This volume collects the notes of the CIME course "Nonlinear PDE's and applications" held in Cetraro (Italy) on June 23-28, 2008. It consists of four series of lectures, delivered by Stefano Bianchini (SISSA, Trieste), Eric A. Carlen (Rutgers University), Alexander Mielke (WIAS, Berlin), and Cédric Villani (Ecole Normale Supérieure de Lyon). They presented a broad overview of far-reaching findings and exciting new developments concerning, in particular, optimal transport theory, nonlinear evolution equations, functional inequalities, and differential geometry. A sampling of the main topics considered here includes optimal transport, Hamilton-Jacobi equations, Riemannian geometry, and their links with sharp geometric/functional inequalities, variational

methods for studying nonlinear evolution equations and their scaling properties, and the metric/energetic theory of gradient flows and of rate-independent evolution problems. The book explores the fundamental connections between all of these topics and points to new research directions in contributions by leading experts in these fields.

Encyclopedia of Snow Little Simon

La obra contiene, extractados, todos los libros de emblemas que

se publicaron en español durante los siglos XVI y XVII. Se trata de un material de difícil acceso que de este modo se pone a disposición del lector, ya sea investigador o mero aficionado a la riquísima cultura simbólica cifrada en el género de la literatura emblemática. El libro se presenta en primera instancia como índice alfabético de los motivos iconográficos principales presentes en cada emblema. Pero, además, se podrá acceder a los emblemas mediante búsquedas realizadas a partir de los índices complementarios: de autores, lemas, fuentes y claves temáticas, aparte de los motivos iconográficos secundarios. Completa el volumen un glosario terminológico y de personajes que ayuda a la comprensión de los significados. El desarrollo de los estudios de emblemática en el ámbito internacional (existe una extensa Society for Emblem Studies) ha hecho aconsejable introducir traducción al inglés de los campos de información más relevantes. Y las ventajas que proporcionan las nuevas tecnologías han sido aprovechadas con la incorporación de un CD-ROM (ejecutable por igual en los sistemas Macintosh y PC) que agiliza la combinación de búsquedas complejas. Tanto el CD-ROM como el libro reproducen los grabados de los 1.732 emblemas estudiados.
