Routledge  
This book  
offers vivid  
insights into  
policies of  
religious  
education in  
schools since  
the series of  
wars in former

Yugoslavia in  
the 1990's. It  
traces the  
segregation  
among  
members of  
different  
ethnic groups  
in Slovenia,  
Bosnia-

<p>Herzegovina, Croatia, and Serbia, which has never been greater or more systematic. It aims to be a necessary step in understanding the origins of this systematic segregation and how it is reproduced in educational practice, asserting that the politicization of religion in the school textbooks is one of the motors responsible for the ongoing ethnic segregation. It also deals with</p>	<p>complex aspects of this issue, such as the general situation of religion in the different countries, the social position of churches, the issues of gender, the reconciliation after the Yugoslav Wars, and the integration of the EU. <u>Intensive Bulgarian</u> Central European University Press Bosnian, Croatian, Montenegrin and Serbian: An Essential Grammar is intended for beginners and</p>	<p>intermediate students who need a reference that explains grammar in straightforward terms. It covers all the main areas of the modern single BCMS grammatical system in an accessible way, and free from jargon. When linguistic terminology is used, it is explained in layman's terms, the logic of a rule is presented simply and near parallels are drawn with English. This book covers all the</p>

grammar necessary for everyday communication (reaching B1 and B2 of the CEFR, ACTFL Intermediate-Mid). The book comprises of extensive chapters on all parts of speech, the creation of different word forms (endings for cases in nouns and adjectives, case forms for pronouns, tenses, verbal modes, verbal aspect etc.) and their uses in sentences. Each rule is illustrated with

numerous examples from everyday living language used in Bosnia-Herzegovina, Croatia, Montenegro and Serbia. This is a unique reference book in English aimed at the level of language study that treats BCMS as a single grammar system, explaining and highlighting all the small differences between the four variants of this polycentric language. **Nobody's**

Springer Ugresic, ever the flaneur, wanders from the Midwest to Zuccotti Park, the Irish Aran Islands to Jerusalem's Mea Shearim, from the tristesse of Dutch housing estates to the riots of South London, charting everything from the listlessness of Central Europe to the ennui of the Low Countries. One finger on the pulse of an exhausted Europe, another in the wounds of post-industrial

America, Ugresic trawls the fallout of political failure and the detritus of popular culture, mining each for revelation. Russian Cambridge University Press

This book presents compelling essays by leading Hungarian and foreign authors on the variety of social movements and parties that seek influence and power in a Hungary mired in deep and manifold crisis. The main question the volume tries to answer is: what can we expect after the fall of the semi-authoritarian Orb n regime in Hungary. Who will be the new players? What are their backgrounds? What are their political and social ideals, intentions and methods? The studies in the first section of the volume provide the reader with the reasons of the emergence of these new movements: a deep analysis of the historical, political and cultural background of the current situation. The second part contains essays and case studies which challenge the movements and parties involved to look beyond their current ineffectiveness, and to find ways of meeting the challenges that would allow them to exercise responsible and effective leadership in their time and place. This

collection would be the first of the kind both in the field of movement theory/history and democracy studies because it reflects on very recent developments not researched in the international scholarly literature. One would not be able to understand contemporary Hungarian society without reading it before the 2014 elections. *With Their*

*Backs to the Mountains* Routledge In her long career, Ugresic has published several novels (e.g., *The Ministry of Pain*), but she made her name with her essay collections, which have caused controversy and earned her the admiration of writers and critics abroad. In these latest musings, written over the course of several years, Ugresic leaves no stone unturned and no thought

contained, doing what she does best: writing about the human condition through her own experience. Refusing to establish a central theme, she touches upon a wide range of topics: the paradox of multiculturalism, metaphors as our "defense against nightmares," the eerie similarities between capitalism and communism, and ways in which we try to rise hopelessly

above our less-than-perfect existence. Along the way, she pays homage to the works of literature that have influenced her own creative process, in an effort to pay "a symbolic literary tax on narcissism" because "writing is not the humblest of vocations." Perhaps not, but Ugresic certainly knows how to balance being a critic with being criticized. Recommended for all libraries

How do we understand and also assess the health care of America? Where is health care provided? What are the characteristics of those institutions which provide

it? Over the short term, how are changes in health care provisions affecting the health of the population, the cost of care, and access to care?. Health Care Delivery in the United States, now in a thoroughly updated and revised 9th edition, discusses these and other core issues in the field. Under the editorship of Dr. Kovner and with the addition of Dr. James Knickman, Senior VP of

Evaluation, Robert Wood Johnson Foundation, leading thinkers and practitioners in the field examine how medical knowledge creates new healthcare services. Emerging and recurrent issues from wide perspectives of health policy and public health are also discussed. With an easy to understand format and a focus on the major core challenges of the delivery of health care,

this is the textbook of choice for course work in health care, the reference for administrators and policy makers, and the standard for in-service training programs.;chapter

 Offering a single, coherent framework of the political, economic, and social phenomena that characterize post-

communist regimes, this is the most comprehensive work on the subject to date. Focusing on Central Europe, the post-Soviet countries and China, the study provides a systematic mapping of possible post-communist trajectories. At exploring the structural foundations of post-communist regime development, the work discusses the types of state, with an emphasis on informality and

patronalism; the variety of actors in the political, economic, and communal spheres; the ways autocrats neutralize media, elections, etc. The analysis embraces the color revolutions of civil resistance (as in Georgia and in Ukraine) and the defensive mechanisms of democracy and autocracy; the evolution of corruption and the workings of “relational economy”; an analysis of China as

“market-exploiting dictatorship”; the sociology of “clientage society”; and the instrumental use of ideology, with an emphasis on populism. Beyond a cataloguing of phenomena—actors, institutions, and dynamics of post-communist democracies, autocracies, and dictatorships—Magyar and Madlovics also conceptualize everything as building blocks to a larger, coherent

structure: a new language for post-communist regimes. While being the most definitive book on the topic, the book is nevertheless written in an accessible style suitable for both beginners who wish to understand the logic of post-communism and scholars who are interested in original contributions to comparative regime theory. policies within divided regions. Exploring the 'divide and rule' politics across ex-Yugoslav successor states, the editors and contributors draw upon a wide range of case studies from across the region. Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that

are creating their present. By promoting nationalistic politics in such media, textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict. This edited collection will appeal to scholars of educational media, history education and post-conflict societies. *The Anatomy of Post-Communist*

is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and

debunks a number of long-held beliefs, such as adults not being as good of language learners as children. **Bosnian, Croatian, Montenegrin and Serbian** T&p Books This highly successful program assists in the development of all the language skills (listening, speaking, reading, and writing) by presenting realistic settings, situations, and contexts. Perfect for use in an
