matthew Clairmont. Harkness has created a universe to rival those of Anne Rice, Diana Gabaldon, and Elizabeth Kostova, and she adds a scholar's depth to this riveting tale of magic and suspense. Whether we are watching TV, surfing the Internet, listening to our iPods, or reading a novel, we all engage with media as an audience. Despite the widespread use of this term in our popular culture, the meaning of the "audience" is complex, and it has undergone significant historical shifts as new forms of mediated communication have developed from print, telegraphy, and radio to film, television, and the Internet. John L. Sullivan's second edition of *Media Audiences: Effects, Users, Institutions, and Power* explores the concept of media audiences from four broad perspectives: as "victims" of mass media, as market constructions & commodities, as users of media, and as producers & subcultures of mass media. The goal is for students to be able to think critically about the role and status of media audiences in contemporary society, reflecting on their relative power in relation to institutional media producers.

As Christians, how do we know what we know? This simple question challenges the nature of information, how we learn, decision making, who we are, and who this God is that we worship. If this challenge appears optional; it is not—our post-Christian culture questions every faith assumption. Simple Faith examines these questions and discusses implications for faith and life. An important implication of this study is that faith plays a critical role into how we think, learn, and make decisions in the context of limited resources and an uncertain future. Even scientific inquiry requires faith, which normally gets hidden in untested assumptions and presumptions about what is interesting to investigate. Often the critical arguments driving our decisions are not cold hard facts, but the stories that we tell in the midst of complex decision environments. The timing of this inquiry is critical. The movement from modern to postmodern thinking has upended most institutions, but especially the Christian church. The separation of heart and mind, which characterizes modern thinking, eroded faith leaving the church in a weak position to adapt to the rapid changes accompanying postmodernism. Ironically, postmodern thinking that values storytelling favors Christian faith because the Gospel of Jesus Christ is the best story around.

As a new generation of activists demands an end to racism, *A Place to Land* reflects on Martin Luther King, Jr.'s "I Have a Dream" speech and the movement that it galvanized. Winner of the Orbis Pictus Award for Outstanding Nonfiction for Children Selected for the Texas Bluebonnet Master List Much has been written about Martin Luther King, Jr. and the 1963 March on Washington. But there's little on his legendary speech and how he came to write it. Martin Luther King, Jr. was once asked if the hardest part of preaching was knowing where to begin. No, he said. The hardest part is knowing where to end. "It's terrible to be circling up there without a place to land." Finding this place to land was what Martin Luther King, Jr. struggled with, alongside advisors and fellow speech writers, in the Willard Hotel the night before the March on Washington, where he gave his historic "I Have a Dream" speech. But those famous words were never intended to be heard on that day, not even written down for that day, not even once. Barry Wittenstein teams up with legendary illustrator Jerry Pinkney to tell the story of how, against all odds, Martin found his place to land. "We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture."

Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you

have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about

living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.
